Electronic Commerce Efraim Turban, David King, Jae Kyu Lee, Ting-Peng Liang, Deborah C. Turban, 2015-01-29 Throughout the book, theoretical foundations necessary for understanding Electronic Commerce (EC) are presented, ranging from consumer behavior to the economic theory of competition. Furthermore, this book presents the most current topics relating to EC as described by a diversified team of experts in a variety of fields, including a senior vice president of an e-commerce-related company. The authors provide website resources, numerous exercises, and extensive references to supplement the theoretical presentations. At the end of each chapter, a list of online resources with links to the websites is also provided. Additionally, extensive, vivid examples from large corporations, small businesses from different industries, and services, governments, and nonprofit agencies from all over the world make concepts come alive in Electronic Commerce. These examples, which were collected by both academicians and practitioners, show the reader the capabilities of EC, its cost and justification, and the innovative ways corporations are using EC in their operations. In this edition (previous editions published by Pearson/Prentice Hall), the authors bring forth the latest trends in e-commerce, including social businesses, social networking, social collaboration, innovations, and mobility.

Webcasting Worldwide Louisa S. Ha, Richard J. Ganahl, 2013-03-07 Webcasting Worldwide tackles one of the most timely topics in mass communication today—the delivery of audio and video content via the Web, or webcasting—employing a global perspective to explore the subject. It is unique in providing a theoretical framework by which to analyze business models of emerging media, and it also examines the business practices of leading webcasters in the world's most developed broadband markets. With webcasting in its early development, the approaches discussed in this volume set the standards for the webcasting industry. Representing the major broadband markets in the world, this text is an authoritative and valuable reference for both researchers and practitioners. The chapters relate the

business practices of webcasting to the media market environment and established media industries, such as television and radio, as well as government and non-profit organizations. Downloadable resources offer PowerPoint charts for use in training, education, and research, along with tables, graphs, screenshots, and hyperlinks. Webcasting Worldwide is essential reading for academic researchers and media industry practitioners, and the volume will be a useful text in advanced courses addressing media technology, media management, and international communication. For updates about the book chapters and latest commentaries on topics related to webcasting business models, please visit the Webcasting Business Models Blog at <http://webcastingworldwide.blogspot.com> Winner of The Association for Education in Journalism and Mass Communication Picard Award for Media Management and Economics 2007.

Free Culture and the City Alberto Corsín Jiménez, Adolfo Estalella, 2023-02-15 Free Culture and the City examines how and why free software spread beyond the world of hackers and software engineers and became the basis for an urban movement now heralded by scholars as a model for emulation. By the late 1990s, digital activists embraced a philosophy of free software and free culture in order to take control over their cities and everyday lives. Free culture, previously tethered to the digital realm, was cut loose and used to reclaim and resculpt the city. In Madrid the effects were dramatic. Common sights in the city were abandoned as industrial factories turned into autonomous social centers, urban orchards, guerrilla architectural camps, or community hacklabs. Drawing on two decades of ethnographic and historical work with free culture collectives in Madrid, Free Culture and the City shows how, in its journey from the digital to the urban, the practice of liberating culture required the mobilization of, and alliances between, public art centers, neighborhood associations, squatted social centers, hackers, intellectual property lawyers, street artists, guerrilla architectural collectives, and Occupy assemblies.

Digital Video Distribution in Broadband, Television, Mobile and Converged Networks Sanjoy Paul, 2011-06-20 A unique treatment of digital video distribution technology in a business context, Digital Video Distribution in Broadband, Television, Mobile and Converged Networks explores a range of diverse topics within the field through a combination of theory and practice to provide the best possible insight and exposure. The theoretical foundations inside assist a fuller understanding of the technologies used in practice, while real-world examples are correspondingly used to emphasize the applicability of theory in the commercial world. Fully illustrated throughout to help explain the fundamental concepts of digital media distribution, Digital Video Distribution in Broadband, Television, Mobile and Converged Networks is divided into three major parts starting initially with the basic industry trends that have been driving the adoption of video and making its distribution over the Internet an economically viable solution. This is followed with detail descriptions of challenges and solutions in distributing video in 'open' networks such as the Internet. The final part focuses on the challenges and solutions for distributing video in 'closed' networks such as the managed network of Telcos. Provides an A to Z of digital video distribution featuring technology, business, research, products and case studies. Features research topics exploring P2P Streaming, Digital Video Distribution over Disruption-Tolerant Networks and Scalable Video on Demand. Includes real world product descriptions on Transcoders, such as Rhonet, and IPTV Quality of Service Monitoring product, such as Ineoquest.

Sound Streams Andrew J Bottomley, 2020-06-01 In talking about contemporary media, we often use a language of newness, applying words like "revolution" and "disruption." Yet, the emergence of new sound media technologies and content—from the earliest internet radio broadcasts to the development of algorithmic music services and the origins of podcasting—are not a disruption, but a continuation of the century-long history of radio. Today's most innovative media makers are reintroducing forms of audio storytelling from radio's past. *Sound Streams* is the first book to historicize radio-internet convergence from the early '90s through the present, demonstrating how so-called new media represent an evolutionary shift that is nevertheless historically consistent with earlier modes of broadcasting. Various iterations of internet radio, from streaming audio to podcasting, are all new radio practices rather than each being a separate new medium: radio is any sound media that is purposefully crafted to be heard by an audience. Rather than a particular set of technologies or textual conventions, web-based broadcasting combines unique practices and features and ideas from radio history. In addition, there exists a distinctive conversationality and reflexivity to radio talk, including a propensity for personal stories and emotional disclosure, that suits networked digital media culture. What media convergence has done is extend and intensify radio's logics of connectivity and sharing; sonically mediated personal expression intended for public consideration abounds in online media networks. *Sound Streams* marks a significant contribution to digital media and internet studies. Its mix of cultural history, industry research, and genre and formal analysis, especially of contemporary audio storytelling, will appeal to media scholars, radio and podcast practitioners, audio journalism students, and dedicated podcast fans.
