The History of Terrorism Gérard Chaliand,Arnaud Blin,2016-08-23 This authoritative work provides an essential perspective on terrorism by offering a rare opportunity for analysis and reflection at a time of ongoing violence, threats, and reprisals. Some of the best international specialists on the subject examine terrorism's complex history from antiquity to the present day and find that terror, long the weapon of the weak against the strong, is a tactic as old as warfare itself. Beginning with the Zealots of the first century CE, contributors go on to discuss the Assassins of the Middle Ages, the 1789 Terror movement in Europe, Bolshevik terrorism during the Russian Revolution, Stalinism, "resistance" terrorism during World War II, and Latin American revolutionary movements of the late 1960s. Finally, they consider the emergence of modern transnational terrorism, focusing on the roots of Islamic terrorism, al Qaeda, and the contemporary suicide martyr. Along the way, they provide a groundbreaking analysis of how terrorism has been perceived throughout history. What becomes powerfully clear is that only through deeper understanding can we fully grasp the present dangers of a phenomenon whose repercussions are far from over. This updated edition includes a new chapter analyzing the rise of ISIS and key events such as the 2015 Paris attacks.

Artistry in Bronze Jens M Daehner,Kenneth Lapatin,Ambra Spinelli,2017-11-21 The papers in this volume derive from the proceedings of the nineteenth International Bronze Congress, held at the Getty Center and Villa in October 2015 in connection with the exhibition *Power and Pathos: Bronze Sculpture of the Hellenistic World*. The study of large-scale ancient bronzes has long focused on aspects of technology and production. Analytical work of materials, processes, and techniques has significantly enriched our understanding of the medium. Most recently, the restoration history of bronzes has established itself as a distinct area of investigation. How does this scholarship bear on the understanding of bronzes within the wider history of ancient art? How do these technical data relate to our ideas of styles and development? How has the material itself affected ancient and modern perceptions of form, value, and status of works of art?

New England and the Bavarian Illuminati Vernon Stauffer,2005 The rift between the nation's two political parties is caused by a Conspiracy! New England the Bavarian Illuminati is the history of the Illuminati scare that occurred in America at the end of the eighteenth century. It tells how the Federalists, including the New England clergy in particular, seized upon the idea that the Illuminati were behind the actions of the Democrats. Only a far-reaching conspiracy could explain the irreverent habits and searing attacks of the Jeffersonians. Fear of the secret Democratic Clubs, magnified by fear of the French Jacobins, made such a conspiracy readily believable. Dr. Stauffer ably details the state of American politics and religion before and after the American Revolution. He recounts the known history of the Illuminati, and reviews how knowledge of the secret organization was transmitted to America. The conspiracy alarm is traced in detail, from the first announcement of the existence of the Illuminati given during a sermon, through the heated and virulent debates in newspapers and pamphlets, and finally to the decline of the public spectacle under counter-attacks and satirical mockery. This study of the Illuminati in New England was originally published in 1918. Acclaimed from its first printing, it has since then developed a respectable position as one of the most competent and important histories on the shadowy Order of the Illuminati.

A Small Town Called Hibiscus Hua Gu,1983 *A Small Town Called Hibiscus* is one of the best Chinese novels to have appeared in 1981. Its author Gu Hua was brought up in the Wuling Mountains of south Hunan. He presents the ups and downs of some families in a small mountain town there during the hard years in the early sixties, the ôcultural

revolution, and after the downfall of the Gang of Four. He shows the horrifying impact on decent, hard-working people of the Gang's ultra-Left line, and retains a sense of humor in describing the most harrowing incidents. In the end wrongs are righted, and readers are left with a deepened understanding of this abnormal period in Chinese history and the sterling qualities of the Chinese people.

