E-Business Fundamentals Peter Eckersley,Lisa Harris,Paul Jackson,2003-05-29 This comprehensive textbook considers all of the key business, management and technical issues of e-Business, examining and explaining how technologies can help organizations in both the public and private sectors conduct business in new ways. After addressing the changing nature of the e-Economy and the impact of the dot.com 'bubble' of the late 1990s, Eckersley, Harris and Jackson go on to analyse key software developments and the impact these have had on organizational practices. They then outline the legal and ethical frameworks of e-Business, and consider how companies use various e-commerce tools to enter new markets. Finally, they trace the progress public sector organizations have made in adopting e-Business practice. This is an accessible, jargon-free and focused textbook that offers readers both a technical and managerial overview of the issues surrounding e-Business. It uses illustrative cases and discussion questions to help students and managers in organizations not only to familiarize themselves with e-Business but also to equip themselves with the skills to challenge and analyze the changing business environment.

Revivalism Maria A. Robinson-Smith,2018 Maria A. Robinson-Smith presents an overview and genealogy of Revivalism in this work. She explores the role of the Revival iconography in building a culture of shared understanding among Revivalists and, by extension, African Jamaicans. The Watt Town setting, with bands coming together from communities all over Jamaica, engaging in the same practices, is a symbolic homeland where people celebrate their Africanness and sustain the collective memory of Revivalists. Revival iconography is explored through its many modes: visual, sound and movement. Seals, symbols and colour symbolism are presented as a representation of the repertoire of images that make up the Revival iconography. Revival cosmology in the rituals and ceremonies are explored and the spaces created by the seals are treated as liminal ones for the enactment of cultural performances. Smith makes the point that the iconography makes it possible for Revivalists to interpret events and rituals in much the same way across Jamaica. Iconography is the symbolic language and carrier of culture that is central to the practice and production of shared meanings, and this language gives Revivalists a sense of identity. The Revival iconography stores information that makes it possible for Revivalists to reconnect with African metaphysics, thus reclaiming the African self.

The Paris System for Reporting Urinary Cytology Eva M. Wojcik,Daniel F.I. Kurtycz,Dorothy L. Rosenthal,2022-02-03 The first edition of The Paris System for Reporting Urinary Cytology introduced a completely new paradigm for detecting bladder cancer by urine cytology. This system concentrated on defining morphological characteristics of the most clinically significant form of bladder cancer, High Grade Urothelial Carcinoma. This new approach has been widely accepted throughout the world, and has become part of the daily practice of cytology. Considering that the first edition of The Paris System (TPS) introduced a new model of urinary cytodiagnosis, verification and expansion of initial material and data were anticipated. Based on evolving knowledge and readership requests, the group of highly experienced authors have created a new edition of TPS. This second edition includes areas and issues not originally covered. A new chapter on urine cytology of the upper tract, a rarely addressed topic, has been introduced. Furthermore, the issue of cellular degeneration is discussed in the criteria of all diagnostic categories. Examples of standardized reports are included in each chapter. Most importantly, a separate chapter presents data defining the risk of malignancy (ROM) for each diagnostic category to inform clinical management. New high quality images augment those of the first edition to better illustrate diagnostic clues and potential pitfalls. In addition to chapters on diagnostic criteria, current concepts of pathogenesis of bladder cancer, specimen adequacy and preparation, and ancillary tests are covered in separate chapters. A bonus to the volume is a comprehensive history of urine as the earliest diagnostic sample of human disease, richly illustrated with artworks from major museums. Written by internationally recognized authorities, this comprehensive and evidence-based guide to urine cytology is supported by the newest data confirming the original concept and significance of diagnostic criteria defining High Grade Urothelial Carcinoma. TPS is an essential tool for anyone who is practicing urinary cytology, including cytotechnologists, pathologists-in-training and practicing pathologists. This book should find a place in every cytology laboratory throughout the world. The Concept has been endorsed by the American Society of Cytopathology, and the International Academy of Cytology.

The first phase of the review also examined eight sectors of the economy to remove the barriers to growth that affect them: advanced manufacturing; healthcare and life sciences; digital and creative industries; professional and business services; retail; construction; space; tourism.
