Water-Based Screenprinting Today Roni Henning,2006

- Spotlights “green” technology, safe for all artists • Distinguished author has worked with Andy Warhol, Red Grooms, Romare Bearden, and other top artists • Techniques range from the traditional hands-on to the latest in digital screenprinting For many years, screenprinting was oil-based—and presented significant health risks even as it damaged the environment. Today, fortunately, screenprinting has shifted to water-based technologies. NowRoni Henning, a leading expert on screenprinting, offers her tips and techniques for getting the most out of these safer, “greener” water-based

methods ranging from the traditional hands-on methods to the latest digital technology. She explains separations and color correcting, then discusses the artist-printmaker collaboration, giving intriguing examples from her own work with such luminaries as Andy Warhol, Red Grooms, and Romare Bearden. Henning also offers step-by-step instructions for monoprinting, her own direct-to-screen watercolor process. Illustrated with glowing examples of the printmaking medium, including works by Bearden, Jack Youngerman, Gene Davis, and Elizabeth Osbourne, this is the definitive work on an increasingly popular art.

Making Images Move Gregory Zinman, 2020-01-03 Making Images Move reveals a new history of cinema by uncovering its connections to other media and art forms. In

this richly illustrated volume, Gregory Zinman explores how moving-image artists who worked in experimental film pushed the medium toward abstraction through a number of unconventional filmmaking practices, including painting and scratching directly on the film strip; deteriorating film with water, dirt, and bleach; and applying materials such as paper and glue. This book provides a comprehensive history of this tradition of “handmade cinema” from the early twentieth century to the present, opening up new conversations about the production, meaning, and significance of the moving image. From painted film to kinetic art, and from psychedelic light shows to video synthesis, Gregory Zinman recovers the range of forms, tools, and intentions that make up cinema’s shadow history, deepening awareness of the intersection of art and media in the twentieth century, and anticipating what is to come.
