King,Thomas D. Cox,2011-01-01 This book is provided as a guide, encouragement and handbook for faculty to introduce digital media in language you can understand and provide strategies and activities you can quickly assimilate into your teaching. We are excited that more people will be able to benefit from the powerful help and guidance contained in this book. We are even more exhilarated as we anticipate how each of you will discover applications and new directions we would never anticipate, and look forward. We look forward to your innovations as you use the material you discover here. This book responds to the needs of our changing world and students by revealing innovative technology applications and how faculty are and can use digital media in teaching in higher education because faculty make the quickest changes and learn how to do it best. It is a valuable resource for faculty from faculty, because it allows the sharing of successful teaching experiences with digital media with our worldwide colleagues so they may modify it, extend it, and improve it. Moreover, in our work with faculty across all disciplines, we also find that many struggle to think about teaching in ways in which they can incorporate technology meaningfully. While we might be experts in our discipline (chemistry, philosophy, music, etc) due to the curriculum of terminal degrees, we might not have strong preparation in instructional design. We have been fortunate to bring together faculty experts across different disciplines to specifically speak about how and why to use digital media in higher education settings. We realize we are asking you to think about your way of teaching with new ideas and strategies. Therefore, we try to illustrate them with clear examples. These different approaches include clear descriptions of what these activities look like, why to develop and implement them, and how to do so for your specific needs.

Becoming a One Person Band Ronald J. Plachno,2014-05-11 This book Becoming a One Person Band gives advice and tips on how to help a person to go from being a keyboard player (or perhaps other musician) to becoming a one person band of 4 or even as many as 16 instruments. This approach does require a home recording studio and some information is provided in this book on possible approaches. However, there are of course many ways to do a home recording studio, and so this book concentrates more on technique and how perhaps to determine what notes or chords to play. What do you need? A recording studio of course. But also a desire to become your own one person band as a hobby or even more than a hobby. And while a musician who only plays guitar or non keyboards may go a distance into becoming your own band, keyboard background would be even more helpful. What kind of keyboard background would a person need? If a person has experience with piano, organ or accordion or simply a modern day keyboard or keyboard controller and has one already, that would be a great start. Why the emphasis on keyboards? Modern day midi systems or DAW (Digital Audio Workstations) often take their inputs from keyboards and with that can create many sounds and also sound

effects. Yes, much can be done with guitars and perhaps just writing notes in for other parts, but keyboard experience is a great help. What talent is needed? It would be hard for me to define that. I never felt that I was anything special and yet I have accomplished a number of one person band songs with as many as 15 parts, and also enjoyed doing it. Of course if you have something of a music and band background and also some music theory background it is of course a big help. I do wish you the very best in your music endeavor, and hope that this book is at least a little helpful to you and your dreams or hobby. Ron Plachno (author)
