Program Evaluation for U.S. Army Lifelong Learning Centers (LLCs) Anna T. Cianciolo, 2008 Lifelong Learning Centers (LLCs) comprise a suite of technologies that enable online posting of schoolhouse curricula and collaboration among distributed learners. These technologies connect the field Army to Army schoolhouses, simultaneously improving course currency and supporting training in the field. The impact of lifelong learning on organizational excellence seems clear. However, it is unknown how LLCs promote readiness using educational technology and how LLC effectiveness should be measured. The purpose of this research was to develop a comprehensive, generalizable framework for conceptualizing the effectiveness of LLCs and for capturing the drivers of success. The framework and associated metrics were used to conduct an evaluation of a pilot LLC located at Fort Leavenworth. This evaluation indicated the importance of taking a causal approach. An assessment of outcomes alone would have indicated that the initiative had achieved its goals but would have obscured the fact that some of these goals--teaching and learning effectiveness--were achieved largely independently of the use of learning technologies. The basis of the framework in theory makes it generalizable not only across current and future LLCs, but also across other blended learning initiatives, addressing a gap in the scholarly literature regarding the effectiveness assessment of educational technology.

Proposals for Research Gerry Stahl,2011-01-11 My career has usually been funded by grants. Here are some of the proposals I wrote at the University of Colorado and at Drexel University. Successful grant proposals are tricky to write. The ones reproduced here might provide helpful examples. They may also provide explicit statements of some of the goals of my research over the years.

European Citizens' Initiative: A Tool for Engagement and Active Citizenship Yilly Vanessa Pacheco,Dulce Lopes,2023 This publication gathers contributions to understand better and further develop the European Citizens' Initiative. This participatory and agenda-setting tool introduced into the Treaty of Lisbon has not yet reached its full potential of citizen engagement, nor has it driven the significant policy changes initially expected. Bearing this in mind, the project ECI: From A to Z aimed to promote the knowledge and use of the European Citizens' Initiative within the higher education arena by engaging investigators and students from four different Universities (University of Coimbra; Georg-August University of Göttingen; Alexandru Ioan Cuza University of Iași and the University of Vigo) to work together to share their concerns and common views on the European Union role and policies. This publication describes the methodology followed and results reached under the project, but more than that, it is a practical toolkit for all who wish to know more about the European Citizens' Initiative and how to put it in motion.

Distance Teaching for the Third World Michael Young,Hilary Perraton,Janet Jenkins,Tony Dodds,2010-11-26 This reissue, first published in 1980, is based on the experiences of the International Extension College in developing distance teaching. The volume begins by reviewing the world problems of educational quality and quantity, and then examines the ways in which print, broadcasts and group study have been used to train teachers, to improve classroom education, to teach by correspondence out of school, and to support rural development. It then considers how that experience can be used, perhaps by creating a network of radio colleges, to supplement and extend existing schools and colleges. Finally, the book includes a descriptive and annotated bibliography of over 100 distance teaching projects in 65 third world countries.

COMMUNITY RADIO AS AN AGENT OF SOCIAL CHANGE – A COMPARATIVE STUDY OF SANGAM AND NAMMA DHWANI Dr. B.

SUNIL,2021-05-03 There exists no doubt, considering the proactive role of mass communication in gathering, disseminating and gauging the public opinion and motivating them towards a desired change. This role by mass media is more important, particularly, in India where citizens are being seen as information starving and being deprived of much required knowledge to better their lives. Studies in the past have pointed out that, media have and continues to play an important and decisive role in nations that are categorized as third world countries, in bringing about development and leading to a predetermined social change. Furthermore, media can play an independent and objective role in a democratic political setup in India, by bringing forth various opinions and ideas, thereby nurturing an informed citizen about the polices, developments and issues concerning them.
