While the recent slump in oil prices is a concern, increased investment in enhanced oil recovery techniques in recent times has attempted to make up for this decline, with supply increasing as a result. Meanwhile, Oman's industrial sector, particularly the petrochemicals segment, is poised for large expansion with ongoing investment in downstream infrastructure and new facilities in the pipeline for the Sohar and Salalah industrial regions expected to contribute significantly to output before 2020. Added to this is the rapid development of Oman's ports, rail and airports, which is expected to drive its reputation as a regional logistics hub while developing the tourism sector, which is considered as key moving forward.

**The Middle East and South Asia 2015-2016** Malcolm Russell,2015-08-20 This volume is designed to place in context the passionate controversies and emotional attachments of the two billion people who live, study, work, love, and die in the Middle East and South Asia. Understanding these regions means more than annually-updated details of the governments, politics, cultures, and economies of the twenty-four nations and assorted territories. Special chapters address significant issues of continuing international importance, including access to water, the role of oil, and the 2011 Arab spring. Both regions, after all, contain types of people misunderstood and often intensely disliked by others. Where religion intrudes on politics—the Afghan Taliban oppose educating girls, Hindu fanatics rampage in India, Iranian militiamen shoot demonstrators, Islamic extremists impose sharia, and Jewish Ultra-Orthodox send women to the back of the bus—readers bombarded with superficial news bites and slanted reporting might never sense the other accomplishments of these same societies. Islamic charities and societies bring relief to the impoverished, Israel's scholars win Nobel prizes, and most Indians cherish long-standing religious toleration. The author of this volume attempts to let the reader draw conclusions from the evidence.

*Cut the Cord* Tom Magrini,2019-08-26 High monthly cost, inflexible bundles of hundreds of channels you never watch, long-term contracts, equipment rental fees, cancellation fees, lousy customer service, and yearly price increases - why would anyone want cable or satellite TV? There is a revolution that has giant cable and satellite TV corporations worried. A major shift in how we watch TV is underway as each month hundreds of thousands of cable and satellite TV subscribers cut the cord and cancel their expensive subscriptions. Over 33 million Americans have cut the cord, opting to watch TV for free using an over-the-air antenna or by taking advantage of low-cost streaming video services that cost a small fraction of the price of cable or satellite TV. In 2018, the number of households who have cut the cord rose by 32.8% with the top five cable and satellite TV providers losing 3.2 million subscribers. In the first quarter of 2019 alone, the top ten U.S. cable and satellite TV providers lost 1.28 million customers. If that trend continues, more than 5 million cable and satellite TV subscribers will have cut their cable cord and ditched their satellite dish by the end of 2019. By the end of 2019, 34% of Americans are expected to have cut their cable TV cord or ditched their satellite TV dish. 61% of U.S. adults aged 18 to 29 and 37% aged 30 to 49 do not have cable or satellite TV and use online streaming services as their primary way to watch TV. 71% of cord-cutters stated their reason for cutting the cord was the high cost of cable and satellite TV. A survey of cord-cutters found the longer they went without cable or satellite TV, the more satisfied they were with their decision to cut the cord. The average cable TV bill is a whopping \$107 per month - nearly \$1,300 a year! Most of us pay more. I will show you how to cut the cord and save \$75 or more each month, even if you are paying as little as \$100 a month for cable or satellite TV. Think it's not worth the time or effort? The average cord-cutter saves \$104 a month - \$1,248 a year! Are you tired of throwing good money away on high cable or satellite TV bills? Do you want to enjoy television without emptying your bank account? Let me show you how to how to watch TV without paying a cable or satellite TV bill. It's time you joined the revolution!

**Copyright Reconstructed: Rethinking Copyright's Economic Rights in a Time of Highly Dynamic Technological and Economic Change** P. Bernt Hugenholtz,2018-04-11 About this book: Copyright Reconstructed is the result of a collaborative research project, 'Reconstructing Rights' funded by Microsoft Europe, that normatively examined the core economic rights protected under EU copyright law, with the aim of realigning these rights with economic and technological realities. It follows an interdisciplinary approach, combining economic and legal methods. The book presents various concurring future models of 'reconstructed' copyright law. The historical evolution of copyright has led to a growing disconnect between the legal definitions of economic rights and the business and technological realities they regulate, eroding copyright's normative content and distorting the scope of its economic rights. What's in this book: This book is structured as follows. Following a historical chapter that illustrates how a structure of media-specific economic rights has developed in international copyright law as copyright's catalogue of rights, a number of alternative models for reconstructing rights are presented in the form of chapters by Europe's most respected copyright scholars and economists focusing on potentially copyright-relevant acts that lie at the borders of exclusive rights: digital resale;private copying;hyperlinking and embedding;cable retransmission; andtext and data mining. How this will help you: Offering the most incisive current thinking on copyright's economic rights in an increasingly networked world where acts of usage of works occur on a global or regional scale rather than on a purely national territorial basis, this book will be of immeasurable value not only to academics but also to practitioners and professionals in intellectual property law. This book guides copyright lawyers and scholars in the fields of international and EU copyright law in understanding the nexus between copyright law and technological and economic change. It also helps lawmakers and judges at the European, national and international levels formulate legislative responses to the challenges of the digital environment.
