The Hate U Give Angie Thomas,2018-08 Read the book that inspired the movie! Sixteen-year-old Starr lives in two worlds: the poor neighbourhood where she was born and raised and her posh high school in the suburbs. The uneasy balance between them is shattered when Starr is the only witness to the fatal shooting of her unarmed best friend, Khalil, by a police officer. Now what Starr says could destroy her community. It could also get her killed. Inspired by the Black Lives Matter movement, this is a powerful and gripping novel about one girl's struggle for justice.

Voluntary Madness Norah Vincent,2008 A follow-up to *Self-Made Man* traces the author's commitment to a mental institution, where she embraced health and made observations about the effect of institutionalization and medication on the depressed and insane. 100,000 first printing.

The Dandelion Years Erica James,2014-12-23 A gorgeous tale of friendship and love from Sunday Times bestseller Erica James. Ashcombe was the most beautiful house Saskia had ever seen as a little girl. A rambling pink cottage on the edge of the Suffolk village of Melbury Green, its enchanting garden provided a fairy-tale playground of seclusion, a perfect sanctuary to hide from the tragedy which shattered her childhood. Now an adult, Saskia is still living at Ashcombe and as a book restorer devotes her days tending to the broken, battered books that find their way to her, daydreaming about the people who had once turned their pages. When she discovers a notebook carefully concealed in an old Bible - and realising someone has gone to a great deal of trouble to hide a story of their own - Saskia finds herself drawn into a heart-rending tale of wartime love...

Control Freak Cliff Bleszinski,2022-11-01 The designer of *Unreal* and *Gears of War* offers an eye-opening personal account of the video game industry as it grew from niche hobby to hundred-billion-dollar enterprise. Video games are dominating the planet. In 2020, they brought in \$180 billion dollars globally—nearly \$34 billion in the United States alone. So who are the brilliant designers who create these stunning virtual worlds? Cliff Bleszinski—or CliffyB as he is known to gamers—is one of the few who've reached mythical, rock star status. In *Control Freak*, he gives an unvarnished, all-access tour of the business. Toiling away in his bedroom, Bleszinski created and shipped his first game before graduating high school, and at just seventeen joined a fledgling company called Epic Games. He describes the grueling hours, obscene amounts of Mountain Dew and obsessive focus necessary to achieve his singular creative visions. He details Epic's rise to industry leader, thanks largely to his work on bestselling franchises *Unreal* and *Gears of War* (and, later, his input on a little game called *Fortnite*), as well as his own awkward ascent from shy, acne-riddled introvert to sports car-driving celebrity rubbing shoulders with Bill Gates. As he writes, "No one is weirder than a nerd with money." While the book is laced with such self-deprecating humor, Bleszinski also bluntly addresses the challenges

that have long-faced the gaming community, including sexism and a lack of representation among both designers and the characters they create. Control Freak is a hilarious, thoughtful, and inspiring memoir. Even if you don't play games, you'll walk away from this book recognizing them as a true art form and appreciating the genius of their creators.

Shadow Breakers Daniel Blythe, 2013-01-01 Can she escape the shadows and face the truth before the darkness destroys her? If the enemy is a fire, the evil is its shadow, flickering upon the wall. That's very poetic, Miss Bellini. I just wish I knew what it meant. Miranda's new home is a dull seaside town at the edge of the world, the sort of forgotten place where nothing ever happens. Until something does. Something strange and sinister. With her schoolteacher and her classmates, who might be more clued in than they let on, Miranda sets out to uncover the mystery. Her bravery borders on recklessness. She thinks she's chasing shadows, tortured spirits from centuries past, but could true darkness lie within? With a mixture of science and magic, Miranda's got to figure out how to break and banish the evil before it destroys her. An electrifying paranormal thriller that will have readers guessing till the end!

