**Metric Power** David Beer,2016-07-30 This book examines the powerful and intensifying role that metrics play in ordering and shaping our everyday lives. Focusing upon the interconnections between measurement, circulation and possibility, the author explores the interwoven relations between power and metrics. He draws upon a wide-range of interdisciplinary resources to place these metrics within their broader historical, political and social contexts. More specifically, he illuminates the various ways that metrics implicate our lives – from our work, to our consumption and our leisure, through to our bodily routines and the financial and organisational structures that surround us. Unravelling the power dynamics that underpin and reside within the so-called big data revolution, he develops the central concept of Metric Power along with a set of conceptual resources for thinking critically about the powerful role played by metrics in the social world today.

**NGO Accountability** Lisa Jordan,Peter van Tuijl,2012-05-04 As the fastest growing segment of civil society, as well as featuring prominently in the global political arena, NGOs are under fire for being 'unaccountable'. But who do NGOs actually represent? Who should they be accountable to and how? This book provides the first comprehensive examination of the issues and politics of NGO accountability across all sectors and internationally. It offers an assessment of the key technical tools available including legal accountability, certification and donor-based accountability regimes, and questions whether these are appropriate and viable options or attempts to 'roll-back' NGOs to a more one-dimensional function as organizers of national and global charity. Input and case studies are provided from NGOs such as ActionAid, and from every part of the globe including China, Indonesia and Uganda. In the spirit of moving towards greater accountability the book looks in detail at innovations that have developed from within NGOs and offers new approaches and flexible frameworks that enable accountability to become a reality for all parties worldwide.

**Sir Percy Leads the Band** Emmuska Orczy,2021-11-09 Sir Percy Leads the Band by Emmuska Orczy is a riveting tale set against the backdrop of France's tumultuous history. The narrative follows the enigmatic Sir Percy Blakeney, a fictitious character, as he navigates the challenges and intrigues of a nation in turmoil. Orczy's masterful storytelling and deep understanding of historical events make this novel a must-read for fans of historical fiction and those intrigued by the complexities of human nature.

**Bank 2.0** Brett King,2010 The financial crisis is just beginning for retail institutions. Ninety to ninety-five per cent of bank transactions are executed electronically today. The Internet, ATMs, call centres and smartphones have become mainstream for customers. But banks still classify these as alternative channels and maintain an organisation structure where Branch dominates thinking. Continued technology innovations, Web 2.0, social networking, app phones and mobility are also stretching traditional banking models to the limit. BANK 2.0 reveals why customer behaviour is so rapidly changing, how branches will evolve, why cheques are disappearing, and why your mobile phone will replace your wallet all within the next 10 years.

**Communicating Protected Areas** Denise Hamú,Elisabeth Auchincloss,Wendy Goldstein,2004 Protected areas operate within complex ecological and social systems, presenting challenges that cannot be resolved by technical solution alone. Achieving the management objectives of protected areas requires a social approach in which strategic communication is a key instrument. This publication explores the often underestimated potential of communication, sharing valuable experiences from protected areas across the world, drawing on papers presented at the Vth IUCN World Parks Congress, 2003 and others.

Ada Twist, Scientist Andrea Beaty,2016-09-06 A #1 New York Times Bestseller A Wall Street Journal Bestseller A USA Today Bestseller The creators of the New York Times bestselling picture books *Rosie Revere, Engineer* and *Iggie Peck, Architect* are back with a story about the power of curiosity in the hands of a child who is on a mission to use science to understand her world. *Ada Twist, Scientist*, from powerhouse team Andrea Beaty and David Roberts, is a celebration of STEM, perseverance, and passion. Like her classmates, builder Iggie and inventor Rosie, scientist Ada, a character of color, has a boundless imagination and has always been hopelessly curious. Why are there pointy things stuck to a rose? Why are there hairs growing inside your nose? When her house fills with a horrific, toe-curling smell, Ada knows it's up to her to find the source. What would you do with a problem like this? Not afraid of failure, Ada embarks on a fact-finding mission and conducts scientific experiments, all in the name of discovery. But, this time, her experiments lead to even more stink and get her into trouble! Inspired by real-life makers such as Ada Lovelace and Marie Curie, *Ada Twist, Scientist* champions girl power and women scientists, and brings welcome diversity to picture books about girls in science. Touching on themes of never giving up and problem solving, Ada comes to learn that her questions might not always lead to answers, but rather to more questions. She may never find the source of the stink, but with a supportive family and the space to figure it out, she'll be able to feed her curiosity in the ways a young scientist should. Iggie Peck and Rosie Revere have earned their places among the most beloved children's characters, and they have inspired countless kids and adults to follow their dreams and passions. Now in her own charming and witty picture book, determined *Ada Twist*, with her boundless curiosity for science and love of the question "Why?," is destined to join these two favorites. The book is the perfect tool to remind both young girls and women that they have the intelligence and perseverance to achieve their dreams.

*Shanghai Year* Peter Brigg,1987-01-01 This book represents snapshots of Shanghai with speculations on their meaning as China opens to the West and undergoes yet another shift towards modernity.

