My Avatar, My Self Zach Waggoner, 2014-01-10 With videogames now one of the world's most popular diversions, the virtual world has increasing psychological influence on real-world players. This book examines the relationships between virtual and non-virtual identity in visual role-playing games.

Utilizing James Gee's theoretical constructs of real-world identity, virtual-world identity, and projective identity, this research shows dynamic, varying and complex relationships between the virtual avatar and the player's sense of self and makes recommendations of terminology for future identity researchers.

Intelligent Information Systems 2002 Mieczyslaw A. Klopotek, Slawomir Wierzchon, Maciej Michalewicz, 2013-11-11 This volume contains articles accepted for presentation during The Intelligent Information Systems Symposium IIS'2002 which was held in Sopot, Poland, on June 3-6, 2002. This is eleventh, in the order, symposium organized by the Institute of Computer Science of Polish Academy of Sciences and devoted to new trends in (broadly understood) Artificial Intelligence. The meetings started back to 1992. With small initial audience, workshops in the series grew to an important meeting of Polish and foreign scientists working at the universities in Europe, Asia and the Northern America. Over years, the workshops transformed into regular symposia devoted to latest trends in such fields like Machine Learning, Knowledge Discovery, Natural Language Processing, Knowledge Based

Systems and Reasoning, and Soft Computing (i.e. Fuzzy and Rough Sets, Bayesian Networks, Neural Networks and Evolutionary Algorithms). At present, about 50-60 papers are accepted each year. Besides, for several years now, the symposia are accompanied by a number of tutorials, given by the outstanding scientists in their domain. The main topics of this year symposium included: • decision trees and other classifier systems • neural network and biologically motivated systems • clustering methods • handling imprecision and uncertainty • deductive, distributed and agent-based systems We were pleased to see the continuation of the last year trend towards an increase in the number of co-operative contributions and in the number and diversity of practical applications of theoretical research.

Spiritual Teachings of the Avatar Jeffrey Armstrong, 2010-06-29 Is there a divine reason the word Avatar emerged at the forefront of popular culture? Discover the original Avatars and learn how their ancient wisdom can change the way you view the world. Spiritual Teachings of the Avatar speaks to anyone concerned with the sustainability of Mother Earth, the role of elders in our society, the seemingly unconsciousness of science and corporations, and the subtleties of unseen realities, resulting in spiritual growth, a deeper relationship with nature, and a better world for all. An avatar is a manifestation of the Supreme Being—usually in human form—that descends from the transcendental realm to Earth to heal the planet and restore peace and harmony by eliminating the harmful souls that prey on Mother Earth. In Spiritual Teachings of the Avatar, Vedic expert and teacher Jeffrey Armstrong explains the ancient Indian wisdoms embodied in the word “avatar,” and that behind the notion of avatar is a view that sees the sacredness of all life and the soul of all beings as eternal—meant for

freedom and made of divine essence.
