Geographically Dispersed Teams Valerie I. Sessa,1999

Geographically dispersed teams are work groups with members separated by time and distance. Essential to the success of organizations in a global marketplace, these teams create unique challenges to effective task performance. This report summarizes what the important literature on GDTs has to say about how they should be formed, developed, and led. It is primarily for individuals charged with creating or leading GDTs, for designers who provide the technology for these teams, for trainers who are expected to help these teams develop and operate, and for organizational consultants called in to assist.

Workforce Reductions Thomas Hickok,1999 Annotation
Brings together the prevailing thinking surrounding the issue of workforce reduction to help managers and executives ensure a successful transition to a more robust and effective organization. Articles and books reviewed were found in both practitioner-oriented sources such as magazines and popular books, as well as scholarly journals. Sources were selected for annotation based on their perceived relevance to the body of literature, their unique perspective, and their general interest. Entries are in-depth, with many a page or more in length. Annotations are organized in three

sections on the organizational, the organization-individual relationship, and the individual perspectives. Section introductions summarize key themes. Hickok holds a Doctor of Public Administration degree from the University of Southern California, and is a consultant to the US Defense Intelligence Agency. Annotation c. Book News, Inc., Portland, OR (booknews.com)

The Complete Inklings David P. Campbell, 1999 Topics include such key leadership issues as risk taking, executive motivation, decision making, and corporate taboos, as well as general concerns such as father-son relationships, the perils of travel, intelligence testing, civic art, technology, health, cultural understanding, and, of course, creativity. In short, this collection records the wide-ranging interests of one of today's premier figures in leadership research.

Choosing to Lead Kenneth E. Clark, Miriam B. Clark, 1996 A crucial component of leadership is the element of choice. Regardless of how much a person studies leadership, it is essential that he or she makes a conscious choice to accept the leadership role. This book defines leadership, gives examples of research in the field and explains how this knowledge can be used, describes leadership-development programs and surveys, and considers the literature of leadership. Chapters 1 through 4 define leadership and describe ways in which it might be exercised. Chapters 5 and 6 highlight research methods used to demonstrate the impact of improved leadership. The seventh and eighth chapters describe a leadership-development program at a well-known training center, with a focus on the tests and materials completed by participants before arrival and the actual program activities. Various programs in the education and training of leaders and managers are described in chapter 9. The ways in which experience develops and modifies leaders' behaviors are reviewed in the 10th chapter. Chapter 11 examines the uses of survey methods to assess the mood of group members and inform leaders of the effectiveness of their communication programs. Studies of the use of power and

position and the outcomes of such use are reviewed in the 12th chapter. Chapter 13 summarizes literature on leadership and cultural differences, and chapter 14 highlights how reported studies can help leaders work better with followers and organizations to achieve objectives. A total of 127 propositions offered throughout the book are summarized in the final chapter. Chapter notes, 8 tables, 6 figures, and an index are included. The appendix contains a list of questions for self-review. (Contains 212 references.) (LMI)
