Forex Trading Robot and A.I. Development Nsikak Edet,2020-10-15 Forex trading is big business and looks like a time-consuming task to undertake. Most potential traders who would otherwise have started trading are overwhelmed just by the thought of the time it will take to learn forex trading not to talk of actually executing a trade. The time-consuming part would have been true some decades ago. However, at the moment, I would say I beg to differ. This book is written to show you that the time we live in now is The Age of the Machines, just press play, and let the robots do the trading for you. Without dwelling on irrelevant stories, I will go straight into revealing what you are about to learn in this book: □A step-by-step process of how to develop your own custom forex indicator robots □You need ZERO knowledge of robotics, coding, or programming to be able to create your own robot and Artificial Intelligence (A.I.). □How to develop a forex indicator robot for Moving Averages □How to develop a forex indicator robot for support and resistance □How to develop breakout momentum forex indicator robot using Bollinger Bands □How to develop breakout momentum forex indicator robot using Wedge or Squeeze □How to develop runaway gapping forex indicator robot □How to develop a multi-timeframe forex indicator robot □How to develop a math-driven Parabolic SAR forex indicator robot. □A step-by-step process of how to develop your own custom forex trading robot □How to develop a NON-FARM PAYROLL forex trading robot □How to easily convert all your indicators to trading robots that will trade on your behalf. □How to make your robot trade for you even when your computer or phone is turned off. □How to find entry points for your robot to trade □Understanding A.I, smart forex robot, machine learning in forex robot development, and quantum forex robot trading. Many more things you will learn are all included in this book. You can only find out about all these if you get a copy of this book.

Forex Trading Money Management System Don Guy,2017-01-17 I'm going to show you how to CRUSH financial markets using a simple Money Management System that reduces your risk while maximizing profits! While this system may focus on FOREX trading and the casino game Roulette, it can be applied to trading ANY financial market, including stocks, commodities, and binary options. I was inspired to develop this system after a horrible night in Las Vegas where I lost \$2000 playing Roulette with a betting system that I thought was unbeatable. I spent the following 12 years reverse engineering everything that went wrong that dreadful night and developed what I discovered into a simple and powerful Money Management system that makes it easy for anyone to CRUSH financial markets like a professional gambler! After developing this system, I returned to Las Vegas and turned \$20 into \$500 in about 1 hour at the roulette table, and that was down from a high of \$750. The \$500 profit that I walked away with was locked in from the profit-locking mechanism, like a gear that spins freely in one direction but quickly locks in the opposite direction. In January 2015, I had this system programmed into an MT4 Forex Trading Robot so I could automate the entire system (signals, trade execution, and money management). After a few weeks of little activity, the market sprang to life and so did my system! My account doubled in about 48 hours and that's when I knew I had developed something very special. But my trading robots are NOT required to use this system. It can be applied manually to virtually ANY trading system in ANY market and even on casino games like Roulette, although you will get much better results in financial markets where you can have far better statistics than a casino game. So come join me and I'll open a whole new dimension of trading and opportunities for BIG PROFITS that you have never noticed before!

How to Trade Forex with Zero Fear Christo Ricardo,2018-04-08 It is huge step when you make the decision to become a Forex trader. Most brand new Forex traders are getting into this business because they think they can make quick money and become rich beyond their dreams. While that may be true, it is not as easy as one thinks and certainly will not happen as soon as one thinks. There are only two groups of people who are doing business in the markets, the professionals and the retail investors and traders, which do you want to be? By buying this book you are taking the first step needed to end up in the group that achieves consistent low risk profits on a daily basis, the professionals and the smart money. If you are not ready to take that step yet then you may be a part of the group called the sheeple of the herd that provides those profits. While that may seem like a harsh statement, I think it's important to point out the a few of the harshest realities of how the markets work right up front, so you know what's at stake when your hard-earned money is at risk in the live market. Now with the advent of YouTube anyone with a video camera can record a video, plop it up on the internet and brand new unknowledgeable traders who are looking for information and seeing this and going oh this must be right. Beware of this type of marketing as it can and will get you and your account into a lot of trouble very quickly. It is not about how much you know in this business but about the quality of what you know. Instead of learning it the simple way and keeping things very simple brand new traders tend to over complicate their learning curve, don't be that trader. You can use this book and the references, suggestions and tips in it to go further into your educational studies of the markets and there dynamics. Knowing market dynamics is going to be critical for you to have the winning edge you will need to be a successful market participant. By studying what this book suggests you will not become one of the 97% of the sheeple of the herd.

