How to Travel the World on \$50 a Day Matt Kepnes,2015-01-06 \*UPDATED 2017 EDITION\* New York Times bestseller! No money? No problem. You can start packing your bags for that trip you've been dreaming a lifetime about. For more than half a decade, Matt Kepnes (aka Nomadic Matt) has been showing readers of his enormously popular travel blog that traveling isn't expensive and that it's affordable to all. He proves that as long as you think out of the box and travel like locals, your trip doesn't have to break your bank, nor do you need to give up luxury. How to Travel the World on \$50 a Day reveals Nomadic Matt's tips, tricks, and secrets to comfortable budget travel based on his experience traveling the world without giving up the sushi meals and comfortable beds he enjoys. Offering a blend of advice ranging from travel hacking to smart banking, you'll learn how to: \* Avoid paying bank fees anywhere in the world \* Earn thousands of free frequent flyer points \* Find discount travel cards that can save on hostels, tours, and transportation \* Get cheap (or free) plane tickets Whether it's a two-week, two-month, or two-year trip, Nomadic Matt shows you how to stretch your money further so you can travel cheaper, smarter, and longer.

**The Googlization of Everything** Siva Vaidhyanathan,2012-03-13 In the beginning, the World Wide Web was exciting and open to the point of anarchy, a vast and intimidating repository of unindexed confusion. Into this creative chaos came Google with its dazzling mission—To organize the world's information and make it universally accessible—and its much-quoted motto, Don't be evil. In this provocative book, Siva Vaidhyanathan examines the ways we have used and embraced Google—and the growing resistance to its expansion across the globe. He exposes the dark side of our Google fantasies, raising red flags about issues of intellectual property and the much-touted Google Book Search. He assesses Google's global impact, particularly in China, and explains the insidious effect of Googlization on the way we think. Finally, Vaidhyanathan proposes the construction of an Internet ecosystem designed to benefit the whole world and keep one brilliant and powerful company from falling into the evil it pledged to avoid.

*Internet and Surveillance* Christian Fuchs,Kees Boersma,Anders Albrechtslund,Marisol Sandoval,2013-06-17 The Internet has been transformed in the past years from a system primarily oriented on information provision into a medium for communication and community-building. The notion of "Web 2.0", social software, and social networking sites such as Facebook, Twitter and MySpace have emerged in this context. With such platforms comes the massive provision and storage of personal data that are systematically evaluated, marketed, and used for targeting users with advertising. In

a world of global economic competition, economic crisis, and fear of terrorism after 9/11, both corporations and state institutions have a growing interest in accessing this personal data. Here, contributors explore this changing landscape by addressing topics such as commercial data collection by advertising, consumer sites and interactive media; self-disclosure in the social web; surveillance of file-sharers; privacy in the age of the internet; civil watch-surveillance on social networking sites; and networked interactive surveillance in transnational space. This book is a result of a research action launched by the intergovernmental network COST (European Cooperation in Science and Technology).

*Taiwan* Steven Crook, 2019-06-05 This new edition of Bradt's Taiwan continues to offer some of the most comprehensive coverage available and has been fully updated to reflect all the most recent developments on the ground. Author and long-term resident of Taiwan Steven Crook has been to every corner of the main island and every one of the outlying archipelagos. He has written about Taiwan's cultural and scenic attractions for international newspapers and inflight magazines and he has a keen understanding of what international visitors are likely to enjoy and what they need help with to appreciate. This new edition includes an even greater emphasis on the Taiwanese favourite pastime of local food, as well as increased coverage of increasingly popular east Taiwan and expanded information about the National Palace Museum Southern Branch. Place names and other useful words and phrases (for ordering food and arranging transport) are presented in Chinese script for convenient communication. Detailed coverage of the capital city Taipei is complemented by a chapter-by-chapter breakdown of the rest of the country, from Hakka Country to Kaohsiung and Pingtung and the minor islands. More than 58% of Taiwan is covered by forest, making the country as interesting for its wildlife and outdoor activities as for its cities and towns. Taroko Gorge, Mount Jade, national parks, beaches and birdwatching, temples and monasteries, peaks and mountains are all covered, along with beguiling islands such as coral Little Liuqiu, saltwater hot springs, the East Rift Valley and popular Lukang. Taiwan is often described as 'more Chinese than China', but in reality it's a complex blend of 18th-century China, ancient Austronesia and 20th-century Japan, with dabs of post-war Americana and an abiding passion for anything that tastes good, wherever it comes from. Bradt's Taiwan is the perfect companion for discovering all of this, written by an expert who knows the country inside out and is well versed in delivering exactly what you need for a successful trip.

Facebook Nation Newton Lee, 2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness – a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that "Facebook is the most appalling spying machine that has ever been invented." Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houg.

Behavioral Science & Policy: Volume 7, Issue 2 Craig R. Fox, Sim B. Sitkin, 2022-03-29 The success of nearly all public- and private-sector policies hinges on the behavior of individuals, groups, and organizations. Today, such behaviors are better understood than ever, thanks to a growing body of practical behavioral science research. However, policymakers often are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies. The pages of this journal will become a meeting ground: a place where scientists and non-scientists can encounter clearly described behavioral research that can be put into action. By design, the scope of Behavioral Science & Policy is broad, with topics spanning health care, financial decisionmaking, energy and the environment, education and culture, justice and ethics, and work place practices. Contributions will be made by researchers with expertise in psychology, sociology, law, behavioral economics, organization science, decision science, and marketing. The journal is a key offering of the Behavioral Science & Policy Association in partnership with the Brookings Institution. The mission of BSPA is to foster dialog between social scientists, policymakers, and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest. BSPA does not advance a particular agenda or political perspective.

**Learning the Virtual Life** Peter Pericles Trifonas, 2012-04-23 Digital technologies have transformed cultural perceptions of learning and what it means to be literate, expanding the importance of experience alongside interpretation and reflection. Learning the Virtual Life offers ways to consider the local and global effects of digital media on educational environments, as well as the cultural transformations of how we now define learning and literacy. While some have welcomed the educational challenges of digital culture and emphasized its possibilities for individual emancipation and social transformation in the new information age, others accuse digital culture of absorbing its recipients in an all-pervasive virtual world. Unlike most accounts of the educational and cultural consequences of digital culture, Learning the Virtual Life presents a neutral, advanced introduction to the key issues involved with the integration of digital culture and education. This edited collection presents international perspectives on a wide range of issues, and each chapter combines upper-level theory with real-world practice, making this essential reading for all those interested in digital media and education.
