Music at the Edge Colin Andrew Lee, 2016-06-03 Music at the Edge invites the reader to experience a complete music therapy journey through the words and music of the client, and the therapist's reflections. Francis, a musician living with AIDS, challenged Colin Andrew Lee, the music therapist, to help clarify his feelings about living and dying. The relationship that developed between them enabled Francis the opportunity to reconsider the meaning of his life and subsequent physical decline, within a musical context. First published in 1996, Music at the Edge is a unique and compelling music therapy case study. In this new edition of the highly successful book, Colin retains the force of the original text through the lens of contemporary music therapy theory. This edition also includes more detailed narrative responses from the author and his role as a therapist and gay man. Central to the book are the audio examples from the sessions themselves. The improvisations Francis played and his insightful verbal explorations provide an extraordinary glimpse into the therapeutic process when working in palliative and end-of-life care. This illuminating book offers therapists, musicians, related professionals and those working with, or facing, illness and death a unique glimpse into the transcendent powers of music. It is also relevant to anyone interested in the creative account of a pianist's discovery of life and death through music.

Keeping Time Lisa Hooper, Donald C. Force, 2014-01-01 Music libraries often contain much more than books, scores, and recordings; they are also home to a wealth of archival music materials. Despite having archival holdings, many music librarians struggle to provide adequate storage, description, and access to these materials. Remaining cognizant of the wide variety of funding and staffing available to music libraries across North America, this basic manual provides an entry point into the archival profession for music librarians without formal archival training. At the same time the manual also serves as a ready-reference book for those already familiar with basic archival practices. This manual discusses archival theory alongside archival principles and practices, explaining key concepts and developments in acquisition, appraisal, arrangement, description, preservation, digitization, and funding. These fundamentals are demonstrated throughout the manual by numerous examples and hypothetical situations a music librarian is likely to encounter while managing archival music collections.

Long Way Down Jason Reynolds, 2017-10-24 "An intense snapshot of the chain reaction caused by pulling a trigger."

A cannon. A strap. A piece. A biscuit. A burner. A heater. A chopper. A gat. A hammer A tool for RULE Or, you can call it a gun. That’s what fifteen-year-old Will has shoved in the back waistband of his jeans. See, his brother Shawn was just murdered. And Will knows the rules. No crying. No snitching. Revenge. That’s where Will’s now heading, with that gun shoved in the back waistband of his jeans, the gun that was his brother’s gun. He gets on the elevator, seventh floor, stoked. He knows who he’s after. Or does he? As the elevator stops on the sixth floor, on comes Buck. Buck, Will finds out, is who gave Shawn the gun before Will took the gun. Buck tells Will to check that the gun is even loaded. And that’s when Will sees that one bullet is missing. And the only one who could have fired Shawn’s gun was Shawn. Huh. Will didn’t know that Shawn had ever actually USED his gun. Bigger huh. BUCK IS DEAD. But Buck’s in the elevator? Just as Will’s trying to think this through, the door to the next floor opens. A teenage girl gets on, waves away the smoke from Dead Buck’s cigarette. Will doesn’t know her, but she knew him. Knew. When they were eight. And stray bullets had cut through the playground, and Will had tried to cover her, but she was hit anyway, and so what she wants to know, on that fifth floor elevator stop, is, what if Will, Will with the gun shoved in the back waistband of his jeans, MISSES. And so it goes, the whole long way down, as the elevator stops on each floor, and at each stop someone connected to his brother gets on to give Will a piece to a bigger story than the one he thinks he knows. A story that might never know an END...if Will gets off that elevator. Told in short, fierce staccato narrative verse, Long Way Down is a fast and furious, dazzlingly brilliant look at teenage gun violence, as could only be told by Jason Reynolds.

Machine Learning and Music Generation José M. Iñesta,Darrell C. Conklin,Rafael Ramírez-Melendez,Thomas M. Fiore,2018-10-16 Computational approaches to music composition and style imitation have engaged musicians, music scholars, and computer scientists since the early days of computing. Music generation research has generally employed one of two strategies: knowledge-based methods that model style through explicitly formalized rules, and data mining methods that apply machine learning to induce statistical models of musical style. The five chapters in this book illustrate the range of tasks and design choices in current music generation research applying machine learning techniques and highlighting recurring research issues such as training data, music representation, candidate generation, and evaluation. The contributions focus on different aspects of modeling and

generating music, including melody, chord sequences, ornamentation, and dynamics. Models are induced from audio data or symbolic data. This book was originally published as a special issue of the Journal of Mathematics and Music.

The Lie Tree Frances Hardinge, 2016-04-19 Costa Book of the Year: This novel of science, magic, murder, and a determined Victorian-era teenager is a "heady concoction . . . absolutely unforgettable" (Kirkus Reviews, starred review). Faith Sunderly leads a double life. To most people, she is modest and well mannered—a proper young lady who knows her place. But inside, Faith is burning with questions and curiosity. She keeps sharp watch of her surroundings and, therefore, knows secrets no one suspects her of knowing—like the real reason her family fled to the close-knit island of Vane. And that her father's death was no accident. In pursuit of revenge and justice for the father she idolizes, Faith hunts through his possessions, where she discovers a strange tree. A tree that bears fruit only when she whispers a lie to it. The fruit, in turn, delivers a hidden truth. The tree might hold the key to her father's murder. Or, it might lure the murderer directly to Faith herself, for lies—like fires, wild and crackling—quickly take on a life of their own. "Frances Hardinge has joined the ranks of those writers of young-adult fiction, like Philip Pullman, whose approach to fantasy proves so compelling that they quickly develop an adult following, and The Lie Tree is a good demonstration of why this is so . . . [a] page-turner." —Locus "The time is nineteenth-century England just after Darwin's theory of evolution has thrown the scientific world into turmoil; the setting is the fictional island of Vane, between land and sea; the main character is a fourteen-year-old girl caught between society's expectations and her fierce desire to be a scientist. . . . A stunner." —The Horn Book (starred review) "A murder mystery that dazzles at every level, shimmering all the more brightly the deeper down into it you go." —Chicago Tribune "Haunting, and darkly funny . . . features complex, many-sided characters and a clear-eyed examination of the deep sexism of the period, which trapped even the most intelligent women in roles as restrictive as their corsets." —Publishers Weekly (starred review) "Hardinge, who can turn a phrase like no other, melds a haunting historical mystery with a sharp observation on the dangers of suppressing the thirst for knowledge." —School Library Journal (starred review)
