Techniques creatives avec Canvas 2D de HTML 5 Patrice Rey,2014-10-30 HTML 5 se propose de redevenir la référence en termes de standard ouvert pour des applications en lieu et place de technologies telles que Flash, Silverlight ou Java, dont la croissance a

été rapide. Avec l'inauguration d'API orientées vers le graphisme, la vidéo, l'audio, et la communication, HTML 5 peut désormais prétendre à la création d'applications et de jeux de haute qualité et d'applications très riches visuellement. Dans la première étape, grâce à l'élément canvas, nous allons voir comment dessiner des formes et des tracés, comment utiliser les couleurs, les motifs et les dégradés, et comment écrire du texte sur la surface de cet élément. Dans la seconde étape, nous allons voir comment mettre en place le chargement dynamique d'une image en JavaScript pour la visualiser, comment lire les pixels d'une image, comment modifier les pixels d'une image et comment créer de nouveaux pixels dans une image. Dans la troisième étape, nous allons voir la mise en pratique de cette panoplie d'effets évolués. Dans la quatrième étape, nous allons voir comment programmer la prise en charge des événements du DOM pour le canevas et comment programmer l'animation image par image en fonction d'une fréquence donnée. Dans la cinquième étape, nous allons voir, dans un premier temps comment implémenter une classe associée à un canevas qui permettra la gestion individuelle des événements souris et tactiles survenant sur une forme. Et dans un deuxième temps, nous verrons comment utiliser cette classe de gestion des événements associée à un canevas. Dans la sixième étape, nous allons voir comment implémenter différents types de graphiques. Nous verrons au passage comment réaliser des requêtes Ajax pour télécharger en arrière-plan des fichiers contenant des données personnalisées. Et nous verrons aussi comment architecturer les données à télécharger en utilisant un format d'échange de données léger et très utilisé qu'est la notation JSON. Dans la septième étape, nous allons voir dans un premier temps comment utiliser et interagir avec l'audio.

The Professor's Guide to Taming Technology Kathleen P.
King,Thomas D. Cox,2011-01-01 This book is provided as a guide,
encouragement and handbook for faculty to introduce digital media in
language you can understand and provide strategies and activities you
can quickly assimilate into your teaching. We are excited that more
people will be able to benefit from the powerful help and guidance
contained in this book. We are even more exhilarated as we anticipate
how each of you will discover applications and new directions we
would never anticipate, and look forward. We look forward to your
innovations as you use the material you discover here. This book
responds to the needs of our changing world and students by
revealing innovative technology applications and how faculty are and
can use digital media in teaching in higher education because faculty
make the quickest changes and learn how to do it best. It is a valuable
resource for faculty from faculty, because it allows the sharing of
successful teaching experiences with digital media with our
worldwide colleagues so they may modify it, extend it, and improve
it. Moreover, in our work with faculty across all disciplines, we also
find that many struggle to think about teaching in ways in which
they can incorporate technology meaningfully. While we might be
experts in our discipline (chemistry, philosophy, music, etc) due to the
curriculum of terminal degrees, we might not have strong
preparation in instructional design. We have been fortunate to bring
together faculty experts across different disciplines to specifically
speak about how and why to use digital media in higher education

settings. We realize we are asking you to think about your way of teaching with new ideas and strategies. Therefore, we try to illustrate them with clear examples. These different approaches include clear descriptions of what these activities look like, why to develop and implement them, and how to do so for your specific needs.
