The Nature of Fragile Things Susan Meissner, 2022-01-04
April 18, 1906: A massive earthquake rocks San Francisco just before daybreak, igniting a devouring inferno. Lives are lost, lives are shattered, but some rise from the ashes forever changed. Sophie Whalen is a young Irish immigrant so desperate to get out of a New York tenement that she answers a mail-order bride ad and agrees to marry a man she knows nothing about. San Francisco widower Martin Hocking proves to be as aloof as he is mesmerizingly handsome. Sophie quickly develops deep affection for Kat, Martin's silent five-year-old daughter, but Martin's odd behavior leaves her with the uneasy feeling that something about her newfound situation isn't right. Then one early-spring evening, a stranger at the door sets in motion a transforming chain of events. Sophie discovers hidden ties to two other women. The first, pretty and pregnant, is standing on her doorstep. The second is hundreds of miles away in the American Southwest, grieving the loss of everything she once loved. The fates of these three women intertwine on the eve of the devastating earthquake, thrusting them onto a perilous journey that will test their resiliency and resolve and, ultimately, their belief that love can overcome fear. From the acclaimed author of *The Last Year of the War* and *As Bright as Heaven* comes a gripping novel about the bonds of friendship and mother love, and the power of female solidarity.

Playing Through Curtis Gillespie, 2007-12-18 In this lyrical, evocative, and heartfelt memoir, Curtis Gillespie chronicles the year he spent with his wife and daughters in quaint Gullane, Scotland. Against the backdrop of a uniquely beautiful landscape, Gillespie deftly explores the bonds of fatherhood and friendship, and the irresistible lure of links golf. When Curtis Gillespie first played a round in Gullane, he was a graduate student on the golf team at the University of St. Andrews. He wrote to his father back in Canada about the unmatched peacefulness and loveliness of the place and promised that the two of them would golf there together someday. After his father passed away before they could play the Scottish course, Gillespie vowed to return himself. Thirteen years after his first visit, Gillespie uproots his wife and two young daughters and moves to Gullane, hoping to learn something about himself, and his life, in the process. Early on Gillespie teams up with two aging local golfers named Archie and Jack (members at Gullane Golf Club for more than a century between them), and the ensuing friendship that blossoms between the elderly Scotsmen and the young Canadian infuses *Playing Through* with a sense of enchanting familiarity and easygoing charm. Gillespie samples courses like Muirfield and St. Andrews under the delightfully gruff guidance of Archie and Jack, soaks up the natural beauty of the countryside, and sets out to capture the full flavor of village life, haggis and all. The gregarious and eccentric locals, the stunning setting, the town's history, and even his family's response to their new life all converge in a warm, wonderful story rich with comedy and insight. Skillfully interwoven through the narrative are anecdotes about Gillespie's much-missed father, an ordinary man who inspired extraordinary love from his son. And though his father is not there to share in Gullane's charms, the experience of moving to the village and coming to know its inhabitants helps Gillespie through an unexpected passage of discovery about his father, himself, and his own journey through fatherhood.

Properties, Powers and Structures Alexander Bird,Brian Ellis,Howard Sankey,2013-03-01 While the phrase metaphysics of science has been used from time to time, it has only recently begun to denote a specific research area where metaphysics meets philosophy of science—and the sciences themselves. The essays in this volume demonstrate that metaphysics of science is an innovative field of research in its own right. The principle areas covered are: The modal metaphysics of properties: What is the essential nature of natural properties? Are all properties essentially categorical? Are they all essentially dispositions, or are some categorical and others dispositional? Realism in mathematics and its relation to science: What does a naturalistic commitment of scientific realism tell us about our commitments to mathematical entities? Can this question be framed in something other than a Quinean philosophy? Dispositions and their relation to causation: Can we generate an account of causation that takes dispositionality as fundamental? And if we take dispositions as fundamental (and hence not having a categorical causal basis), what is the ontological ground of dispositions? Pandispositionalism: Could all properties be dispositional in nature? Natural kinds: Are there natural kinds, and if so what account of their nature should we give? For example, do they have essences? Here we consider how these issues may be illuminated by considering examples from real science, in particular biochemistry and neurobiology.

Julian Among the Books Julia Bolton Holloway,2016-04-26
Julian among the Books: Julian of Norwich's Theological Library brings together innovative research on aspects of the Showing of Love, especially the Pan-European background of its manuscripts,

and their contexts, arguing for the concept of 'Holy Conversations' in a mise en abyme, where her readers, breaking the frame, participate in her contemplative visions. It discusses the three versions of her text, her knowledge of Hebrew, and her Benedictine context and its *lectio divina*, including textual and physical links with the Norwich monk, Cardinal Adam Easton, OSB, his collegial friendship with St Catherine of Siena and St Catherine of Sweden, and his support for St Birgitta of Sweden's canonisation. The book also explores the library of texts of the 'Friends of God' movement, including the *Mirror of Simple Souls* of Marguerite Porete, presents the texts of Julian's conversation with Margery Kemp, and discusses the exiled Brigittine and Benedictine nuns who continued to treasure and copy Julian's text on the Continent following England's Reformation. Scholarly methods used in this study include palaeography, codicology, iconography, reader reception, discourse on the Body, use of Hebrew, Greek and Latin, and the concepts of 'Holy Conversation' and 'Textual Communities'. It gives much of the text of the Westminster Manuscript in translation, along with many quotations from the Westminster, Paris and Sloane manuscripts in their original layout and spelling. Illustrated with colour plates of the Julian manuscripts in the centrefold and other images, and black and white figures throughout the body of the text, it brings the reader as close as possible to Julian's writing, her context, and her preservation by other women contemplatives throughout time.

The Fragile Ordinary Samantha Young, 2018-07-01 I am Comet Caldwell. And I sort of, kind of, absolutely hate my name. People expect extraordinary things from a girl named Comet. That she'll be effortlessly cool and light up a room the way a comet blazes across the sky. But from the shyness that makes her book-character friends more appealing than real people to the parents

whose indifference hurts more than an open wound, Comet has never wanted to be the center of attention. She can't wait to graduate from her high school in Edinburgh, Scotland, where the only place she ever feels truly herself is on her anonymous poetry blog. But surely that will change once she leaves to attend university somewhere far, far away. When new student Tobias King blazes in from America and shakes up the school, Comet thinks she's got the bad boy figured out. Until they're thrown together for a class assignment and begin to form an unlikely connection. Everything shifts in Comet's ordinary world. Tobias has a dark past and runs with a tough crowd—and none of them are happy about his interest in Comet. Targeted by bullies and thrown into the spotlight, Comet and Tobias can go their separate ways...or take a risk on something extraordinary. From the New York Times bestselling author of *The Impossible Vastness of Us* and the *On Dublin Street* series comes a heartfelt and beautiful new young adult novel, set in Scotland, about daring to dream and embracing who you are.

Golf Balls, Boomerangs and Asteroids Brian H.

Kaye,2008-07-11 Exciting reading for anyone with a curious mind! 'Walking one day by a golf course in Wisconsin, I was startled to hear a sharp bang as a golf ball narrowly missed my head and hit a tree. My companion cheerfully remarked, 'That could have killed you, you know.' I picked up the innocent looking little white ball and looked at it with new respect.' Prompted by this perilous experience, Brian Kaye has written a delightful and informative book on the design and behavior of different kinds of missiles from golf balls, arrows, and slingshots to comets and rockets to outer space. You'll learn about the science of tennis and find the answer to questions like why a golf ball has dimples or why a boomerang comes back. Don't miss Brian Kaye's latest, you'll be amused and amazed - and learn some physics to boot.
