Reproducibility and Replicability in Science

National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Committee on Science, Engineering, Medicine, and Public Policy, Board on Research Data and Information, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Board on Mathematical Sciences and Analytics, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on Reproducibility and Replicability in Science, 2019-10-20

One of the pathways by which the scientific community confirms the validity of a new scientific discovery is by repeating the research that produced it. When a scientific effort fails to independently confirm the computations or results of a previous study, some fear that it may be a symptom of a lack of rigor in science, while others argue that such an observed inconsistency can be an important precursor to new discovery. Concerns about reproducibility and replicability have been expressed in both scientific and popular media. As these concerns came to light, Congress requested that the National Academies of Sciences, Engineering, and Medicine conduct a study to assess the extent of issues related to reproducibility and replicability and to offer recommendations for improving rigor and transparency in scientific research.

Reproducibility and Replicability in Science defines reproducibility and replicability and examines the factors that may lead to non-reproducibility and non-replicability in research. Unlike the typical expectation of reproducibility between two computations, expectations about

replicability are more nuanced, and in some cases a lack of replicability can aid the process of scientific discovery. This report provides recommendations to researchers, academic institutions, journals, and funders on steps they can take to improve reproducibility and replicability in science.

Tiamat's Wrath James S. A. Corey, 2019-03-26 The eighth book in the NYT bestselling Expanse series, Tiamat's Wrath finds the crew of the Rocinante fighting an underground war against a nearly invulnerable authoritarian empire, with James Holden a prisoner of the enemy. Now a Prime Original series. HUGO AWARD WINNER FOR BEST SERIES Thirteen hundred gates have opened to solar systems around the galaxy. But as humanity builds its interstellar empire in the alien ruins, the mysteries and threats grow deeper. In the dead systems where gates lead to stranger things than alien planets, Elvi Okoye begins a desperate search to discover the nature of a genocide that happened before the first human beings existed, and to find weapons to fight a war against forces at the edge of the imaginable. But the price of that knowledge may be higher than she can pay. At the heart of the empire, Teresa Duarte prepares to take on the burden of her father's godlike ambition. The sociopathic scientist Paolo Cordozar and the Mephistophelian prisoner James Holden are only two of the dangers in a palace thick with intrigue, but Teresa has a mind of her own and secrets even her father the emperor doesn't guess. And throughout the wide human empire, the scattered crew of the Rocinante fights a brave rear-guard action against Duarte's authoritarian regime. Memory of the old order falls away, and a future under Laconia's eternal rule -- and with it, a battle that humanity can only lose -- seems

more and more certain. Because against the terrors that lie between worlds, courage and ambition will not be enough. . . The Economic and Fiscal Consequences of Immigration National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on the Economic and Fiscal Consequences of Immigration, 2017-07-13 The Economic and Fiscal Consequences of Immigration finds that the long-term impact of immigration on the wages and employment of native-born workers overall is very small, and that any negative impacts are most likely to be found for prior immigrants or native-born high school dropouts. First-generation immigrants are more costly to governments than are the native-born, but the second generation are among the strongest fiscal and economic contributors in the U.S. This report concludes that immigration has an overall positive impact on long-run economic growth in the U.S. More than 40 million people living in the United States were born in other countries, and almost an equal number have at least one foreign-born parent. Together, the first generation (foreign-born) and second generation (children of the foreign-born) comprise almost one in four Americans. It comes as little surprise, then, that many U.S. residents view immigration as a major policy issue facing the nation. Not only does immigration affect the environment in which everyone lives, learns, and works, but it also interacts with nearly every policy area of concern, from jobs and the economy, education, and

health care, to federal, state, and local government budgets. The changing patterns of immigration and the evolving consequences for American society, institutions, and the economy continue to fuel public policy debate that plays out at the national, state, and local levels. The Economic and Fiscal Consequences of Immigration assesses the impact of dynamic immigration processes on economic and fiscal outcomes for the United States, a major destination of world population movements. This report will be a fundamental resource for policy makers and law makers at the federal, state, and local levels but extends to the general public, nongovernmental organizations, the business community, educational institutions, and the research community.