Fragments of Tom J. H. Wallder,2015-05 Everyone wanted a piece of Tom. Kate certainly did. She reckoned just one more night and it would have been a different story. If she could have rekindled his childhood infatuation she would have made sure he put in for an Officer's commission. Maybe then he wouldn't have died a foot soldier's death in 1944 crouching behind a doomed Mk. 4 Churchill tank. Vera had Tom to herself for two whole years. Or so she thought. She bore him twin sons though he went to his warrior's grave never knowing. But if he never knew, who was the faceless spectre in the shadows at his eldest son's wedding? Then there was Tom's mother Flo. She simply couldn't let him die. She'd struggled too hard as a lone parent in the hungry 1930s to let him go. Their paranormal relationship continued for 40 years after his earthly death. This story puts the fragments together - and discovers the true persona of Tom Harman.

**Rosie Revere, Engineer** Andrea Beaty,2013-09-03 New York Times Bestseller Rosie may seem quiet during the day, but at night she's a brilliant inventor of gizmos and gadgets who dreams of becoming a great engineer. When her great-great-aunt Rose (Rosie the Riveter) comes for a visit and mentions her one unfinished goal—to fly—Rosie sets to work building a contraption to make her aunt's dream come true. But when her contraption doesn't fly but rather hovers for a moment and then crashes, Rosie deems the invention a failure. On the contrary, Aunt Rose insists that Rosie's contraption was a raging success: you can only truly fail, she explains, if you quit. From the powerhouse author-illustrator team of Iggie Peck, *Architect* comes *Rosie Revere, Engineer*, another charming, witty picture book about believing in yourself and pursuing your passion. *Ada Twist, Scientist*, the companion picture book featuring the next kid from Iggie Peck's class, is available in September 2016.!--?xml:namespace prefix = o ns = urn:schemas-microsoft-com:office:office /-- Praise for *Rosie Revere, Engineer*Comically detailed mixed-media illustrations that keep the mood light and emphasize Rosie's creativity at every turn.—Publishers Weekly The detritus of Rosie's

collections is fascinating, from broken dolls and stuffed animals to nails, tools, pencils, old lamps and possibly an erector set. And cheddar-cheese spray. —Kirkus Reviews This celebration of creativity and perseverance is told through rhyming text, which gives momentum and steady pacing to a story, consistent with the celebration of its heroine, Rosie. She's an imaginative thinker who hides her light under a bushel (well, really, the bed) after being laughed at for one of her inventions. —Booklist Award 2013 Parents' Choice Award - GOLD 2014 Amelia Bloomer Project List ReadBoston's Best Read Aloud Book

**Grey Funnel Lines** Cyril Tawney, 2015-12-22 Originally published in 1987. In this book we find songs reflecting every aspect of life in the twentieth-century Royal Navy, both upper and lower deck: war, ship's routine, aviation, submarines, the antics of dockyard personnel, not to mention the matelot's shore-going adventures, both amorous and bibulous. The compiler was well-known as a folk-singer, though he began his career in the Royal Navy. Based on his personal collection of Navy songs, this book proves that the sailor's muse did not desert him with the passing of the sailing ship. It also dispels the notion that the modern Jack Tar, when he produces any songs at all, confines himself to the pornographic. With the songs, Cyril Tawney interweaves a commentary on the Royal Navy setting, providing a backdrop to the sailor's own words. This book is of enduring appeal to all who have served as well as to students of twentieth-century oral tradition.

**Iggy Peck, Architect** Andrea Beaty, 2016-02-01 A hilarious, irreverent book about doing your own thing Meet Iggy Peck—creative, independent, and not afraid to express himself! In the spirit of David Shannon's No, David and Rosemary Wells's Noisy Nora, Iggy Peck will delight readers looking for irreverent, inspired fun. Iggy has one passion: building. His parents are proud of his fabulous creations, though they're sometimes surprised by his materials—who could forget the tower he built of dirty diapers? When his second-grade teacher declares her dislike of architecture, Iggy faces a challenge. He loves building too much to give it up! With Andrea Beaty's irresistible rhyming text and David Roberts's puckish illustrations, this book will charm creative kids everywhere, and amuse their sometimes bewildered parents. Also from the powerhouse author-illustrator team of Iggy Peck, Architect, is Rosie Revere, Engineer, a charming, witty picture book about believing in yourself and pursuing your passion. Ada Twist, Scientist, the companion picture book featuring the next kid from Iggy Peck's class, is available in September 2016.

*Popular Culture and New Media* David Beer, 2013-06-13 Popular culture and new media are deeply interwoven, yet they are often thought of as separate spheres. This book explores the material and everyday intersections between popular culture and new media. Using a range of interdisciplinary resources the chapters open up a series of hidden dimensions – including objects and infrastructures, archives, algorithms, data play and the body – that force us to rethink our understanding of culture as it is today. Through an exploration of its intersections with new media, this book reveals the centrality of data circulations in the formation, organization and relations of popular culture. It shows how digital data accumulate as a result of our routine engagements with culture. It then examines the ways that these data fold-back into culture through algorithmic process, through play and through mediated bodily experiences. The book asks how we might conceptualize and understand culture as it continues to be reshaped by these recursive circulations of data.
