L'Analyse des correspondances et les techniques

connexes Jean Moreau, Pierre-André Doudin, Pierre Cazes, 1999-11-17 Cet ouvrage présente différents points de vue sur une même méthode, l'analyse des correspondances. Il montre comment cette méthode s'est développée pour traiter des données de plus en plus variées et complexes et comment elle s'est enrichie au contact d'autres courants de pensée. De plus, cet ouvrage présente un panorama des applications possibles.

Efficiency Measurement in Health and Health Care
Bruce Hollingsworth, Stuart J. Peacock, 1999-10-14
This book provides a concise synthesis of leading edge research in the theory and practise of efficiency measurement in health and health care. Whilst much of the literature in this area is confusing and impregnable, Hollingsworth and Peacock show the logical links between the economic theory underlying efficiency, the methods used in analysis and practical application of measurement techniques including Data Envelopment Analysis and Stochastic Frontiers Analysis. The book outlines which methods are most suitable in which setting, how to specify valid models, and how to undertake a study and effectively disseminate results. The current state of the art is assessed in terms of methods and published applications, and undertakes practical applications of advanced methods, including

analysis of economies of scale and scope, variable weightings, specification testing, and estimation of the efficient production of health. Finally, the way forward in efficiency measurement in health is outlined, mapping out an agenda for future research and policy development.

Introductory Grammar of Amharic Wolf Leslau,2000

This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Biochemistry of Collagens, Laminins and Elastin

Morten Karsdal,2019-05-28 There are 28 different

collagens, with 46 unique chains, which allows for a collagen for each time and place. Some collagens are specialized for basement membrane, whereas others are the central structural component of the interstitial matrix. There are eight collagens among the 20 most abundant proteins in the body, which makes these molecules essential building blocks of tissues. In addition, lessons learned from monogenic mutations in these proteins result in grave pathologies, exemplifying their importance in development. These molecules, and their post-translationally modified products serve as biomarkers of diseases in a range of pathologies associated with the extracellular matrix. Biochemistry of Collagens, Laminins, and Elastin: Structure, Function, and Biomarkers, Second Edition provides researchers and students current data on key structural proteins (collagens, laminins, and elastin), reviews on how these molecules affect pathologies, and information on how selected modifications of proteins can result in altered signaling properties of the original extracellular matrix component. Further, it discusses the novel concept that an increasing number of components of the extracellular matrix harbor cryptic signaling functions that may be viewed as endocrine function, and it highlights how this knowledge can be exploited to modulate fibrotic disease. Provides an updated comprehensive introduction to collagen and structural proteins Gives insight into emerging analytical technologies that can detect biomarkers of extracellular matrix degradation Includes seven new chapters, including

one on how collagen biomarkers are used in clinical research to support drug development and in precision medicine Contains insights into the biochemical interactions and changes to structural composition of proteins in disease states Proves the importance of proteins for collagen assembly, function, and durability
