Practical tips are provided throughout the book on topics such as tone, perspective and colour. Readers are encouraged to discover the ways in which similar subjects and styles are executed by different artists, while also being inspired to use the tips in the book as a way of building on existing skills. Organised into chapters according to the technique exemplified - line, tone, colour, wash, shading and mixed media—artwork is featured large and luscious, accompanied by extended captions, insightful tips and practical advice. Perspective for Painters Howard Etter, Margit Malmstrom, 1993 A knowledge of perspective is invaluable to any painter working in a realistic style. Systems of perspective can be applied by mechanical techniques or by freehand. Since the best approach for the beginner is to learn basic mechanical drawing methods, the reader is shown how to work out these systems with drafting tools. Once these are understood, they can be applied to freehand work, so that the artist has a great deal of control when representing objects in space.

The Art History of the Ming Dynasty Li Shi, The book is the volume of “The Art History of the Ming Dynasty” among a series of books of “Deep into China Histories”. The earliest known written records of the history of China date from as early as 1250 BC, from the Shang dynasty (c. 1600–1046 BC) and the Bamboo Annals (296 BC) describe a Xia dynasty (c. 2070–1600 BC) before the Shang, but no writing is known from the period The Shang ruled in the Yellow River valley, which is commonly held to be the cradle of Chinese civilization. However, Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River. These Yellow River and Yangtze civilizations arose millennia before the Shang. With thousands of years of continuous history, China is one of the world's oldest civilizations, and is regarded as one of the cradles of civilization. The Zhou dynasty (1046–256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC, and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature and philosophy first developed during those troubled times. In 221 BC Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death, and was supplanted by the longer-lived Han dynasty (206 BC – 220 AD). Successive dynasties developed bureaucratic systems

that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men, well-versed in calligraphy, history, literature, and philosophy, were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644–1912), which was replaced by the Republic of China in 1912, and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace, and periods of war and failed statehood – the most recent being the Chinese Civil War (1927–1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras control stretched as far as Xinjiang and Tibet, as at present. Traditional culture, and influences from other parts of Asia and the Western world (carried by waves of immigration, cultural assimilation, expansion, and foreign contact), form the basis of the modern culture of China.

Chinese Brush Painting Mei Ruo, 2020-01-14 Try your hands at these historically and culturally important methods, and create some beautiful paintings of your own. Chinese painting is an ancient art that has evolved and become refined over many centuries. Artists brush ink and color pigments onto silk or paper using a variety of techniques, with two main approaches: gongbi a traditional and realistic style based on line drawing, and xieyi style, a freehand method that uses fewer strokes to suggest objects in a less literal way. Painting themes generally fall into three categories: figure, landscaping, and bird-and-flower. Chinese brush painting is mainly presented in lines, shades and white space to express the feelings about nature, social phenomena, and the very essence of the universe. The framework for this expression is often traditional: certain subjects carry cultural connotations that are well-known and imbue the painting with a layer of meaning beyond face value of objects shown. The traditional subjects such as mandarin ducks, butterflies, and the 'Four Gentlemen' (plum blossoms, orchids, bamboos, and chrysanthemum) are examples that contain this rich cultural meaning. Readers will learn first about the tools and materials, then painting techniques. Early pages explore the very basic painting methods and subjects—perfect for beginning painters—but continue to build skills for painting plants and animals of increasing complexity. Chinese Brush Painting

illustrates several Chinese brush painting techniques with the use of different tools, brushwork and color mixing. With the step-by-step projects, you can first follow the introductory lessons to learn the necessary skills of brushwork, usage of paper, and characteristics of water, ink and colors; then follow the advanced lessons to learn the compositions and more complicated color applications.

Painting Architecture Leqi Yu, 2022-06-20 In *Painting Architecture: Jiehua in Yuan China, 1271–1368*, Leqi Yu has conducted comprehensive research on jiehua or ruled-line painting, a unique painting genre in fourteenth-century China. This genre relies on tools such as rulers to represent architectural details and structures accurately. Such technical consideration and mechanical perfection linked this painting category with the builder's art, which led to Chinese elites' belittlement and won Mongol patrons' admiration. Yu suggests that painters in the Yuan dynasty made new efforts towards a unique modular system and an unsurpassable plain-drawing tradition. She argues that these two strategies made architectural paintings in the Yuan dynasty entirely different from their predecessors, as well as making the art form extremely difficult for subsequent painters to imitate. "Architecture has been a subject of Chinese painting for two millennia, but has remained elusive. *Painting Architecture* explains the reasons as well as why the thirteenth and fourteenth centuries are pivotal. The book also translates the vast writings on architectural painting, places the paintings in historical context, and assesses the relation between the paintings and actual buildings. The superior scholarship and original interpretation ensure that paintings of architecture will be part of future discourse about Chinese painting." —Nancy Steinhardt, professor, University of Pennsylvania "Focusing on the

development of jiehua in the fourteenth century when the Mongols ruled China, Yu’s book raises issues beyond the field of painting history, including architectural history, aesthetics, and social-historical studies. It is a long-awaited contribution to a rarely studied painting genre and an admirable accomplishment of multidisciplinary research on Chinese art.” –Qianshen Bai, associate professor emeritus, Boston University