Simple & Easy Forex Trading Strategies Josef Fluse,2017-09-21 I have seen brand new Forex investors and traders around the world waste a serious amount of valuable education and training time on learning information that will not do them any good and can even cause them to lose some of their hard earned money right away in the live markets. No one wants that however it is a huge mistake that virtually all brand new Forex traders make because they don't know any better, after reading this book you will.I don't care where you trade from or what you trade, Dubai to Detroit or Mumbai to Manhattan doesn't matter because a chart is a chart and supply and demand is supply and demand, period, live markets don't work any other way no matter where in the world you are or what your trading even camels or goats.New Forex traders all around the world spend waaaay too much time on looking for the magical combination of indicators, settings and colors they think will show them something that is going to help them make more money. There are no shortcuts or bells that go ding to tell you to enter the right position so stop looking right now and if you are using something like that and you're losing money that is why. All you need to see is right in front of you on the price chart and that is price and time. Those are the only things that professional Forex traders care about and nothing else. You can certainly use your chart like a crystal ball to tell you where price will go with a high degree of certainty.When you are done reading this book you will have an excellent basic explanation of what and what not to do before you even study anything or do any kind of education. The information in this book will put you on the fast track to becoming a successful self-directed Forex investor and trader no matter where you trade from in the world or what you trade with very little money invested. This book gives you the brutal and harsh truth of what happens in real life, in real time and in real money in the worlds live markets every day. There are no short cuts and you must do the time if you want to drive your own money train to the bank.

Low Risk High Reward Forex Trading and Investing for Beginners Joseph Moneta,2015-08-21 Everyone has to start somewhere in the business of making money with money. You must have the right information from the very first day if you want to become successful in this business. You don't need to know everything all at one time nor could you, and you certainly don't have to learn how to trade every asset class there is. You should

concentrate on becoming a specialist versus being a generalist. This book affords readers who are brand new to Forex trading and investing the opportunity to really learn and expand their knowledge base as brand new Forex traders. This book should be a must read for novice and inexperienced traders with no experience looking to build on their education foundations and strategies. By knowing what to study from the start as a beginner you can greatly reduce the huge learning curve there is in this business to be able to make money in the live markets on a consistent daily basis right away. Investing and trading is the best business in the world as far as I am concerned. The beautiful thing about the financial market is that it is always going to be there!! It is the only business I know of where you can do it from anywhere on the planet there is WIFI so what could be wrong with kicking back on your boat at the marina or at the beach on a beautiful sunny day or flying to Europe to meet friends for the weekend and still be making unlimited amounts of money the whole time you're doing it. You always have a chance to make money. It's virtually 24 hours a day, just like a bank ATM right? This book cuts right to the core and lays out a progressive foundation of principles on which you can begin trading Forex for high profit as long as you have done the education and training the right way from the first day. This book will start any brand new Forex investor, swing trader or position trader the right way to begin driving their money train down the right tracks directly to the bank. This book is short; it takes the complexities of learning currency trading and pares it down to the essentials plus a few extra tips from professionals. It does not have to be long to give you the basic information you need to actually make money trading Forex. It is all up to you though, to take the information provided here and act on it with a vengeance if you want to make money right away once you begin trading live with real money. You will be a better and more prepared trader after reading this book. Use this book as an overview or a guide if you will, to what to study and learn first to become consistently profitable trading Forex for people who are brand new with zero experience. I give you concise information as to what to learn first and what to look for as far as further information is concerned. I tell you only the most critical things to learn first because those are absolutely the most important and the ones that will make you money right away if you do them. It would take someone just starting out years to figure out what is in this book before they could make any real money in the live markets consistently. Remember you don't need to know everything all at once but merely what makes you money. When you are done reading this entire book you will have an excellent basic explanation of what and what not to do before you even study anything or do any kind of education or spend any unnecessary money. The information will put you on the fast track to becoming a successful self-directed Forex trader with very little money invested.

Currency Kings: How Billionaire Traders Made their Fortune Trading Forex and How You Can Too Ben Robson, 2017-08-11 Win big and win often in the world's greatest financial market With \$5 trillion traded every day, FX dwarfs all other markets. It's a tough market to master—but not as tough as people think. Currency Kings provides the keys anyone can use to unlock the enormous potential of FX. Currency Kings provides the foundation, you build on it with the right combination of discipline, original thinking, and a powerful will to win. The behemoth called the FX market awaits. Use this unparalleled investing guide to profit beyond your wildest dreams.

