The Neuroscience and Neuropsychology of Gambling Luke Clarke, Anna E. Goudriaan, 2021-11-29 Gambling disorder is a behavioural addiction that represents the clinical extreme of a spectrum of gambling-related harm. What insights can neuroscientific and neuropsychological methods provide to help understand this condition and improve existing programs for treatment and prevention? This volume describes recent research using an array of contemporary tools including structural and functional brain imaging, and neurocognitive assessment. These analyses consider brain activity and psychological functioning in people with gambling disorder under resting conditions, due to tasks of reward processing and inhibitory control, and as a function of important sources of individual differences including depression and impulsivity. This volume also synthesizes contemporary research using animal models to examine decision-making under uncertainty from a behavioural neuroscience perspective, as well as synthesizing evidence from pharmacological treatments for gambling disorders. These findings complement research to understand substance use disorders and other emerging forms of behavioural addiction. This volume contains contributions from many of the leading research groups in this exciting field. The chapters in this book were originally published as a special issue of International Gambling Studies.

City of Play Rodrigo Pérez de Arce,2018-05-31 City of Play shows how play is built into the very fabric of the modern city. From playgrounds to theme parks, skittle alleys to swimming pools, to the countless uncontrolled spaces which the urban habitat affords – play is by no means just a childhood affair. A myriad essentially unproductive playful pursuits have, through time, modelled the modern city and landscape. Architect and scholar Rodrigo Pérez de Arce's erudite, original, and often surprising study explores a curiously neglected dimension of architectural design and practice: ludic space. It is an architectural history of the playground – from the hippodrome to the Situationist city – of space released from productive ends in the pursuit of leisure. But this is more than just a book about how architecture has incorporated play into its spaces and structures, it is a history of the modern city itself. The ludic imagination impregnated modernist ideals, and what begins with the playground ends with a re-consideration of the whole sweep of the modern movement through the filter of leisure and play. Because play is such a basic or fundamental human experience, the book re-grounds the architect's concerns with those of non-architects – and not only those of adults but also of children. It seeks to give everyone – architects and other ordinary city-dwellers alike – a better understanding about what is at stake in the making of the public spaces of our cities.
