Threads and Traces Carlo Ginzburg,2012-09-02 This book is a translation of historian Carlo Ginzburg’s latest collection of essays. Through the detective work of uncovering a wide variety of stories or microhistories from fragments, Ginzburg takes on the bigger questions: How do we draw the line between truth and fiction? What is the relationship between history and memory? Stories range from medieval Europe, the inquisitional trial of a witch, seventeenth-century antiquarianism, and twentieth-century historians--Provided by publisher.

Breakcore Andrew Whelan,2009-05-27 Peer-to-peer music exchange, sampling, and digital distribution have garnered much attention in recent years, notably in debates about authorship, intellectual property, media control, and ‘Web 2’. However, empirical scholarship on how these technologies are used creatively by musicians and fans is still sparse. In this interdisciplinary ethnography of ‘bedroom producer’ culture, Andrew Whelan examines interaction and exchange within a specific online milieu: peer-to-peer chatrooms dedicated to electronic music, focusing on a genre known as ‘breakcore’. The author draws on semantic anthropology, ethnomethodology, sociolinguistics, and critical musicology to explore the activity afforded by this controversial and criminalised environment. Through in-depth analysis of often ritually vituperative text-based interaction, discussions of music, and the samples used in that music, Whelan describes the cultural politics and aesthetics of bedroom producer identity, highlighting the roles gender and ethnicity play in the constitution of subcultural authenticity. Empirically driven throughout, this book also engages with a spectrum of social theory; in doing so, it highlights the intersections between gender, interaction, technology and music. This book will prove valuable for students and scholars with interests in gender and language use, computer-mediated communication, online subcultures and virtual community, and the evolution, production and distribution of electronic music.

Noise, Water, Meat Douglas Kahn,2001-08-24 An examination of the role of sound in twentieth-century arts. This interdisciplinary history and theory of sound in the arts reads the twentieth century by listening to it—to the emphatic and exceptional sounds of modernism and those on the cusp of postmodernism, recorded sound, noise, silence, the fluid sounds of immersion and dripping, and the meat voices of viruses, screams, and bestial cries. Focusing on Europe in the first half of the century and the United States in the postwar years, Douglas Kahn explores aural activities in literature, music, visual arts, theater, and film. Placing aurality at the center of the history of the arts, he revisits key artistic questions, listening to the sounds that drown out the politics and poetics that generated them. Artists discussed include Antonin Artaud, George Brecht, William Burroughs, John Cage, Sergei Eisenstein, Fluxus, Allan Kaprow, Michael McClure, Yoko Ono, Jackson Pollock, Luigi Russolo, and Dziga Vertov.

Thoughtrave: An Interdimensional Conversation with Lady Gaga Lady Gaga, Robert Craig Baum, 2016 Thoughtrave is the immediate and most detailed archive of Lady Gaga's emotional, intellectual, philosophical, and spiritual evolution, a reclaiming of her art (and humanity) from within the center of her celebrity during one of the most difficult transitions of her career: Summer 2013–Fall 2014. Lady Gaga: I don't like being used to make money. I feel sad when I am overworked and that I just become a money making machine and that my passion and my creativity take a backseat. That makes me unhappy. So, what did I do? I started to say no. Not doing that. I don't want to do that. I'm not taking that picture. Not going to that event. Not standing by that because that's not what I stand for. Thoughtrave marks perhaps the most important (and unconditional, unpublished, unencumbered) insights into the music industry, the personal battles that accompanied her transition from Stefani to Gaga. It's one of those rare moments in life when you ask a question of someone you've admired for many years and receive the most honest of answers leading both people into a relationship that was and remains one of the most important of my life, says Baum, a professor, producer, composer, writer, editor, and activist for adjunct professors. As Baum explains to Stefani in one of the many interviews published here for the first time, Robert Craig Baum: It's uncanny for me to look back at 2008–2011 – when I was intensely meditating on the problem Why is there any being at all? – to find evidence of your intervention here with me...to find you, back then...before I knew you. It was almost as if I was playing the Bruce Willis character in Twelve Monkeys, overshooting my mark in time/space, aiming for this particular conversation but speaking through Ereignis (life gives) to a moment I (and many others) call headphones on. As George Elerick writes in his Introduction to the book, In Hand-to-Hand Battle for the Users, The book you hold in your hands easily falls into the category of a transgression. It's as though we are breaking into somewhere we are not meant to be (like a rave) and are invited into the mind of one of today's musical geniuses. Maybe we can even equivocate the experience to that of being a member of the paparazzi. Their whole mode of employment is based on breaking social codes and entering into the lives of everyday-people-turned-rock-stars. That's what this book is, a disruptive invitation to break into the life and mind of Lady Gaga, the person, not just the persona.

Augustan and Julio-Claudian Athens Geoffrey C. R. Schmalz, 2009 While there is now renewed interest in the history of Athens under the Roman empire, the Augustan and Julio-Claudian periods remain relatively neglected in terms of extended study. Thus the only comprehensive historical works on the period and its epigraphy remain those of Paul Graindor, which were published before the discovery of the Athenian Agora and its epigraphical wealth. This study aims to help provide a basis for new research on early Roman Athens, in the form of an epigraphical and historical reference work, in two parts. The Epigraphical Catalogue (Part I) represents both a companion and supplement to the Attic corpus of the Inscriptiones Graecae (Minor Editio) as it pertains to the Augustan and Julio-Claudian period. The Prosopographical Catalogue (Part II) offers an updated prosopography of the period as it relates to the material of the Epigraphical Catalogue. An appendix provides a chronological list of the period's major office-holders, liturgists, and priesthoods.

Fundamentals of Dermatology T. Nasemann, W. Sauerbrey, W.H.C. Burgdorf, 2012-12-06 Why another dermatology text? In 1973, when Drs. Nasemann and Sauerbrey wrote the introduction to the first edition of Haut krankheiten und venerische Infektionen. they addressed this question. They promised their book would be concise and profusely illustrated to best teach the fundamentals of dermatology. The German text, now in its fourth edition, has been widely successful. In undertaking an American revised translation of their work, it was my hope to meet a need in the English-language literature similar to that met by the German text. I believe that both students and non dermatologic physicians will find this volume a useful introduction to the art and science of treating skin disorders. The practice of dermatology differs from country to country. This text is therefore not simply a translation, but an adaptation that incorporates much new material. In the pages that follow, I have built on the successful framework of the German text, incorporating its excellent photographs and other teaching aids. Discussion of therapy has been extensively revised to reflect current practice in the United States. Original chapters on male infertility and proctology (two dermatologic domains in Germany) are not included in this book. They have been replaced by wholly new chapters on cutaneous surgery and tropical dermatology. We are grateful to Ronald G. Wheeland, M.D., for contributing the surgical chapter.

Open-Source Electronics Platforms Trung Dung Ngo, 2019-05-20 Open-source electronics are becoming very popular, and are integrated with our daily educational and developmental activities. At present, the use open-source electronics for teaching science, technology, engineering, and mathematics (STEM) has become a global trend. Off-the-shelf embedded electronics such as Arduino- and Raspberry-compatible modules have been widely used for various applications, from do-it-yourself (DIY) to industrial projects. In addition to the growth of open-source software platforms, open-source electronics play an important role in narrowing the gap between prototyping and product development. Indeed, the technological and social impacts of open-source electronics in teaching, research, and innovation have been widely recognized.
