Making Online Teaching Accessible Norman

Coombs, 2010-08-26 Making Online Teaching Accessible offers online teachers, instructional designers, and content developers a comprehensive resource for designing online courses and delivering course content that is accessible for all students including those with visual and audio disabilities. Grounded in the theories of learner-centered teaching and successful course design, Making Online Teaching Accessible outlines the key legislation, decisions, and guidelines that govern online learning. The book also demystifies assistive technologies and includes step-by-step guidance for creating accessible online content using popular programs like Microsoft Office and Adobe Acrobat, as well as multimedia tools. Including a wealth of helpful tips and suggestions for effectively communicating with disabled students, the book contains practical advice on purchasing accessible course management systems, developing solutions for inaccessibility issues, and creating training materials for faculty and staff to make online learning truly accessible. This valuable how-to book is a critical tool for all instructional designers and faculty who teach online. Coombs' many years as a pioneer of online teaching show in his deep knowledge of the principles that can allow the reader to apply these lessons to any learning management system (LMS). —Sally M. Johnstone, provost and vice president academic affairs, Winona State University, Minnesota; former executive director of WCET at WICHE As more and more of our social and professional lives come to be mediated by technology, online accessibility is a fundamental right, not a luxury. This book is a must-read for anyone concerned with maximizing access to learning. —Richard N. Katz, former vice president and founding director, EDUCAUSE Center for Applied

Research This valuable book reflects Coombs' unique experience and commitment to the best teaching, learning, and accessibility options for all kinds of students and teachers. —Steven W. Gilbert, founder and president, The TLT Group-Teaching, Learning, and Technology Group

It features basic models of computation, formal languages and their properties; computability, decidability and complexity; a discussion of modern trends in the theory of automata and formal languages; design of programming languages, including the development of a new programming language; and compiler design, including the construction of a complete compiler. Writer's Block Vaporized, Creativity Maximized!

Robert Zito,2005-05 Many people have adventures from the past, coming-of-age experiences, narrow escapes, hair-brained adventures with their friends, things that happened when in school or at a specific job, weird family members or friends, strange and unbelievable occurrences, heart rending and passionate love stories. In short, things, which they know, will make a great book or even a best seller. They finally set everything up, so they have the method, the opportunity and the motive and then nothing. They stare at the white sheet of paper or a computer monitor and their heart races, their palms get sweaty and their mouths dry. They feel like a fraud. Things like Was I just kidding myself? I'm no writer. What was I thinking? Streak through their heads and then anxiety sets in, and even fear. Then it becomes a delaying action. It isn't very much fun facing that blank screen. It is similar to a firing squad except that the target is much more up-close and personal, it's your self-esteem and pride.