Forex Made Easy Stephen Benjamin, 2017-02-02 Forex Trading is one of the easiest businesses a man can set up. It does not require much start-up capital like you would if you are to establish a physical business. With a good device like a laptop or tablet, internet connection and a good broker, you can start with as low as \$100. You may ask if Forex is that easy, why is everyone not making it in Forex? The truth is Forex works and is one of the easiest means to make money online only if you have a trading edge. If you ask most people who lost money what did you trade? Why did you trade this set up? They will not be able to clearly define their trading edge and what they see before placing their trade. To succeed in Forex trading, you need to acquire the right skills, developed your confidence through demo trading and knows the right trading strategy that suits your personality. Forex is not about pulling the trigger when you see a big move; you need to have a TRADING EDGE. A Trading edge is what defines if you will succeed in this business or not. Your trading edge is the signals you are looking for in the market that will inform you when to buy and when to sell. This book is written to fill the gap by giving you the right trading edge that will help you to trade profitably in the market. If you have been trading before and you barely break even, or you are a beginner in the Forex business, I strongly believe implementing the strategies as explained in the chapters of the book will help you to realize your dream of making a success of Forex business. This trading edge works in all market and in all time frames. This book teaches you step by step how you can trade profitably without much knowledge of advance Forex techniques and still make money from the Forex market.

The Forex Edge: Uncover the Secret Scams and Tricks to Profit in the World's Largest Financial Market James Dicks, 2011-12-14 Exposing the tricks used by brokers to bilk investors, leading Forex educator James Dicks provides counterstrategies for safety investing and profiting in the world's largest market.

Interactive Granular Computations in Networks and Systems Engineering: A Practical Perspective Andrzej Jankowski, 2017-06-25 The book outlines selected projects conducted under the supervision of the author. Moreover, it discusses significant relations between Interactive Granular Computing (IGrC) and numerous dynamically developing scientific domains worldwide, along with features characteristic of the author's approach to IGrC. The results presented are a continuation and elaboration of various aspects of Wisdom Technology, initiated and developed in cooperation with Professor Andrzej Skowron. Based on the empirical findings from these projects, the author explores the following areas: (a) understanding the causes of the theory and practice gap problem (TPGP) in complex systems engineering (CSE); (b) generalizing computing models of complex adaptive systems (CAS) (in particular, natural computing models) by constructing an interactive granular computing (IGrC) model of networks of interrelated interacting complex granules (c-granules), belonging to a single agent and/or to a group of agents; (c) developing methodologies based on the IGrC model to minimize the negative consequences of the TPGP. The book introduces approaches to the above issues, using the proposed IGrC model. In particular, the IGrC model refers to the key mechanisms used to control the processes related to the implementation of CSE projects. One of the main aims was to develop a mechanism of IGrC control over computations that model a project's implementation processes to maximize the chances of its success, while at the same time minimizing the emerging risks. In this regard, the IGrC control is usually performed by means of properly selected and enforced (among project participants) project principles. These principles constitute examples of c-granules, expressed by complex vague concepts (represented by c-granules too). The c-granules evolve with time (in particular, the meaning of the concepts is also subject of change). This methodology is illustrated using project principles applied by the author during the implementation of the POLTAX, AlgoTradix, Merix, and Excavio projects outlined in the book.

Trading in the Zone Mark Douglas, 2001-01-01 Douglas uncovers the underlying reasons for lack of consistency and helps traders overcome the ingrained mental habits that cost them money. He takes on the myths of the market and exposes them one by one teaching traders to look beyond random outcomes, to understand the true realities of risk, and to be comfortable with the probabilities of market movement that governs all market speculation.

The Logical Trader Mark B. Fisher, 2002-07-26 An in-depth look at the trading system that anyone can use The Logical Trader presents a highly effective, yet simple trading methodology that any trader anywhere can use to trade almost anything. The ACD Method developed and refined by Mark Fisher after many years of successful trading, provides price points at which to buy and sell as determined by the opening range of virtually any stock or commodity. This comprehensive guide details a widely used system that is profitably implemented by many computer and floor traders at major New York exchanges. The author's highly accessible teaching style provides readers of The Logical Trader with a full examination of the theory behind the ACD Method and the examples and real-world trading stories involving it. Mark B. Fisher (New York, NY), an independent trader, is

founder of MBF Clearing Corp., the largest clearing firm on the NYMEX. Founded in 1988, MBF Clearing has grown from handling under one percent of the volume on the NYMEX to nearly twenty percent of the trades today. A 1982 summa cum laude graduate from the Wharton School of Business, University of Pennsylvania, Fisher also received his master's degree in finance and accounting from Wharton. New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books by traders who have survived the market's ever changing temperament and have prospered-some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future.