The Weight of an Infinite Sky Carrie La Seur, 2018-01-16 The critically acclaimed author of *The Home Place* explores the heart and mystery of Big Sky Country in this evocative and atmospheric novel of family, home, love, and responsibility inspired by William Shakespeare's *Hamlet* The Fry family has lived in Montana for decades, giving its life, generation after generation, to the family cattle ranch and unforgiving Montana soil. But Anthony, the only son in the new generation, longs for the excitement and sophistication of city life. Tired of the expectation that he will take over the family business, he flees to New York, hoping to make a career in the theater. But New York isn't the dream Anthony thought it would be, and between his struggles in the city and the unexpected death of his father, he suddenly finds himself back in the place to which he'd sworn never to return. The last few years have transformed the artistic dreamer, but they've changed his home as well. His uncle Neal, always the black sheep of the Fry family, has become alarmingly close with Anthony's mother, and a predatory mining company covets the Fry land.

Anthony has always wanted out of Montana, away from his father's suffocating expectations. Yet now that he may be freed from the burden of family legacy, he's forced to ask himself what he truly finds important and answer to the Montana soil one more time. In this unforgettable novel, Carrie La Seur once again captures the breathtaking beauty of the West and its people as she explores the power of family and the meaning of legacy—the burdens we inherit and those we place upon ourselves.

Food Insecurity and Hunger in the United States National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel to Review the U.S Department of Agriculture's Measurement of Food Insecurity and Hunger, 2006-06-02 The United States is viewed by the world as a country with plenty of food, yet not all households in America are food secure, meaning access at all times to enough food for an active, healthy life. A proportion of the population experiences food insecurity at some time in a given year because of food deprivation and lack of access to food due to economic

resource constraints. Still, food insecurity in the United States is not of the same intensity as in some developing countries. Since 1995 the U.S. Department of Agriculture (USDA) has annually published statistics on the extent of food insecurity and food insecurity with hunger in U.S. households. These estimates are based on a survey measure developed by the U.S. Food Security Measurement Project, an ongoing collaboration among federal agencies, academic researchers, and private organizations. USDA requested the Committee on National Statistics of the National Academies to convene a panel of experts to undertake a two-year study in two phases to review at this 10-year mark the concepts and methodology for measuring food insecurity and hunger and the uses of the measure. In Phase 2 of the study the panel was to consider in more depth the issues raised in Phase 1 relating to the concepts and methods used to measure food security and make recommendations as appropriate. The Committee on National Statistics appointed a panel of 10 experts to examine the above issues. In order to provide timely guidance to USDA, the panel issued an interim Phase 1 report, *Measuring Food Insecurity and Hunger: Phase 1 Report*. That report presented the panel's preliminary assessments of the food security concepts and definitions; the appropriateness of identifying hunger as a severe range of food insecurity in such a survey-based measurement method; questions for measuring these concepts; and the appropriateness of a household survey for regularly monitoring food security in the U.S. population. It provided interim guidance for the continued production of the food security estimates. This final report primarily focuses on the Phase 2 charge. The major findings and conclusions based on the panel's review and deliberations are summarized.

New Zealand Infantryman vs German Motorcycle

Soldier David Greentree, 2017-02-23 In April 1941, as Churchill strove to counter the German threat to the Balkans, New Zealand troops were hastily committed to combat in the wake of the German invasion of Greece where they would face off against the German Kradschützen - motorcycle troops. Examining three major encounters in detail with the help of maps and contemporary photographs, this lively study shows how the New Zealanders used all their courage and ingenuity to counter the mobile and well-trained motorcycle forces opposing them in the mountains and plains of Greece and Crete. Featuring specially commissioned artwork and drawing upon first-hand accounts, this exciting account pits New Zealand's infantrymen against Germany's motorcycle troops at the height of World War II in the Mediterranean theatre, assessing the origins, doctrine and combat performance of both sides.

