Empty Space and Points of Light Marie Herholdt Jørgensen, The book presents a study of key issues in Winerson's oeuvre. The selected works include *Oranges are not the Only Fruit*, *art & Lies*, *The PowerBook*, and *Written on the Body*, works that are all concerned with the self in relation to the concepts of time, love, gender, and the body. Drawing on Jungian ideas of quest and individual and Queer theory, Marie Herholdt Jørgensen shows how these concepts in the works of Winterson are grounded in the prospect of numerous potential realities in which several narrations of the self are made possible. Winterson disrupts the notion of one objective reality and instead centers on the individual as the narrator of various versions of reality and the self. The book contains summaries of all of Winterson's novels, making the book accessible for readers previously unfamiliar with Jeanette Winterson.

Inside the White Cube Brian O'Doherty, 1999 These essays explicitly confront a particular crisis in postwar art, seeking to examine the assumptions on which the modern commercial and museum gallery was based.

The Art of Space Ron Miller, 2014-10-27 The Art of Space is the most comprehensive celebration of space art ever to be published, profiling the development of space-based art in a variety of media. In The Art of Space, award-winning artist and best-selling author Ron Miller presents over 350 high-quality and often photorealistic images that chart how artists throughout history, working with the knowledge and research available during their time, have endeavored to construct realistic images of visions throughout the universe. Beginning with depictions of space ships, unmanned probes, and space stations, Miller moves through collections that also illustrate the planets, moons, galaxies, and stars; cities, colonies, and space habitats; and possible alien life. The artwork presented here has been created in a variety of media, from the woodcuts and oil paintings of the Victorian and Edwardian eras to the digitally enhanced work of contemporary artists. Each chapter also includes two special features: one profile of an artist or group of artists of particular influence and one sidebar discussion of general cultural topics, such as the use of space art for propaganda purposes during the Cold War or the impact of the digital revolution on the resources available to artists. A fascinating study on the intersection of science and the artistic imagination, The Art of Space shows how astronomy and space travel has been reflected in popular art and public perception over the past two centuries. With forewords from Carolyn Porco and Dan Durda, this book is the ultimate resource for space art fans.

Art and the Home Imogen Racz,2015-01-26 Our homes contain us, but they are also within us. They can represent places to be ourselves, to recollect childhood memories, or to withdraw into adult spaces of intimacy; they can be sites for developing rituals, family relationships, and acting out cultural expectations. Like the personal, social, and cultural elements out of which they are constructed, homes can be not only comforting, but threatening too. The home is a rich theme running through post-war western art, and it continues to engage contemporary artists today - yet it has been the subject of relatively little critical writing. Art and the Home: Comfort, Alienation and the Everyday is the first single-authored, up-to-date book on the subject. Imogen Racz provides a theme-led discussion about how the physical experience of the dwelling space and the psychological complexities of the domestic are manifested in art, focusing mainly on sculpture, installation and object-based practice; discussing the work and ideas of artists as diverse as Louise Bourgeois, Gordon Matta-Clark, George Segal and Cornelia Parker within their artistic and cultural contexts