Water Societies and Technologies from the Past and Present Mark Altaweel, Yijie Zhuang, 2018-11-26 Today our societies face great challenges with water, in terms of both quantity and quality, but many of these challenges have already existed in the past. Focusing on Asia, *Water Societies and Technologies from the Past and Present* seeks to highlight the issues that emerge or re-emerge across different societies and periods, and asks what they can tell us about water sustainability. Incorporating cutting-edge research and pioneering field surveys on past and present water management practices, the interdisciplinary contributors together identify how societies managed water resource challenges and utilised water in ways that allowed them to evolve, persist, or drastically alter their environment. The case studies, from different periods, ancient and modern, and from different regions, including Egypt, Sri Lanka, Cambodia, Southwest United States, the Indus Basin, the Yangtze River, the Mesopotamian floodplain, the early Islamic city of Sultan Kala in Turkmenistan, and ancient Korea, offer crucial empirical data to readers interested in comparing the dynamics of water management practices across time and space, and to those who wish to understand water-related issues through conceptual and quantitative models of water use. The case studies also challenge classical theories on water management and social evolution, examine and establish the deep historical roots and ecological foundations of water sustainability issues, and contribute new grounds for innovations in sustainable urban planning and ecological resilience.

Information Anxiety Richard Saul Wurman, 1989 Produced by the ever-widening gap between what we understand and what we think we should understand, information anxiety is the black hole between data and knowledge, and it happens when information doesn't tell us what we want or need to know. Illustrated.

Encyclopedia of Ancient Egypt Margaret Bunson, 2014-05-14 An A-Z reference providing concise and accessible information on Ancient Egypt from its predynastic cultures to the suicide of Cleopatra and Mark Anthony in the face of the Roman conquest. Annotation. Bunson (an author of reference works) has revised her 1991 reference (which is appropriate for high school and public libraries) to span Egypt's history from the predynastic period to the Roman conquest. The encyclopedia includes entries for people, sites, events, and concepts as well as featuring lengthy entries or inset boxes on major topics such as deities, animals, and the military. A plan and photograph are included for each of the major architectural sites.

Biology, Ecology and Management of Aquatic Plants Joseph Caffrey, Philip R.F. Barrett, Maria Teresa Ferreira, Ilidio S. Moreira, Kevin J. Murphy, Philip Max Wade, 2013-04-17 There is a growing need for appropriate management of aquatic plants in rivers and canals, lakes and reservoirs, and drainage channels and urban waterways. This management must be based on a sound knowledge of the ecology of freshwater plants, their distribution and the different forms of control available including chemical and physical, and biological and biomanipulation. This series of papers from over 20 different countries was generated from the tenth in the highly successful series of European Weed Research Society symposia on aquatic plant management, this being the tenth. It provides a valuable insight into the complexities involved in managing aquatic systems, discusses state-of-the-art control techniques and deals with patterns of regrowth and recovery post-management. Careful consideration is given to the use of chemicals, a practice which has come under scrutiny in recent years. Underpinning the development of such control techniques is a growing body of knowledge relating to the biology and ecology of water plants. The authorship of the

papers represents the collective wisdom of leading scientists and experts from fisheries agencies, river authorities, nature conservation agencies, the agrochemical industry and both governmental and non-governmental organisations.

We Can't Go Home Again Clarence E. Walker, 2001-06-14 Afrocentrism has been a controversial but popular movement in schools and universities across America, as well as in black communities. But in *We Can't Go Home Again*, historian Clarence E. Walker puts Afrocentrism to the acid test, in a thoughtful, passionate, and often blisteringly funny analysis that melts away the pretensions of this therapeutic mythology. As expounded by Molefi Kete Asante, Yosef Ben-Jochannan, and others, Afrocentrism encourages black Americans to discard their recent history, with its inescapable white presence, and to embrace instead an empowering vision of their African (specifically Egyptian) ancestors as the source of western civilization. Walker marshals a phalanx of serious scholarship to rout these ideas. He shows, for instance, that ancient Egyptian society was not black but a melange of ethnic groups, and questions whether, in any case, the pharaonic regime offers a model for blacks today, asking if everybody was a King, who built the pyramids? But for Walker, Afrocentrism is more than simply bad history--it substitutes a feel-good myth of the past for an attempt to grapple with the problems that still confront blacks in a racist society. The modern American black identity is the product of centuries of real history, as Africans and their descendants created new, hybrid cultures--mixing many African ethnic influences with native and European elements. Afrocentrism replaces this complex history with a dubious claim to distant glory. Afrocentrism offers not an empowering understanding of black Americans' past, Walker concludes, but a pastiche of 'alien traditions' held together by simplistic fantasies. More to the point, this specious history denies to black Americans the dignity, and power, that springs from an honest understanding of their real history.

