*802.1X Port-Based Authentication* Edwin Lyle Brown,2006-12-19 Port-based authentication is a network access control concept in which a particular device is evaluated before being permitted to communicate with other devices located on the network. 802.1X Port-Based Authentication examines how this concept can be applied and the effects of its application to the majority of computer networks in existence today. 802.1X is a standard that extends the Extensible Authentication Protocol (EAP) over a Local Area Network (LAN)

through a process called Extensible Authentication Protocol Over LANs (EAPOL). The text presents an introductory overview of port-based authentication including a description of 802.1X port-based authentication, a history of the standard and the technical documents published, and details of the connections among the three network components. It focuses on the technical aspect of 802.1X and the related protocols and components involved in implementing it in a network. The book provides an in-depth discussion of technology, design, and implementation with a specific focus on Cisco devices. Including examples derived from the 802.1X implementation, it also addresses troubleshooting issues in a Cisco environment. Each chapter contains a subject overview. Incorporating theoretical and practical approaches, 802.1X Port-Based Authentication seeks to define this complex concept in accessible terms. It explores various applications to today's computer networks using this particular network protocol.

**Harm and Disorder in the Urban Space** Nina Peršak,Anna Di Ronco,2021-05-15 Bringing together an international group of authors, this book addresses the important issues lying at the intersection between urban space, on the one hand, and incivilities and urban harm, on the other. Progressive urbanisation not only influences people's living conditions, their well-being and health but may also generate social conflict and consequently fuel disorder and crime. Rooted in interdisciplinary scholarship, this book considers a range of urban issues, focussing specifically on their sensory, emotive, power and structural dimensions. The visual, audio and olfactory components that offend or harm are inspected, including how urban social control agencies respond to violations of imposed sensory regimes. Emotive dimensions examined include the consideration of people emotions and sensibilities in the perception of incivilities, in the shaping of social control to deviant phenomena, and their role in activating or suppressing people's resistance towards otherwise harmful everyday practices. Power and structural dimensions examine the agents who decide and define what anti-social and harmful is and the wider socio-economic and cultural setting in which urbanites and social control agents operate. Connecting with sensory and affective turns in other disciplines, the book offers an original, distinctive and nuanced approach to understanding the harms, disorder and social control in the city. An accessible and compelling read, this book will appeal to those engaged with

criminology, sociology, human geography, psychology, urban studies, socio-legal studies and all those interested in the relationship between urban space and urban harm.
