This invaluable guide provides step-by-step instructions for investigating Internet crimes, including locating, interpreting, understanding, collecting, and documenting online electronic evidence to benefit investigations. Cybercrime is the fastest growing area of crime as more criminals seek to exploit the speed, convenience and anonymity that the Internet provides to commit a diverse range of criminal activities. commit crimes, and the deployment of viruses, botnets, and email scams such as phishing. Marketing in a Web 2.0 World Peter VanRysdam, 2010 During the toughest recessions in years, Americans have become more resourceful than ever, creating a record 558,000 new businesses per month -- a 14-year high -- in 2009. While these small businesses are the crutch of the economy, making up more than 99.7 percent of employers, it is hard to not only separate yourself from the pack, but also to just stay afloat. To achieve success, many businesses have taken their ingenuity online to market themselves digitally in the new Web 2.0 world -- the interactive and information-sharing digital age. You can't conquer the business world without first letting people know you exist. Spreading the knowledge about your business is where social media comes in. About 2/3 of comScore's U.S. Top 100 Web sites interact with customers through Facebook, which has over 400 million users. Businesses can also use short tweets to reach the over 180 million unique monthly visitors to Twitter every month. This book shows you how to take advantage of these latest

technologies to market your business, and many of the tools require little or no money to implement. You no longer have to compete with the resources, brand recognition, and money of big corporations to reach your audience -- of which 55.6 million adults, 1/3 of the population, use social media. With Peter VanRysdam, chief marketing officer and cofounder of 352 Media Group, as your guide, you will understand how social networks have fundamentally altered how the Internet is used as a marketing tool. You will discover how to draw visitors to your Web site with search engine optimisation (SEO) and how to use Webinars, blogs, and podcasts to establish yourself as a leader in your industry. Whether you are one of those many new start-ups or a small business owner looking to take the next step, *Marketing in a Web 2.0 World* is here to show you the path to reach the business pinnacle by spreading your message to more people -- faster and more efficiently than ever.

Balancing Privacy and Free Speech Mark Tunick, 2014-08-21 In an age of smartphones,

Facebook and YouTube, privacy may seem to be a norm of the past. This book addresses ethical and legal questions that arise when media technologies are used to give individuals unwanted attention. Drawing from a broad range of cases within the US, UK, Australia, Europe, and elsewhere, Mark Tunick asks whether privacy interests can ever be weightier than society's interest in free speech and access to information. Taking a comparative and interdisciplinary approach, and drawing on the work of political theorist Jeremy Waldron concerning toleration, the book argues that we can still have a legitimate interest in controlling the extent to which information about us is disseminated. The book begins by exploring why privacy and free speech are valuable, before developing a framework for weighing these conflicting values. By taking up key cases in the US and Europe, and the debate about a 'right to be forgotten', Tunick discusses the potential costs of limiting free speech, and points to legal remedies and other ways to develop new social attitudes to privacy in an age of instant information sharing. This book will be of great interest to students of privacy law, legal ethics, internet governance and media law in general.
