Towards a Digital Ecology Victoria Betton, 2022-02-27 *Towards a Digital Health Ecology* : NHS Digital Adoption through the COVID-19 Looking Glass is about technology adoption in the UK's National Health Service (NHS) as told from the inflection point of a disaster. In 2020 the world lived through a disaster of epic proportions, devastating humanity around the globe. It took a microscopic virus to wreak havoc on our healthcare system and force the adoption of technology in a way that had never been seen before. This book tells the story of digital technology take-up in the NHS through the lens of that disaster. This book documents use of technology in the NHS through the lens of the first pandemic shock. Our healthcare system, paid for by general taxation and free at the point of demand, was conceived and developed in a firmly analogue world. Created in 1948, the NHS predates the invention of the World Wide Web by some forty years. This is not a book simply about technology, it is a study of the painful process of reengineering a mammoth and byzantine system that was built for a different era. The digital health sector is a microcosm of the wider healthcare system, through which grand themes of social inequality, public trust, private versus commercial interests, values and beliefs are played out. The sector is a clash of competing discourses: the civic and doing good for society; the market and

wealth creation; the industrial creating more efficient and effective systems; the project expressed as innovation and experimentation; lastly the notion of vitality and leading a happier, healthy life. Each of these discourses exists in a state of flux and tension with the other. This book is offered as a critique of the role of digital technologies within healthcare. It is an examination of competing interests, approaches, and ideologies. It is a story of system complexity told through analysis and personal stories.

The Ultimate Website Promotion Handbook Chris Standring, 2006-12 Chris Standring is a highly successful British-born internet entrepreneur and musician who has been living in California for fifteen years. More than just another web design book, The Ultimate Website Promotion Handbook particularly concentrates on web optimisation and will help you gain high rankings in all the major search engines. This amazing book is suitable for both the web-designing fraternity and those with no computing skills whatsoever. If you are new to the Internet world, you might like to skip some of the technical detail in this handbook and focus more on the material relating to marketing and attracting visitors to your site. If, on the other hand, you are already familiar with the aesthetics side of web-design, you should read every word of this book to learn more about the business side and watch your or your clients' websites grow in popularity.

Politics of Rightful Killing Sima Shakhsari, 2020-01-17 In the early 2000s, mainstream international news outlets celebrated the growth of Weblogistan—the online and real-life transnational network of Iranian bloggers—and depicted it as a liberatory site that gave voice to Iranians. As Sima Shakhsari argues in *Politics of Rightful Killing*, the common assumptions of Weblogistan as a site of civil society consensus and resistance to state oppression belie its deep internal conflicts. While Weblogistan was an effective venue for some Iranians to “practice democracy,” it served as a valuable site for the United States to surveil bloggers and express anti-Iranian sentiment and policies. At the same time, bloggers used the network to self-police and enforce gender and sexuality norms based on Western liberal values in ways that unwittingly undermined Weblogistan's claims of democratic participation. In this way, Weblogistan became a site of cybergovernmentality, where biopolitical security regimes disciplined and regulated populations. Analyzing online and off-line ethnography, Shakhsari provides an account of digital citizenship that raises questions about the internet's relationship to political engagement, militarism, and democracy.

Prevent Strategy David Lowe, Robin Bennett, 2021-01-31 Prevent Strategy is a collection of work from practitioners – youth workers and the police – and academics researching Prevent. This book examines overcoming the stigma attached to Prevent being implicitly racist, problems related to the section 26 duty, training staff on Prevent, creating safe spaces to have open discussions, problems regarding extremists' online activity, and the law surrounding freedom of expression. Since its introduction, the UK's Prevent strategy has been surrounded with controversy ranging from making the Muslim community a dangerous 'suspect community' to being another layer of police surveillance on individuals who have not been arrested or convicted of a crime. Despite amendments to the strategy – which now covers all forms of

extremism – and adopting a multi-agency approach, these suspicions remain, exacerbated by the section 26 Counter-Terrorism and Security Act 2015 duty on specified authorities to prevent vulnerable people being drawn towards terrorism. This book's findings on the Prevent strategy will be an invaluable tool for staff in education, the health service, and the criminal justice agencies who carry out the section 26 duty. It will also appeal to academics and students studying the area of terrorism and security.

The Routledge Companion to Social Media and Politics Axel Bruns, Gunn Enli, Eli Skogerbo, Anders Olof Larsson, Christian Christensen, 2015-12-22 Social media are now widely used for political protests, campaigns, and communication in developed and developing nations, but available research has not yet paid sufficient attention to experiences beyond the US and UK. This

collection tackles this imbalance head-on, compiling cutting-edge research across six continents to provide a comprehensive, global, up-to-date review of recent political uses of social media. Drawing together empirical analyses of the use of social media by political movements and in national and regional elections and referenda, *The Routledge Companion to Social Media and Politics* presents studies ranging from Anonymous and the Arab Spring to the Greek Aganaktismenoi, and from South Korean presidential elections to the Scottish independence referendum. The book is framed by a selection of keystone theoretical contributions, evaluating and updating existing frameworks for the social media age.

The Secret Power of Blogging Bruce C. Brown, 2008 Blog is short for Weblog. A Weblog is a journal (or type of newsletter) that is updated often and intended for the general public. Blogs generally represent the personality of the author or the website owner. In a recent study by the Pew Internet; American Life Project estimated that the U.S. blog population has grown to about 12 million Americans, some 8% of U.S. Internet users. The number of U.S. blog readers was estimated at 57 million (39% of the U.S. online population). If you have a product, service, brand, or cause that you want to market inexpensively online to the world, you need to look into starting a blog. It is an ideal marketing vehicle. You can use it to share your expertise, grow market share, spread your message, and establish yourself as

an expert in your field for virtually no cost. A blog helps your site to rank higher in the search engines because Google and other search engines provide references to blogs and their content. Tiny one-person part-time businesses and mega companies like Microsoft, Apple, Nike, General Motors, Amazon.com, and Yahoo! use blogs as well. Most Fortune 1000 firms are using responsible blog marketing as well as advertising on blogs for one simple reason: it works! It generates profits immediately and consistently! In addition, many blogs earn additional revenue by selling advertising space on their niche-targeted blog. Atlantic Publishing is a small, independent publishing company based in Ocala, Florida. Creating Cyber Libraries Kathleen W. Craver, 2002-05-30 As prices of traditional library materials increase, and space to house them shrinks, savvy school library media specialists are creating cyber libraries, or school libraries on the Internet. These libraries offer students and their

parents 24-hour access and are invaluable for providing up-to-date information in a way traditional materials cannot. This guide outlines the steps library media specialists can take to create a cyber library, provide content and policies for use, and maintain it for maximum efficiency. Craver justifies the need for cyber libraries in the 21st century, and how they can help librarians to meet the standards in Information Power (1998). She explains the different types of cyber libraries available, along with their advantages and disadvantages. She discusses how to construct them using portals or by acquiring fee-based cyber libraries, and what policies should be in place to protect both the school and its students. Also included are instructions for establishing remote access to subscription databases, creating cyber reading rooms, and providing instructional services to student users. Once a cyber library is created, it must be maintained and evaluated to keep it useful and current, and this book provides guidelines to do so. Finally, there is a chapter on promoting the cyber library, so the school community is aware of its features and participates in its growth process. No school library should be without this volume!
