Technologies for E-Learning and Digital Entertainment Zhigeng Pan,Xiaopeng Zhang,Abdenmour El Rhalibi,Woontack Woo,Yi Li,2008-06-19 With the widespread interest in digital entertainment and the advances in the technologies of computer graphics, multimedia and virtual reality technologies, a new area--"Edutainment"--has been accepted as a union of education and computer entertainment. Edutainment is recognized as an effective way of learning through a medium, such as a computer, software, games or VR applications, that both educates and entertains. The Edutainment conference series was established and followed as a special event for the new interests in e-learning and digital entertainment. The main purpose of Edutainment

conferences is the discussion, presentation, and information exchange of scientific and technological developments in the new community. The Edutainment conference series is a very interesting opportunity for researchers, engineers and graduate students who wish to communicate at these international annual events. The conference series includes plenary invited talks, workshops, tutorials, paper presentation tracks and panel discussions. The Edutainment conference series was initiated in Hangzhou, China in 2006. Following the success of the first event (Edutainment 2006 in Hangzhou, China) and the second one (Edutainment 2007 in Hong Kong, China), Edutainment 2008 was held June 25-27, 2007 in Nanjing, China. This year, we received 219 submissions from 26 different countries and regions, including United Arab Emirates, Canada, Thailand, New Zealand, Austria, Turkey, Germany, Switzerland, Brazil, Cuba, Australia, Hong Kong (China), Pakistan, Mexico, Czech Republic, USA, Malaysia, Italy, Spain, France, UK, The Netherlands, Taiwan (China), Japan, South Korea, and China.

The Routledge Handbook of English Language and Digital Humanities Svenja Adolphs, Dawn Knight, 2020-04-16 The Routledge Handbook of English Language and Digital Humanities serves as a reference point for key developments related to the ways in which the digital turn has shaped the study of the English language and of how the resulting methodological approaches have permeated other disciplines. It draws on modern linguistics and discourse analysis for its analytical methods and applies these approaches to the exploration and theorisation of issues within the humanities. Divided into three sections, this handbook covers: sources and corpora; analytical approaches; English language at the interface with other areas of research in the digital humanities. In covering these areas, more traditional approaches and methodologies in the humanities are recast and research challenges are re-framed through the lens of the digital. The essays in this volume highlight the opportunities for new questions to be asked and long-standing questions to be reconsidered when drawing on the digital in humanities research. This is a ground-breaking collection of essays offering incisive and essential reading for anyone with an interest in the English language and digital humanities.

Secular Chains Philip Connell, 2016-04-07 *Secular Chains* offers an original and richly contextualized account of the relationship between poetry and religious controversy between 1649 and 1745. This was a period of political conflict and intellectual upheaval, in which traditional sources of spiritual authority were variously challenged and transformed. This study reveals the importance of English literary culture for our understanding of this process, and throws new light on the dynamics of change and continuity between the puritan revolution and the early Enlightenment. Based on extensive research in both printed and manuscript sources, the book combines detailed case studies of major literary figures with a sustained historical narrative linking the republican moment of the 1650s, the conflicts and crises of the Restoration, and the ecclesiastical politics of the early eighteenth century. Milton and Dryden provide the principal focus of the first three chapters, which explore the divisive issue of church settlement in the work of both writers, together with the increasingly prominent rhetoric of anti-clericalism and irreligion in the poetry and polemics of the later seventeenth century. Subsequent chapters extend the book's argument to the embattled condition of the Church of England in the decades after 1688, and the significant contribution of contemporary literary culture to a range of

religious and philosophical argument, from heterodox free-thinking to Newtonian natural theology. *Secular Chains* demonstrates the close and continued relationship between poetry and religious politics in the age of Milton and Pope, and provides a new framework for understanding this complex and turbulent period in English literary history.

Motor City Movie Culture, 1916-1925 Richard Abel, 2020-01-21 Motor City Movie Culture, 1916-1925 is a broad textured look at Hollywood coming of age in a city with a burgeoning population and complex demographics. Richard Abel investigates the role of local Detroit organizations in producing, distributing, exhibiting, and publicizing films in an effort to make moviegoing part of everyday life. Tapping a wealth of primary source material—from newspapers, spatiotemporal maps, and city directories to rare trade journals, theater programs, and local newsreels—Abel shows how entrepreneurs worked to lure moviegoers from Detroit's diverse ethnic neighborhoods into the theaters. Covering topics such as distribution, programming practices, nonfiction film, and movie coverage in local newspapers, with entr'actes that dive deeper into the roles of key individuals and organizations, this book examines how efforts in regional metropolitan cities like Detroit worked alongside California studios and New York head offices to bolster a mass culture of moviegoing in the United States.