A Wrinkle in Time Madeleine L'Engle, 2010-04-01 NEWBERY MEDAL WINNER • TIME MAGAZINE'S 100 BEST FANTASY BOOKS OF ALL TIME • NOW A MAJOR MOTION PICTURE FROM DISNEY Read the ground-breaking science fiction and fantasy classic that has delighted children for over 60 years! A Wrinkle in Time is one of my favorite books of all time. I've read it so often, I know it by heart. —Meg Cabot Late one night, three otherworldly creatures appear and sweep Meg Murry, her brother Charles Wallace, and their friend Calvin O'Keefe away on a mission to save Mr. Murray, who has gone missing

while doing top-secret work for the government. They travel via tesseract--a wrinkle that transports one across space and time--to the planet Camazotz, where Mr. Murray is being held captive. There they discover a dark force that threatens not only Mr. Murray but the safety of the whole universe. *A Wrinkle in Time* is the first book in Madeleine L'Engle's Time Quintet.

Look Alive Twenty-Five Janet

Evanovich, 2018-11-13 Stephanie Plum faces the toughest puzzle of her career in the twenty-fifth entry in Janet Evanovich's #1 New York Times-bestselling series. There's nothing like a good deli, and the Red River Deli in Trenton is one of the best. World-famous for its pastrami, cole slaw, and for its disappearing managers. Over the last month, three have vanished from the face of the earth, and the only clue in each case is one shoe that's been left behind. The police are baffled. Lula is convinced that it's a case of alien abduction. Whatever it is, they'd better figure out what's going on before they lose their new manager, Ms. Stephanie Plum.

How Not to Die Michael Greger, M.D., FACLM, Gene Stone, 2015-12-08 From the physician behind the wildly popular NutritionFacts website, *How Not to Die* reveals the groundbreaking scientific evidence behind the only diet that can prevent and reverse many of the causes of disease-related death. The vast majority of premature deaths can be prevented through simple changes in diet and lifestyle. In *How Not to Die*, Dr. Michael Greger, the internationally-renowned nutrition expert, physician, and founder of NutritionFacts.org, examines the fifteen top causes of premature death in America--heart disease, various cancers, diabetes, Parkinson's, high blood pressure, and more--and explains how nutritional and lifestyle interventions can sometimes trump prescription pills and other pharmaceutical and surgical

approaches, freeing us to live healthier lives. The simple truth is that most doctors are good at treating acute illnesses but bad at preventing chronic disease. The fifteen leading causes of death claim the lives of 1.6 million Americans annually. This doesn't have to be the case. By following Dr. Greger's advice, all of it backed up by strong scientific evidence, you will learn which foods to eat and which lifestyle changes to make to live longer. History of prostate cancer in your family? Put down that glass of milk and add flaxseed to your diet whenever you can. Have high blood pressure? Hibiscus tea can work better than a leading hypertensive drug-and without the side effects. Fighting off liver disease? Drinking coffee can reduce liver inflammation. Battling breast cancer? Consuming soy is associated with prolonged survival. Worried about heart disease (the number 1 killer in the United States)? Switch to a whole-food, plant-based diet, which has been repeatedly shown not just to prevent the disease but often stop it in its tracks. In addition to showing what to eat to help treat the top fifteen causes of death, *How Not to Die* includes Dr. Greger's Daily Dozen -a checklist of the twelve foods we should consume every day. Full of practical, actionable advice and surprising, cutting edge nutritional science, these doctor's orders are just what we need to live longer, healthier lives.

