Evaluation and Accountability in Clinical Training E.

Berler, Barry A. Edelstein, 2013-11-11 Accountability in clinical training implies a strong relationship between the training outcomes touted by a training program and the performance of its graduates. The training program and its faculty must be able to ensure that students have the competencies necessary for entering the profession and can offer competent services. In addition, responsibility for the quality and value of training must be assumed by the profession. Pressure for accountability is becoming increasingly apparent as the public learns about fraud, waste, and abuse in publicly funded programs (Fishman & Neigher, 1982). Federally supported clinical training programs have had to defend their training practices against threats of funding loss without the hard data needed to support their practices. Funding seems to have been forthcoming mostly because of our ability to demonstrate the need for clinical, counseling, and school psychologists. Graduates seeking professional careers in such applied fields demand considerable

trust from their clientele and the public-at-large when they establish themselves, offer and advertise their services, make claims on public monies, and profess to do good and no harm. Neither their clientele nor the public are in the position to evaluate the services of the profession or the claims made for these. (American Psychological Association [APA], 1982, p.

Gender and Law Katharine T. Bartlett,Deborah L.

Rhode,Joanna L. Grossman,Deborah L. Brake,2020-02-02 The purchase of this ebook edition does not entitle you to receive access to the Connected eBook on CasebookConnect. You will need to purchase a new print book to get access to the full experience including: lifetime access to the online ebook with highlight, annotation, and search capabilities, plus an outline tool and other helpful resources. *Gender and Law: Theory, Doctrine, Commentary*, Eighth Edition is organized around theoretical frameworks, showing different conceptualizations of equality and justice and their impact on concrete legal problems. The text provides complete, up-to-date coverage of conventional “women and the law” issues, including employment law and affirmative action, reproductive rights, LGBTQ issues, domestic violence, rape, pornography, international women’s rights, and global trafficking. Showing the complex ways in which gender permeates the law, the text also explores the gender aspects of subject matters less commonly associated with gender, such as property, ethics, contracts, sports, and civil procedure. Throughout, the materials allow an emphasis on alternative approaches and how these approaches make a difference. Excerpted legal cases, statutes, and law review articles form an ongoing dialogue within the book to stimulate thought and discussion and almost 250 provocative “putting theory into practice” problems challenge students to think deeply about current gender law issues. New to the Eighth Edition: The book now begins with an introductory chapter that previews

the five major theoretical frameworks that shape the book: Formal Equality, Substantive Equality, Difference, Non-subordination, and Autonomy. It also introduces three critical perspectives that interrelate and enrich the study of gender—queer theory, intersectionality analysis, and masculinity theory. By introducing these critiques and adjacent theories from the outset, later chapters can integrate and build on these interrelations in specific areas of coverage. Putting Theory into Practice problems that pose cutting-edge, current issues are included throughout each chapter. Updated and more sustained attention to gender identity and non-binary identities throughout the book. Materials raising questions and critique about the intersection of race and gender are covered in greater depth. Materials and questions about masculinity as an aspect of gender are now integrated throughout the book instead of being covered discretely in a single chapter. Expanded coverage of the ERA and the renewed efforts to secure ratification. Materials on gender equity in the legal profession have been updated and new coverage has been added on women in leadership, including women in politics. The materials on public accommodations discrimination now include *Masterpiece Cakeshop v. Colorado Civil Rights Comm’n* as a principal case. An extensively revised and comprehensive teacher’s manual includes references to additional materials and updated suggestions of audio and video clips from films, documentaries, news programs, and television and radio series for the book’s main substantive topics.

How to Set Up and Manage a Corporate Learning Centre

Samuel A. Malone, 2016-04-29 Few corporate initiatives of the last ten years have been more influential in the development of a learning culture at work than the corporate learning centre. The first edition of Sam Malone's book quickly established itself as the definitive concise guide to best practice. The second edition reflects the lessons learned since that time, along with the developments in learning technology. Setting up and sustaining a

successful centre involves strategic skills such as planning and championing; technical skills, including budgeting, marketing and evaluation; and the people skills of communicating, influencing and managing change. There are chapters in the book for all the stakeholders involved, including the learners themselves. How to Set Up and Manage a Corporate Learning Centre offers definitive advice on all of these areas. Sam Malone demystifies what is a difficult, expensive and long term project for any organization.
