LMS & LNER Steam Locomotives Malcolm Clegg,2021-08-30 L M S & L N E R Steam Locomotives, is the result of over two decades of photographing steam locomotives in action in many parts of Britain covered by the former LMS and LNER Railway Companies. They were the two largest of the 'Big Four' Railway Companies which operated in Britain between 1923 and 1948. The majority of the photographs were taken during the British Railways era between 1948 and 1968. Although the author Malcolm Clegg has a sizeable collection of steam locomotive photographs taken during this period, the photographs which appear in this book are from the private collection of his lifelong friend and family relative, Mr Peter Cookson (a retired school-master), himself a railway historian, author and amateur photographer, who has kindly provided the photographs for publication in this book. Many of the photographs selected are rare and unusual for a variety of reasons which should appeal to railway historians and steam enthusiasts alike.

Current and Projected Water Resources Problems and Their Impact on DOD Installations Ray D. Schwartz,1979 The subject of water resources has recently been appearing more frequently in the press. Localized droughts tend to receive the most attention, but during 1978, information from the US Water Resources Council indicated a far more complex and critical water situation was developing. The ominous overtones of severe problems with water resources led to this National Defense University study to assess the anticipated impact of these problems on the military base structure in the United States. Corpus Interrogation and Grammatical Patterns Kristin Davidse,Caroline Gentens,Lobke Ghesquière,Lieven Vandelanotte,2014-11-15 The studies in this volume approach English grammatical patterns in novel ways by interrogating corpora, focusing on patterns in the verb phrase (tense, aspect and modality), the noun phrase (intensification and focus marking), complementation structures and clause combining. Some studies interrogate historical corpora to reconstruct the diachronic development of patterns such as light verb constructions, verb-particle combinations, the be a-verbing progressive and absolute constructions. Other studies analyse synchronic datasets to typify the functions in discourse of, amongst others, tag questions and it-clefts, or to elucidate

some long-standing problems in the syntactic analysis of verbal or adjectival complementation patterns, thanks to the empirical detail only corpora can provide. The volume documents the practices that have been developed to guarantee optimal representativeness of corpus data, to formulate definitions of patterns that can be operationalized in extractions, and to build dimensions of variation such as text type and register into rich grammatical descriptions.
