The Conversations Michael Ondaatje,2012-12-03 During the filming of his celebrated novel THE ENGLISH PATIENT, Michael Ondaatje became increasingly fascinated as he watched the veteran editor Walter Murch at work. THE CONVERSATIONS, which grew out of discussions between the two men, is about the craft of filmmaking and deals with every aspect of film, from the first stage of script writing to the final stage of the sound mix. Walter Murch emerged during the 1960s at the centre of a renaissance of American filmmakers which included the directors Francis Coppola, George Lucas and Fred Zinneman. He worked on a whole raft of great films including the three GODFATHER films, JULIA, AMERICAN GRAFFITI, APOCALYPSE NOW, THE UNBEARABLE LIGHTNESS OF BEING and many others. Articulate, intellectual, humorous and passionate about his craft and its devices, Murch brings his vast experience and penetrating insights to bear as he explains how films are made, how they work, how they go wrong and how they can be saved. His experience on APOCALYPSE NOW - both originally and more recently when the film was completely re-cut - and his work with Anthony Minghella on THE ENGLISH PATIENT provide illuminating highlights.

Digital Genesis Christopher Barnatt,2017-09-19 *Digital Genesis* charts the evolution of computing and the rise of artificial intelligence. From cloud AI

services and autonomous robots, to 3D printers and quantum processors, the book details the latest digital technologies and predicts their future development and implications. Late last century the human race learnt how to enter cyberspace. But in the 2020s the reverse will happen, with computers, robots and AI set to transform the physical world. Soon driverless vehicles will rule our highways, while many products will be manufactured in 'dark factories' by smart machines. Some of tomorrow's most sophisticated technologies may even be organically grown using the latest digital science of synthetic biology. Digital Genesis is written by futurist Christopher Barnatt, who in his 1995 book Cyber Business predicted the arrival of e-business and online social networks. Over 20 years later, he looks ahead to the Cognitive Computing Age, and beyond that to the era of 'cyborg fusion' in which the future of computing will become the future of ourselves.
