**Japan** International Monetary Fund, 2012-08-10

This Working Paper is a detailed assessment of Japan's compliance with the Insurance Core Principles of the International Association of Insurance Supervisors. The paper identifies a reduction in interest rates and equity prices as two factors that influence the structure and functioning of the insurance market and emphasizes the important role played by the Financial Services Agency in supervising and regulating it. As Japan is prone to frequent natural disasters, the insurance sector is of prime importance to its economic and social well-being.

*Islamic Republic of Mauritania* International Monetary Fund, 2012-08-01 The 2012 Article IV Consultation and Fourth Review under the three-year Extended Credit Facility (ECF) Arrangement discusses the macroeconomic conditions of the Islamic Republic of Mauritania. Mauritania's economy has performed well in 2011, despite significant challenges. Economic activity is likely to pick up and inflation to remain low. However, Mauritania faces important short- and medium-term policy challenges, notably in the social area, where progress in reducing poverty has been slow and unemployment is still high. The performance under the ECF-supported program has remained strong.

IMF Committee on Balance of Payments Statistics, Annual Report 2010 International Monetary Fund. Statistics Dept,

*Lao People's Democratic Republic* International Monetary Fund. Asia and Pacific Dept, 2012-10-18

Against the backdrop of generally sound policies and abundant natural resources, Lao P.D.R. has made impressive progress in developing its economy and reducing poverty. The key challenge going forward is to ensure that economic policy frameworks stay ahead of the curve to achieve sustainable and broad-based growth.

**Gabon** International Monetary Fund, 2006-06-20  
Efficiency and equity reasons suggest placing a high priority on ensuring that fiscal policy is on a sustainable path. This chapter has sought to estimate the sustainable long-term non-oil primary deficit and the optimal adjustment path toward that level. The banks' inability to monitor effectively the quality of their loan portfolios, paired with the high interest-rate floor on deposits, are key factors behind the very low degree of financial intermediation. The reform of fuel price subsidies in Gabon is necessary to facilitate pro-poor economic growth.

*Burundi* International Monetary Fund, 2012-08-06  
The Poverty Reduction Strategy Paper II (PRSP-II) examines the major development challenges faced by Burundi. The paper identifies achievements in areas such as security and governance, but draws attention to the below-par performance in overall economic growth and development. The primary reasons for the lack of development have been cited in the report. The four major strategic pillars of the PRSP-II provide a road-map for achieving the goals and objectives enunciated to put Burundi on the path toward sustainable development.

Denmark International Monetary Fund. European

Dept.,2013-01-24 The global financial crisis hit Denmark hard, and the recovery has been slow and unsteady. Denmark's slow growth predates the recent economic crisis, and the economy has underperformed its regional peers. The current account remains in surplus, largely reflecting weak domestic demand since the crisis and strong net income. Monetary policy is based on maintaining a tight peg to the euro. Denmark's financial system has rebuilt capital but still has substantial vulnerabilities. Potential growth is expected to recover gradually.

**Regional Economic Outlook, April 2016, Western Hemisphere Department** Mr.Hamid Faruquee,2016-04-27 The United States has seen an improvement in economic activity, driven by consumption, and has taken a first step toward gradual normalization of interest rates. The U.S. recovery continues to support activity in Mexico, Central America, and the Caribbean, but China's slowdown has reduced the demand for exports from South America. At the same time, the region's commodity exporters have experienced further terms-of-trade shocks as commodity prices continue their decline globally. This report describes the policies and economic reforms needed to address the declining productive capacity in Latin America and the Caribbean. Three chapters assess corporate vulnerabilities in Latin America, analyze the degree of exchange rate pass-through in the region, and evaluate trends in public and private infrastructure investment.

Credit Growth and the Effectiveness of Reserve Requirements and Other Macroprudential Instruments in Latin America International Monetary

Fund,2012-06-01 Over the past decade policy makers in Latin America have adopted a number of macroprudential instruments to manage the procyclicality of bank credit dynamics to the private sector and contain systemic risk. Reserve requirements, in particular, have been actively employed. Despite their widespread use, little is known about their effectiveness and how they interact with monetary policy. In this paper, we examine the role of reserve requirements and other macroprudential instruments and report new cross-country evidence on how they influence real private bank credit growth. Our results show that these instruments have a moderate and transitory effect and play a complementary role to monetary policy.

**Ancient and Modern Physics** Thomas Edgar Willson,2022-11-21 'Ancient and Modern Physics' is a collection of essays written by Thomas E. Willson. It was published posthumously, and features topics such as metaphysics, Eastern concept of the subject, as well as matter and ether.

Searching for the Wendigo Jennifer Rivkin,2014-07-15 The Wendigo is a demon that has the power to possess humans and make them do terrible things. Or so the Native American legends say. Readers will delve into the earliest known accounts of the Wendigo, additional firsthand stories throughout history, and modern scientific research to learn critical thinking skills and determine for themselves the solution to this mystery.