Hospitality Marketing Francis Buttle, David Bowie, Maureen Brookes, Anastasia Mariussen, 2016-10-04 This introductory textbook shows you how to apply the principles of marketing within the hospitality industry. Written specifically for students taking marketing modules within a hospitality course, it contains examples and case studies that show how ideas and concepts can be successfully applied to a real-life work situation. It emphasizes topical issues such as sustainable marketing, corporate social responsibility and relationship marketing. It also describes the impact that the internet has had on both marketing and hospitality, using a variety of tools including a wide range of internet learning activities. This 3rd Edition has been updated to include: Coverage of hot topics such as use of technology and social media, power of the consumer and effect on decision making, innovations in product design and packaging, ethical marketing and sustainability marketing Updated online resources including: power point slides, test bank of questions, web links and additional case studies New and updated international case studies looking at a broad range of hospitality settings such as restaurants, cafes and hotels New discussion questions to consolidate student learning at the end of each chapter.

Stigma Cities Jonathan Foster,2018-09-27 Growing up in Birmingham, Alabama, a city that he loved, Jonathan Foster was forced to come to grips with its reputation for racial violence. In so doing, he began to question how other cities dealt with similar kinds of stigmas that resulted from behavior and events that fell outside accepted norms. He wanted to know how such stigmas changed over time and how they affected a city's reputation and residents. Those questions led to this examination of the role of stigma and history in three very different cities: Birmingham, San Francisco, and Las Vegas. In the era of civil rights, Birmingham became known as "Bombingham," a place of constant reactionary and racist violence. Las Vegas emerged as the nation's most recognizable Sin City, and San Francisco's tolerance of homosexuality made it the perceived capital of Gay America. *Stigma Cities* shows how cultural and political trends influenced perceptions of disrepute in these cities, and how, in turn, their status as sites of vice and violence influenced development decisions, from Birmingham's efforts to shed its reputation as racist, to San Francisco's transformation of its stigma into a point of pride, to Las Vegas's use of gambling to promote tourism and economic growth. The first work to investigate the important effects of stigmatized identities on urban places, Foster's innovative study suggests that reputation, no less than physical and economic forces, explains how cities develop and why. An absorbing work of history and urban sociology, the book illuminates the significance of perceptions in shaping metropolitan history.

Code Monkey Save World Greg Pak,Jonathan Coulton,2014-02-15 A put-upon coding monkey teams up with a seething, lovelorn super-villain to fight robots, office worker zombies, and maybe even each other as they struggle to impress the amazing women for whom they fruitlessly long. Based on the songs of internet superstar musician Jonathan Coulton.

CRC Handbook of Medicinal Spices James A. Duke,2002-09-27 Let food be your medicine, medicine your food.-Hippocrates, 2400 B.C.When the Father of Medicine uttered those famous words, spices were as important for medicine, embalming, preserving food, and masking bad odors as they were for more mundane culinary matters. Author James A. Duke predicts that spices such as capsicum, cinnamon, garlic, ginger

Religion and Power Nicole Maria Brisch,2008 This volume represents a collection of contributions presented during the Third Annual University of Chicago Oriental Institute Seminar Religion and Power: Divine Kingship in the Ancient World and Beyond, held at the Oriental Institute, February 23-24, 2007. The purpose of this conference was to examine more closely concepts of kingship in various regions of the world and in different time periods. The study of kingship goes back to the roots of fields such as anthropology and religious studies, as well as Assyriology and Near Eastern archaeology. More recently, several conferences have been held on kingship, drawing on cross-cultural comparisons. Yet the question of the divinity of the king as god has never before been examined within the framework of a cross-cultural and multi-disciplinary conference. Some of the recent anthropological literature on kingship relegates this question of kings who deified themselves to the background or voices serious misgivings about the usefulness of the distinction between divine and sacred kings. Several contributors to this volume have pointed out the Western, Judeo-Christian background of our categories of the human and

the divine. However, rather than abandoning the term divine kingship because of its loaded history it is more productive to examine the concept of divine kingship more closely from a new perspective in order to modify our understanding of this term and the phenomena associated with it.
