The Free Church in Victorian Canada, 1844-1861
Richard W. Vaudry, 2006-01-01 Drawing on a wide range of church records, pamphlets, private papers, and periodicals, Richard Vaudry has written an authoritative study of the formation and development of the Free Church in mid-Victorian Canada. He traces the institutional development of the denomination, its intellectual life, and its attitudes to contemporary political and social questions and describes, among other subjects, missionary activity, theological education, worship, and the denomination's union with the United Presbyterian Synod in 1861. This important work depicts a progressive church where men such as George Brown, Isaac Buchanan, and John Redpath could all find a home. The author argues that undergirding the life of the Free Church was an evangelical-Calvinist world view which determined the shape and direction of its activities. His book illuminates an important facet of the religious and intellectual relationship between Scotland and Canada, and should be of interest to students and scholars of Canadian and Church history.

The Climatization of Global Politics Stefan Aykut, Lucile Maertens, 2022-11-28 This volume

examines the process through which climate change is transforming global governance, as both an increasingly central issue on the international stage and an increasingly structured policy domain with its specific modes of governing, networks of actors, discourses, and knowledge practices. Collectively, the contributions aim to assess how and why climate change is becoming a dominant frame in international politics. In doing so, they also contribute to understanding the dynamics and drivers of climatization. As global warming progresses and efforts to mitigate and adapt intensify, living under a changing climate—or in a ‘new climate regime’ (Latour 2015)—increasingly appears as a central feature of ‘our’ new, and highly unequal, human condition in the Anthropocene. In other words, we firmly believe that climatization is here to stay. It is thus crucial to better understand this process, recognizing its problems and ambiguities, but also examining its transformative potential and identifying the conditions under which such potentials can be harnessed with a view to building a more effective and equitable climate politics. We think that the chapters in this book contribute to this endeavour.

Historic Crimes and Justice in Burlington, Vermont Jeffrey H. Beerworth, 2015 Burlington Police Department detective Jeff Beerworth explores the nature of crime and justice in the Queen City. As Burlington grew into a city out of wilderness, more citizens meant more opportunities for crime. Horse thefts, murders and drunken brawls swamped the young and prosperous city. Those misdeeds inspired the first officers of what would become the Burlington Police Department to serve and protect. Step behind the scenes of the Griwold murder case, the Mad Riot of 1898 and the murder of Officer James McGrath. Glimpse the dangers of police work and the shared human experiences of the city's officers and the citizens they serve.
