Haitian Creole-English Dictionary Jean Targète,Raphael G. Urciolo,1993

The Brill Dictionary of Gregory of Nyssa Lucas Francisco Mateo Seco,Giulio Maspero,2010 The Brill Dictionary of Gregory of Nyssa is the fruit of wide-ranging collaboration between experts in Philology, Philosophy, History and Theology. These scholars shared the desire to develop a comprehensive reference work that would help attract more people to the study of the 'Father of Fathers' and assist them in their work. Gregory of Nyssa's thought is at once quintessentially classic and modern, as it speaks directly to the contemporary reader. As interest in Gregory has increased along with the number of works devoted to him, the need for a comprehensive introduction and bibliographical reference work has arisen. In order to meet this need, more than forty scholars from various disciplines and perspectives have contributed to this work. In two hundred articles, the Brill Dictionary of Gregory of Nyssa provides a symphonic vision of the studies on Gregory of Nyssa and his thought.

On the Soul and the Resurrection Gregory of Nyssa,2015-02-18 Saint Gregory of Nyssa (335 - 395), wrote this classic upon the death of his brother, Saint Basil the Great.

Substrata Versus Universals in Creole Genesis Pieter Muysken,Norval

Smith,1986-01-01 Two of the most prominent hypotheses about why the structures of the Creole languages of the Atlantic and the Pacific differ are the universalist and the substrate hypotheses. The universalist hypothesis claims, essentially, that the particular grammatical properties of Creole languages directly reflect universal aspects of the human language capacity, and thus Creole genesis involves, then, the stripping away of the accretions of language history. The substrate hypothesis claims, on the other hand, that creole genesis results from the confrontation of two systems, the native languages of the colonized groups, and the dominant colonial language, and that the native language leaves strong traces in the resulting Creole. The contributions of this ground breaking collection present new and historical research on the old debate of substrata versus

universals in Creole languages.

The Haitian Creole Language Arthur K. Spears, Carole M. Berotte Joseph, 2010 The Haitian Creole Language is the first book that deals broadly with a language that has too long lived in the shadow of French. With chapters contributed by the leading scholars in the study of Creole, it provides information on this language's history; structure; and use in education, literature, and social interaction. Although spoken by virtually all Haitians, Creole was recognized as the co-official language of Haiti only a little over twenty years ago. The Haitian Creole Language provides essential information for professionals, other service providers, and Creole speakers who are interested in furthering the use of Creole in Haiti and the Haitian diaspora. Increased language competencies would greatly promote the education of Creole speakers and their participation in the social and political life of their countries of residence. This book is an indispensable tool for those seeking knowledge about the centrality of language in the affairs of Haiti, its people, and its diaspora.

Christianity and Classical Culture Jaroslav Pelikan, 1993-01-01 The momentous encounter between Christian thought and Greek philosophy reached a high point in fourth-century Byzantium, and the principal actors were four Greek-speaking Christian thinkers whose collective influence on the Eastern Church was comparable to that of Augustine on Western Latin Christendom. In this erudite and informative book, a distinguished scholar provides the first coherent account of the lives and writings of these so-called Cappadocians (named for a region in what is now eastern Turkey), showing how they managed to be Greek and Christian at the same time. Jaroslav Pelikan describes the four Cappadocians--Gregory of Nazianzus, Basil of Caesarea, Gregory of Nyssa, and Macrina, sister and teacher of the last two--who were trained in Classical culture, philosophy, and rhetoric but who were also defenders and expositors of Christian orthodoxy. On one issue of faith and life after another--the nature of religious language, the ways of knowing, the existence of God, the universe as cosmos, time, and space, free will and immortality, the nature of the good life, the purpose of the universe--they challenged and debated the validity of the Greek philosophical tradition in interpreting Scripture. Because the way they resolved these issues became the very definition of normative Christian belief, says Pelikan, their system is still a key to our understanding not only of Christianity's diverse religious traditions but also of its intellectual and philosophical traditions. This book is based on the prestigious Gifford Lectures, presented by Jaroslav Pelikan at the University of Aberdeen in 1992 and 1993.

Issues in the Study of Pidgin and Creole Languages Claire Lefebvre, 2004-02-26 The content of this book is concerned with various issues at stake in Creole studies that are also of interest for general linguistics. These include the general issue of Creole genesis and of the accelerated linguistic change that characterizes the emergence of these languages as compared to ordinary cases of linguistic change, the problem of the development of morphology in incipient Creoles, the problem of the validity of data in linguistic analysis, the issue of multifunctionality as regards the concept of lexical entry, the question of whether Creole languages are semantically more transparent than languages not known as Creoles, the issue of whether Creole languages constitute a typologically identifiable class and the problem of the interaction between the processes involved in the emergence and development of Creole languages. The purpose of this book is to present the major debates that are currently taking place in the field of Creole studies; evaluate the arguments against data (mainly drawn from Haitian Creole); and

address the issues at stake within the framework of new paradigms. The various positions on each issue are summarized on the basis of a thorough review of the literature.

Translator's Workbench Marianne Kugler, Khurshid Ahmad, Gregor

Thurmair, 2013-11-09 The Translator's Workbench Project was a European Community sponsored research and development project which dealt with issues in multi-lingual communication and documentation. This book presents an integrated toolset as a solution to problems in translation and documentation. Professional translators and teachers of translation were involved in the process of software development, starting with a detailed study of the user requirements and ending with several evaluation-and-improvement cycles of the resulting toolset. English, German, Greek, and Spanish are addressed in the contributions, however, some of the techniques are inherently language-independent and can thus be extended to cover other languages as well. Translation can be viewed broadly as the execution of three cognitive processes, and this book has been structured along these lines: • First, the translation pre-process, understanding the target language text at a lexico semantic level on the one hand, and making sense of the source language document on the other hand. The tools for the pre-translation process include access to electronic networks, conversion of documents from one format to another, creation of terminology data banks and access to existing data banks, and terminology dictionaries. • Second, the translation process, rendering sentences in the source language into equivalent target sentences. The translation process refers to the potential of conventional machine translation systems, like METAL, and of the statistically oriented translation memory.

Longman Modern English Dictionary Owen Watson, 1980

Haitian Creole Albert Valdman, 2015 Haitian Creole is the creole language with the largest number of speakers: about ten million in Haiti and two million in diaspora communities in North America, France, and the Caribbean, including the Dominican Republic, Cuba, and the French overseas departments. Haitian Creole presents a comprehensive view of the structure and development of Haitian Creole. It provides a detailed analysis of the phonology and grammar of the language and points out key differences between these two fundamental aspects of the language and corresponding features of French, its original target language. The book contains a detailed description of the productive strategies of vocabulary development and deals with the origin of Haitian Creole, as well as its relationship to the other French-based creoles in Louisiana, the Caribbean, French Guiana, and the Indian Ocean. A signal innovation with regard to other descriptions of the language is the treatment of linguistic variation, both in geographical dialects and variation as determined by social factors, as well as the presentation of earlier forms of Haitian Creole, as attested by texts from the Colonial period. Another major contribution is the discussion of language planning and related issues concerning the use of Haitian Creole in education and its status relative to French, the other officially recognized language of Haiti.
