International Financial Statistics, March 2018 International Monetary Fund. Statistics

Dept., 2018-03-01 This paper discusses that for countries that have introduced new currencies, the rates shown in International Financial Statistics (IFS) for the period before the introduction of the most recent currency may be used as conversion factors—they may be used to convert national currency in IFS to US dollar or SDR. In such cases, the factors are constructed by chain linking the exchange rates of the old and the new currencies. The basis used is the value of the new currency relative to the old currency, as established by the issuing agency at the time the new currency was introduced. Notes on the introduction of new currencies can be found in the Country Notes or in IFS print publication (if recent). Data on members' IMF accounts are presented in the Fund Position section in the country tables and in four world tables. Terms and concepts of IMF accounts and the time series in the country and world tables are explained below.

**International Financial Statistics, December 2017** International Monetary Fund. Statistics

Dept., 2017-12-04 This paper describes the country, euro area, and world tables that provide measures of effective exchange rates, compiled by the IMF's Research Department, Statistics Department, and area departments. A nominal effective exchange rate index represents the ratio of an index of a currency's period-average exchange rate to a weighted geometric average of exchange rates for the currencies of selected countries and the euro area. A real effective exchange rate index represents a nominal effective exchange rate index adjusted for relative movements in national price or cost indicators of the home country, selected countries, and the euro area. For ease of comparison between the nominal effective exchange rate index and the real effective exchange rate index, the average exchange rate expressed in terms of US dollars per unit of each of the national currencies is also given in the index form, base 2010 = 100.

Last Night of Carnival and Other Stories Norberto Luis Romero,2004 The erotic, surreal, and provocative stories of Last Night of Carnival, comprise an exile aesthetic, where the speaker is exiled from his homeland, from the stale middleclass values of his parents, and from dead pieties of previous generations that have become ossified in the culture. Romero creates a world as fantastic as any created by Kafka, Borges, or Calvino.
