Following a look at recent advances in the development of carbon materials as carbon-based metal-free catalysts, subsequent sections deal with a mechanistic understanding for the molecular design of efficient carbon-based metal-free catalysts, with a special emphasis on heteroatom-doped carbon nanotubes, graphene, and graphite. Examples of important catalytic processes covered include clean energy conversion and storage, environmental protection, and synthetic chemistry. With contributions from world-leading scientists, this is an indispensable source of information for academic and industrial researchers in catalysis, green chemistry, electrochemistry, materials science, nanotechnology, energy technology, and chemical engineering, as well as graduates and scientists entering the field.

China and International Norms Mario Esteban,Yue Lin,2023-07-21 This book explores the relationship between China and international norms through the lens of The Belt and Road Initiative (BRI). Presenting seven case studies, this book highlights China's stances toward international norms that govern different international issues. The case studies reveal that the normative function of the networks built under the BRI is limited and contains noticeable variations between domestic norms and international ones in China, resulting in implementation gaps between rhetoric and deeds. Unlike current literature on this issue, which is scattered in terms of topics covered and methodology used, it constructs a holistic theoretical/methodological framework which can be utilized to study a State's position toward different international standards. In light of China's increasing international influence and proactive and assertive foreign policy, this study will be of interest to officials and practitioners involved in foreign policy and international cooperation, and to student and scholars of global development and international relations.

Barbarians at the Gate Bryan Burrough,John Helyar,2009-10-13 "One of the finest, most compelling accounts of what happened to corporate America and Wall Street in the 1980's." —New York Times Book Review A #1 New York Times bestseller and arguably the best business narrative ever written, *Barbarians at the Gate* is the classic account of the fall of RJR Nabisco. An enduring masterpiece of investigative journalism by Bryan Burrough and John Helyar, it includes a new afterword by the authors that brings this remarkable story of greed and double-dealings up to date twenty years after the famed deal. The Los Angeles Times calls *Barbarians at the Gate*, "Superlative." The Chicago Tribune raves, "It's hard to imagine a better story...and it's hard to imagine a better account." And in an era of spectacular business crashes and federal bailouts, it still stands as a valuable cautionary tale that must be heeded.
