Implications of EMU for Exchange Rate Policy in Central and Eastern Europe

Mr. George Kopits, 1999-01-01 In view of the requirements of Stage 2 of European Monetary Union (EMU) for accession to the European Union, this paper examines the desirability for, and the ability of, the lead candidates in Central and Eastern Europe to participate in the new exchange rate mechanism (ERM2) and eventually in EMU. For most of these countries the benefits are likely to outweigh the cost of participation. After successfully meeting the basic conditions (wage flexibility, prudent fiscal and monetary stance, financial system soundness) for ERM2, each candidate should be able to shadow the euro, with sufficient flexibility around the central rate, prior to formal participation. The paper concludes with a discussion of two policy dilemmas.

1989 World Economic and Financial Surveys International Monetary Fund, 1989-01-01 This paper summarizes major measures taken in the international exchange and trade systems in 1988 and developments in exchange arrangements and the evolution of exchange rates. The exchange arrangements adopted by members since 1973 cover a broad spectrum of degrees of flexibility, from single-currency pegs to a freely floating system. Most countries have adopted arrangements that fall clearly into one or another of the major categories of the present classification system adopted by the IMF in 1982, and countries with dual markets usually have one market that is clearly more important than the other, which allows accurate classification by major market. Changes in IMF members' arrangements for their currencies during this decade have shown a distinct tendency to move toward more flexible arrangements and away from single-currency pegs, continuing a trend that began in the mid-1970s. A qualitative sense of the significance of the trend toward more flexible arrangements can be conveyed by the degree that world trade is affected by countries adopting different arrangements.

World Bank East Asia and Pacific Economic Update 2011 World Bank,2013-06-26 The World Bank East Asia and Pacific Economic Update is a comprehensive, twice-yearly review of the region's economies prepared by the East Asia and Pacific region of the World Bank. In this edition, the report notes that real GDP growth in East Asia has been moderating after a sharp rebound from the global crisis. Inflation has become the key short-run challenge for the authorities in the region, complicated by a surge in portfolio capital inflows and rapidly increasing food and commodity prices that hit low-income households disproportionately. Over the medium-term, East Asia has the potential to sustain rapid increases in living standards even as the global economy enters a more challenging phase.

Lessons from Haiti's Recent Exchange Rate Developments Ms. Rina Bhattacharya,Neil Shenai,2022-11-11 From August to October 2020, the Haitian authorities were successful at bringing about a sharp appreciation in the gourde/U.S. dollar exchange rate. This paper analyzes the factors behind this appreciation and its spillovers on the economy. It finds

that foreign exchange surrender requirements had a statistically significant effect on the nominal exchange rate, while foreign exchange intervention by the central bank did not. Surrender requirements were also found to have raised trading costs and volatility in the foreign exchange market and contributed to the development of a wider parallel nominal exchange rate premium. This appreciation contributed to a decline in headline inflation during the episode while delivering some fuel subsidy-related savings to the government. Remittance-dependent households and exporters saw a drop in their purchasing power, and Haiti's net external buffers were adversely affected. Following from these findings, the paper offers recommendations on ways to facilitate foreign exchange management and boost external sustainability while contributing to the central bank's overall policy objectives.

World Economic Outlook, October 1995 International Monetary Fund. Research Dept., 1995-10-30 The World Economic Outlook, published twice a year in English, French, Spanish, and Arabic, presents IMF staff economists analyses of global economic developments during the near and medium term. Chapters give an overview of the world economy; consider issues affecting industrial countries, developing countries, and economies in transition to market; and address topics of pressing current interest. Annexes, boxes, charts, and an extensive statistical appendix augment the text.

German Unification International Monetary Fund, 1990-12-04 This paper discusses comparison of economic and social indicators in the year 1988 between Federal Republic of Germany (FRG) and German Democratic Republic (GDR). The budgetary costs of unification will be substantially larger than initially envisaged. Moreover, if one adds to the budget the increases in government debt related to equalization paper, a portion of the old enterprise debt on the books of the banks. The Trust Fund has been assigned a task of enormous scope and complexity: the privatization, restructuring, and in some cases, liquidation of 8000 enterprises

with 4 million employees. Even taking care of the short-run financial problems of these enterprises has proved daunting; the more fundamental task will be near impossible to achieve with any rapidity. It is clearly essential to the success of economic integration that capital allow east rather than labor flowing west and that income growth and new opportunities arc enough to meet reasonable aspirations on the pan of the residents of East Germany.

Macroeconomic Models for Adjustment in Developing Countries International Monetary Fund,1991-06-15 This volume, edited by Mohsin S. Khan, Peter J. Montiel, and Nadeem U. Haque, examines recent IMF-developed empirical macroeconomic models dealing with adjustment and stabilization policies in developing countries. Some models are relevant for specific countries, and others relate to groups of developing countries.

Currency Convertibility in the Middle East and North Africa

Mr.Saleh M. Nsouli,Mr.Manuel Guitián,1996-11-05 Currency convertibility is a far-reaching instrument to facilitate integration into the global economy. With it a country can gain the benefits of increased freedom in capital movements and of fostering trade and financial linkages worldwide. A seminar sponsored by the Arab Monetary Fund and the IMF, held in Marrakesh, Morocco, discussed the theoretical and empirical aspects of currency convertibility in the Arab countries. The volume, edited by Manuel Guitián and Saleh M. Nsouli, reproduces the papers presented at the seminar.

Policies for Developing Foreign Exchange Markets; Occ. Paper No. 60 International Monetary Fund, 1988-06-16 This paper describes and analyzes forward market systems with varying degrees of sophistication, and it assesses them from the viewpoint of a smaller industrial or developing country asking itself how it could institute such a system, or how it could further develop an existing system in a way consistent with its institutional and macroeconomic structure. All industrial countries except Iceland now have forward exchange markets in which the rate is determined by the market. Forward markets that have been liberalized in several countries in the 1980s have matured quickly. There are several variants of market-determined systems which could be envisaged. An auction market could be devised for forward transactions, but is unlikely to be practical, because the supply of forward exchange probably may not be determined in

advance sufficiently accurately. As the last stage of its development, the market could be extended from underlying commercial transactions to forward transactions of a purely financial character, a process that is taking place in most of the few industrial countries that have retained regulated forward systems. Development of a forward market is not a panacea for incorrect financial policies. In fact, cultivation of the market will require the adoption and maintenance of realistic financial policies.
