**Vibe Merchants: The Sound Creators of Jamaican Popular Music** Ray Hitchins,2016-03-03 Vibe Merchants offers an insider's perspective on the development of Jamaican Popular Music, researched and analysed by a thirty-year veteran with a wide range of experience in performance, production and academic study. This rare perspective, derived from interviews and ethnographic methodologies, focuses on the actual details of music-making practice, rationalized in the context of the economic and creative forces that locally drive music production. By focusing on the work of audio engineers and musicians, recording studios and recording models, Ray Hitchins highlights a music creation methodology that has been acknowledged as being different to that of Europe and North America. The book leads to a broadening of our understanding of how Jamaican Popular Music emerged, developed and functions, thus providing an engaging example of the important relationship between music, technology and culture that will appeal to a wide range of scholars.

Audio Culture, Revised Edition Christoph Cox,Daniel Warner,2017-07-27 The groundbreaking Audio Culture: Readings in Modern Music (Continuum; September 2004; paperback original) maps the aural and discursive terrain of vanguard music today. Rather than offering a history of contemporary music, Audio Culture traces the genealogy of current musical practices and theoretical concerns, drawing lines of connection between recent musical production and earlier moments of sonic experimentation. It aims to foreground the various rewirings of musical composition and performance that have taken place in the past few decades and to provide a critical and theoretical language for this new audio culture. This new and expanded edition of the Audio Culture contains twenty-five additional essays, including four newly-commissioned pieces. Taken as a whole, the book explores the interconnections among such forms as minimalism, indeterminacy, musique concrète, free improvisation, experimental music, avant-

rock, dub reggae, ambient music, hip hop, and techno via writings by philosophers, cultural theorists, and composers. Instead of focusing on some crossover between high art and popular culture, Audio Culture takes all these musics as experimental practices on par with, and linked to, one another. While cultural studies has tended to look at music (primarily popular music) from a sociological perspective, the concern here is philosophical, musical, and historical. Audio Culture includes writing by some of the most important musical thinkers of the past half-century, among them John Cage, Brian Eno, Ornette Coleman, Pauline Oliveros, Maryanne Amacher, Glenn Gould, Umberto Eco, Jacques Attali, Simon Reynolds, Eliane Radigue, David Toop, John Zorn, Karlheinz Stockhausen, and many others. Each essay has its own short introduction, helping the reader to place the essay within musical, historical, and conceptual contexts, and the volume concludes with a glossary, a timeline, and an extensive discography.

*A/V A to Z* Richard W. Kroon, 2010-03-30 Defining more than 10,000 words and phrases from everyday slang to technical terms and concepts, this dictionary of the audiovisual language embraces more than 50 subject areas within film, television, and home entertainment. It includes terms from the complete lifecycle of an audiovisual work from initial concept through commercial presentation in all the major distribution channels including theatrical exhibition, television broadcast, home entertainment, and mobile media. The dictionary definitions are augmented by more than 700 illustrations, 1,600 etymologies, and nearly 2,000 encyclopedic entries that provide illuminating anecdotes, historical perspective, and clarifying details.