What Money Can't Buy Michael J. Sandel, 2012-04-24 Should we pay children to read books or to get good grades? Should we allow corporations to pay for the right to pollute the atmosphere? Is it ethical to pay people to test risky new drugs or to donate their organs? What about hiring mercenaries to fight our wars? Auctioning admission to elite universities? Selling citizenship to immigrants willing to pay? In *What Money Can't Buy*, Michael J. Sandel takes on one of the biggest ethical questions of our time: Is there something wrong with a world in which everything is for sale? If so, how can we prevent market values from reaching into spheres of life where they don't belong? What are the moral limits of markets? In recent decades, market values have crowded out nonmarket norms in almost every aspect of life—medicine, education, government, law, art, sports, even family life and personal relations. Without quite realizing it, Sandel argues, we have drifted from having a market economy to being a market society. Is this where we want to be? In his New York Times bestseller *Justice*, Sandel showed himself to be a master at illuminating, with clarity and verve, the hard moral questions we confront in our everyday lives. Now, in *What Money Can't Buy*, he provokes an essential discussion that we, in our market-driven age, need to have: What is the proper role of markets in a democratic society—and how can we protect the moral and civic goods that markets don't honor and that money can't buy?

Global Nomads Anthony D'Andrea, 2007-01-24 *Global Nomads* provides a unique introduction to the globalization of countercultures, a topic largely unknown in and outside academia. Anthony D'Andrea examines the social life of mobile expatriates who live within a global circuit of countercultural practice in paradoxical paradises. Based on nomadic fieldwork across Spain and India, the study analyzes how and why these post-metropolitan subjects reject the homeland in order to shape an alternative lifestyle. They become artists, therapists, exotic traders and bohemian workers seeking to integrate labor, mobility and spirituality within a cosmopolitan culture of expressive individualism. These countercultural formations, however, unfold under neo-liberal regimes that appropriate utopian spaces, practices and imaginaries as commodities for tourism, entertainment and media consumption. In order to understand the paradoxical globalization of countercultures, *Global Nomads* develops a dialogue between global and critical studies by introducing the concept of 'neo-nomadism' which seeks to overcome some of the shortcomings in studies of globalization. This book is an essential aide for undergraduate, postgraduate and research students of Sociology, Anthropology of Globalization, Cultural Studies and Tourism Studies.

Emperors of the Deep William McKeever, 2019-06-25 In this remarkable groundbreaking book, a documentarian and conservationist, determined to dispel misplaced fear and correct common misconceptions, explores in-depth the secret lives of sharks—magnificent creatures who play an integral part in maintaining the health of the world’s oceans and ultimately the planet. From the Jaws blockbusters to Shark Week, we are conditioned to see sharks as terrifying cold-blooded underwater predators. But as Ocean Guardian founder William McKeever reveals, sharks are evolutionary marvels essential to maintaining a balanced ecosystem. We can learn much from sharks, he argues, and our knowledge about them continues to grow. The first book to reveal in full the hidden lives of sharks, *Emperors of the Deep* examines four species—Mako, Tiger, Hammerhead, and Great White—as never before, and includes fascinating details such as: Sharks are 50-million years older than trees; Sharks have survived five extinction level events, including the one that killed off the dinosaurs; Sharks have electroreception, a sixth-sense that lets them pick up on electric fields generated by living things; Sharks can dive 4,000 feet below the surface; Sharks account for only 6 human fatalities per year, while humans kill 100 million sharks per year. McKeever goes back through time to probe the shark’s pre-historic secrets and how it has become the world’s most feared and most misunderstood predator, and takes us on a pulse-pounding tour around the world and deep under the water’s surface, from the frigid waters of the Arctic Circle to the coral reefs of the tropical Central Pacific, to see sharks up close in their natural habitat. He also interviews ecologists, conservationists, and world-renowned shark experts, including the founders of Greenpeace’s Rainbow Warrior, the head of the Massachusetts Shark Research Program, and the self-professed “last great shark hunter.” At once a deep-dive into the misunderstood world of sharks and an urgent call to protect them, *Emperors of the Deep* celebrates this wild species that hold the key to unlocking the mysteries of the ocean—if we can prevent their extinction from climate change and human hunters.