The Voice of Destruction Hermann Rauschnig, 1940
Designing Successful Transitions National Resource Center for the First-Year Experience & Students in Transition (University of South Carolina), 2010 The 2010 edition of this monograph addresses many topics (e.g., administration of orientation programs, family involvement, student characteristics and needs, assessment, and orientation for specific student populations and institutional types) that were included in previous editions but approaches them with new information, updated data, and current theory. However, this edition also takes up new topics in response to the opportunities and concerns facing orientation, transition, and retention professionals such as collaborations among campus units in the development and delivery of orientation, the increase in nontraditional student populations, the need for effective crisis planning and management in orientation programs, new technologies, and even the challenge of making the case for orientation in an era of diminishing resources. The authors have carefully penned chapters incorporating contemporary information, ideas, and concepts while being reflective of

traditional practices. Following a preface by Margaret J. Barr and a foreword by Jennifer R. Keup and Craig E. Mack, chapters in this edition include: (1) Brief Overview of the Orientation, Transition, and Retention Field (Craig E. Mack); (2) Theoretical Perspectives on Orientation (Denise L. Rode and Tony W. Cawthon); (3) Making the Case for Orientation: Is It Worth It? (Bonita C. Jacobs); (4) Administration of a Comprehensive Orientation Program (April Mann, Charlie Andrews, and Norma Rodenburg); (5) Community College Orientation and Transition Programs (Cathy J. Cuevas and Christine Timmerman); (6) Channeling Parental Involvement to Support Student Success (Jeanine A. Ward-Roof, Laura A. Page, and Ryan Lombardi); (7) Extensions of Traditional Orientation Programs (Tracy L. Skipper, Jennifer A. Latino, Blaire Moody Rideout, and Dorothy Weigel); (8) Technology in Orientation (J.J. Brown and Cynthia L. Hernandez); (9) Incorporating Crisis Planning and Management Into Orientation Programs (Dian Squire, Victor Wilson, Joe Ritchie, and Abbey Wolfman); (10) Orientation and First-Year Programs: A Profile of Participating Students (Maureen E. Wilson and Michael Dannells); (11) Creating a Developmental Framework for New Student Orientation to Address the Needs of Diverse Populations (Archie P. Cubarrubia and Jennifer C. Schoen); (12) Designing Orientation and Transition Programs for Transfer Students (Shandol C. Hoover); (13) Nontraditional Is the New Traditional: Understanding Today's College Student (Michael J. Knox and Brittany D. Henderson); (14) Building the Case for Collaboration in Orientation Programs: Campus Culture, Politics, and Power (Beth M. Lingren Clark and Matthew J. Weigand); (15) Assessment and Evaluation in Orientation (Robert Schwartz and Dennis Wiese); and (16) Reflections on the History of Orientation, Transition, and Retention Programs (Jeanine A.

Ward-Roof and Kathy L. Guthrie). (Individual chapters contain references.) [For the 2nd Edition (2003), see ED478603.].

The Good Life Beyond Growth Hartmut

Rosa, Christoph Henning, 2017-08-15 Many countries have experienced a decline of economic growth for decades, an effect that was only aggravated by the recent global financial crisis. What if in the 21st century this is no longer an exception, but the general rule? Does an economy without growth necessarily bring hardship and crises, as is often assumed? Or could it be a chance for a better

life? Authors have long argued that money added to an income that already secures basic needs no longer enhances well-being. Also, ecological constraints and a sinking global absorption capacity increasingly reduce the margin of profitability on investments. Efforts to restore growth politically, however, often lead to reduced levels of social protection, reduced ecological and health standards, unfair tax burdens and rising inequalities. Thus it is time to dissolve the link between economic growth and the good life. This book argues that a good life beyond growth is not only possible, but highly desirable. It conceptualizes the good life as a fulfilled life that is embedded in social relations and at peace with nature, independent of a mounting availability of resources. In bringing together experts from different fields, this book opens an interdisciplinary discussion that has often been restricted to separate disciplines. Philosophers, sociologists, economists and activists come together to discuss the political and social conditions of a good life in societies which no longer rely on economic growth and no longer call for an ever expanding circle of extraction, consumption, pollution, waste, conflict, and psychological burnout. Read together, these essays will have a major impact on the debates about economic growth, economic and ecological justice, and the good life in times of crisis.