**To Cut or Not to Cut? That is the (Central**

## **Bank's) Question In Search of the Neutral Interest Rate in Latin America** Mr.Nicolas E.

Magud,Ms.Evridiki Tsounta,2012-10-09 This paper estimates neutral real interest rate (NRIR) ranges for 10 Latin American countries that either have full-fledged inflation targeting regimes in place or have recently adopted them, using an array of methodologies commonly used in the literature. We find that NRIRs have declined in the last decade, with more economically and financially developed economies exhibiting lower NRIR levels. Based on the estimated NRIRs, we assess that the current monetary stance (measured by the interest rate gap) is appropriately neutral in most of the considered economies, in line with closing output gaps. We also observe that the interest rate gap can be a good predictor of future inflation dynamics and economic growth. In addition, looking at the recent experiences in Brazil and Peru, we suggest that macro-prudential policies could affect the monetary stance even in the absence of direct interest rate changes, through affecting the NRIR.

## **The (Other) Deleveraging** Mr.Manmohan

Singh,2012-07-01 Deleveraging has two components--shrinking of balance sheets due to increased haircuts/shedding of assets, and the reduction in the interconnectedness of the financial system. We focus on the second aspect and show that post-Lehman there has been a significant decline in the interconnectedness in the pledged collateral market between banks and nonbanks. We find that both the collateral and its associated velocity are not rebounding as of end-2011 and still about

\$4-5 trillion lower than the peak of \$10 trillion as of end-2007. This paper updates Singh (2011) and we use this data to compare with the monetary aggregates (largely due to QE efforts in US, Euro area and UK), and discuss the overall financial lubrication that likely impacts the conduct of global monetary policy.

### **Quantifying Structural Subsidy Values for Systemically Important Financial Institutions**

International Monetary Fund, 2012-05-01 Claimants to SIFIs receive transfers when governments are forced into bailouts. Ex ante, the bailout expectation lowers daily funding costs. This funding cost differential reflects both the structural level of the government support and the time-varying market valuation for such a support. With large worldwide sample of banks, we estimate the structural subsidy values by exploiting expectations of state support embedded in credit ratings and by using long-run average value of rating bonus. It was already sizable, 60 basis points, as of the end-2007, before the crisis. It increased to 80 basis points by the end-2009.

**A Template for Analyzing and Projecting Labor Market Indicators** Mr. Ralph Chami, 2012-10-05 This note is a reference guide for the unemployment template, an econometric tool that allows researchers to analyze and project labor market indicators for any country with sufficient data coverage. Section I explains the motivation behind designing a new surveillance tool to study labor markets, and summarizes the key features of the template. Section II details the data inputs

needed and their sources. Section III describes the methods used to estimate the employment-growth elasticity, a measure of the extent to which employment responds to output. Section IV outlines the medium-term outlook table and projection charts created by the template once the inputs are customized to generate an appropriate elasticity. Finally, Section V presents a discussion on how to interpret the results produced by the template, and of the issues that arise from projecting labor market indicators.

*From Volatility to Stability in Expenditure: Stabilization Funds in Resource-Rich Countries* Naotaka Sugawara, 2014-03-12 This paper examines the effect of stabilization funds on the volatility of government expenditure in resource-rich countries. Using a panel data set of 68 resource-rich countries over 1988–2012, the results find that the existence of stabilization funds contributes to smoothing government expenditure. The spending volatility in countries that have established such funds is found to be 13 percent lower in the main estimation, and similar impacts are found in robustness tests. The analysis also shows that political institutions and fiscal rules are significant factors in reducing the expenditure volatility, while highlighting the roles of the size of economy, diversified exports, real sector management, and financial markets.

Bond Markets in Africa Mr.Yibin Mu, Mr. Peter Phelps, Ms. Janet Gale Stotsky, 2013-01-14 African bond markets have been steadily growing in recent years, but nonetheless remain undeveloped. African

countries would benefit from greater access to financing and deeper financial markets. This paper compiles a unique set of data on corporate bond markets in Africa. It then applies an econometric model to analyze the key determinants of African government securities market and corporate bond market capitalization. Government securities market capitalization is directly related to better institutions and interest rate volatility, and inversely related to the fiscal balance, higher interest rate spreads, exchange rate volatility, and current and capital account openness. Corporate bond market capitalization is directly linked to economic size, the level of development of the economy and financial markets, better institutions, and interest rate volatility, and inversely related to higher interest rate spreads and current account openness. Policy implications follow.

### **Estimating the Costs of Financial Regulation**

Mr. Andre Santos, Douglas Elliott, 2012-09-11 Staff Discussion Notes showcase the latest policy-related analysis and research being developed by individual IMF staff and are published to elicit comment and to further debate. These papers are generally brief and written in nontechnical language, and so are aimed at a broad audience interested in economic policy issues. This Web-only series replaced Staff Position Notes in January 2011.

### *Why House Price Indexes Differ* Mick

Silver, 2012-05-01 A key element in the build-up to the global recession and subsequently was the movement in house price indexes (HPIs). These

indexes are particularly prone to methodological and coverage differences which can undermine both within-country and cross-country economic analysis. The paper outlines key measurement issues and reports on empirical work using an international panel data set that (i) considers whether differences in HPI measurement matter and, if so, in what way, and (ii) revisits the measurement of global house price inflation and the modeling of the determinants of house price inflation using HPIS corrected for differences in measurement practice.
