Photographer's Guide to the Sony DSC-RX100 III Alexander S. White,2014-08-19 This book is a complete guide to using the Sony DSC-RX100 III camera, one of the most advanced, but still pocketable, cameras available. With the publication of this book, author Alexander White provides users of the RX100 III with a manual covering all aspects of the camera. Using a tutorial-like approach, the book shows beginning and intermediate photographers how to accomplish things with the RX100 III, and explains when and why to use the camera's features. The book provides details about the camera's numerous shooting modes as well as its menu options for shooting, playback, setup, and special effects. The book covers all of the new features of the RX100 III, including its unique pop-up electronic viewfinder, tilting LCD screen, built-in neutral density filter, and enhanced capabilities for camera control and image transfer over a wireless network. The book includes more than 400 color photographs that illustrate the camera's controls, display screens, and menus. The images also provide examples of the photographs that can be taken using the RX100 III's Scene shooting mode, with settings optimized for subjects such as landscapes, sunsets, portraits, and action shots; the Creative Style and Picture Effect menu options, with a variety of settings for altering the appearance of images; and the camera's features for continuous shooting and shooting in dim lighting. In addition, the book provides introductions to more advanced topics such as infrared photography, astrophotography, and digiscoping. The book includes a full discussion of the video recording abilities of the RX100 III, which can shoot high-definition (HD) video with stereo sound, and which offers manual control of exposure and focus during movie recording as well as an upgraded video format, XAVC S. In three appendices, the book provides information about accessories for the RX100 III, including cases, external flash units, and filter adapters, and includes a list of websites and other resources for further information. The book includes an appendix with "quick tips" on how to take advantage of the camera's features in the most efficient ways possible.

County Antrim and Belfast; genealogy and family history notes Michael C. O'Laughlin ,2003 This book is written to help find the roots of any family in the county. A hands on guide to find your family in county Antrim and in Belfast. New; Full size 8 1/2 x 11; 50 pages; illustrations, some of which may appear faded with age as in the originals; County Map; Local Sources; Coats of Arms; and record extracts. Many families are given with family history notes, specific locations; coat of arms; and seats of power. Some are only mentioned. A must for any researcher. (For a large collection of family histories within the county we also recommend The Book of Irish Families, great & small, by O'Laughlin.)

Parallel Problem Solving from Nature - PPSN VII Juan Julián Merelo Guervós,Juan J. Merelo,Panagiotis Adamidis,Hans-Georg Beyer,2002-08-26 This book constitutes the refereed proceedings of the 7th International Conference on Parallel Problem Solving from Nature,PPSN 2002, held in Granada, Spain in September 2002. The 90 revised full papers presented were carefully reviewed and selected from 181 submissions. The papers are organized in topical sections on evolutionary algorithms theory, representation and codification, variation operators, evolutionary techniques and coevolution, multiobjective optimization, new techniques for evolutionary algorithms, hybrid algorithms, learning classifier systems, implementation of evolutionary algorithms, applications, and cellular automata and ant colony optimization.

Parallel Problem Solving from Nature - PPSN VII Juan J. Merelo,Panagiotis Adamidis,Hans-Georg Beyer,2003-06-30 We are proud to introduce the proceedings of the Seventh International Conference on Parallel Problem Solving from Nature, PPSN VII, held in Granada, Spain, on 7–11 September 2002. PPSN VII was organized back-to-back with the Foundations of Genetic Algorithms (FOGA) conference, which took place in Torremolinos, Malaga, Spain, in the preceding week. ThePPSNseriesofconferencesstartedinDortmund,Germany[1].Fromthat pioneering meeting, the event has been held biennially, in Brussels, Belgium [2], Jerusalem, Israel [3], Berlin, Germany [4], Amsterdam, The Netherlands [5], and Paris, France [6]. During the Paris conference, several bids to host PPSN 2002 were put forward; it was decided that the conference would be held in Granada with Juan J. Merelo Guervós as General Chairman. The scientific content of the PPSN conference focuses on problem-solving paradigms gleaned from natural models, with an obvious emphasis on those that display an innate parallelism, such as evolutionary algorithms and ant-colony optimization algorithms. The majority of the papers, however, concentrate on evolutionary and hybrid algorithms, as is shown in the contents of this book and its predecessors. This edition of the conference proceedings has a large section on applications, be they to classical problems or to real-world engineering problems, which shows how bioinspired algorithms are extending their use in the realms of business and enterprise.
