How to Travel the World for Free Michael Wigge,2013-09-01 Michael Wigge is on an adventure of a lifetime. The reporter and journalist has traveled to many countries before, but this time he decided to make it more challenging: he would travel twenty-five thousand miles around the world by foot, bus, train, ship, and plane and not spend any of his own money. The journey was full of challenges: What would he eat? Where would he sleep? How would he get from place to place? Every day, those questions occupied his thoughts, but he always came up with creative solutions. He tried dumpster diving, eating flowers, couch surfing in the homes of strangers, sleeping under the stars, working on a container ship to cross the Atlantic Ocean, offering to pillow fight strangers for a dollar, and after 150 days, he reached his destination. For this, Elite World Records named him the First Person to Travel the World Penniless, and the documentary he filmed about this trip won best feature in the 2011 Accolade Awards. As much a guide as a travelogue, *How to Travel the World for Free* will give readers ideas for alternative ways of traveling and will inspire many to go on new adventures. This book is full of surprises, some more pleasant than others. Nevertheless, it's a journey you won't want to miss! Traveling can be expensive—why not do it for free?

Rules of Play Katie Salen Tekinbas,Eric Zimmerman,2003-09-25 An impassioned look at games and game design that offers the most ambitious

framework for understanding them to date. As pop culture, games are as important as film or television—but game design has yet to develop a theoretical framework or critical vocabulary. In *Rules of Play* Katie Salen and Eric Zimmerman present a much-needed primer for this emerging field. They offer a unified model for looking at all kinds of games, from board games and sports to computer and video games. As active participants in game culture, the authors have written *Rules of Play* as a catalyst for innovation, filled with new concepts, strategies, and methodologies for creating and understanding games. Building an aesthetics of interactive systems, Salen and Zimmerman define core concepts like play, design, and interactivity. They look at games through a series of eighteen game design schemas, or conceptual frameworks, including games as systems of emergence and information, as contexts for social play, as a storytelling medium, and as sites of cultural resistance. Written for game scholars, game developers, and interactive designers, *Rules of Play* is a textbook, reference book, and theoretical guide. It is the first comprehensive attempt to establish a solid theoretical framework for the emerging discipline of game design.

Within the Frame David duChemin, 2009-05-01 Within the Frame is a book about finding and expressing your photographic vision, specifically where people, places, and cultures are concerned. A personal book full of real-world wisdom and incredible images, author David duChemin (of pixelatedimage.com) shows you both the how and the why of finding, chasing, and expressing your vision with a camera to your eye. Vision leads to passion, and passion is a cornerstone of great photography. With it, photographs draw the eye in and create an emotional experience. Without it, a photograph is often not worth—and can't capture—a viewer's attention. Both instructional and inspirational, Within the Frame helps you on your photographic journey to make better images of the places and people you love, whether they are around the world or in your own backyard. duChemin covers how to tell stories, and the technology and tools we have at our disposal in order to tell those narratives. Most importantly, he stresses the crucial theme of vision when it comes to photographing people, places, and cultures—and he helps you cultivate and find your own vision, and then fit it within the frame.
