Michael J. Crawley

Eighteen Years in the Khyber, 1879-1898 Sir Robert Warburton, 1900 Sir Robert Warburton (1842-99) was a British army officer who served for 18 years as the political officer, or warden, of the Khyber Pass, the most important of the mountain passes connecting Afghanistan and present-day Pakistan. He was born in Afghanistan, the son of a British officer and his wife, a noble Afghan woman who was the niece of Amir Dost Mohammad Khan. Warburton was educated in England, commissioned an officer, and served at posts in British India and in Abyssinia (present-day Ethiopia) before being appointed, in 1879, to his post in the Khyber. Home to the fiercely independent Pushtun Afridi people who resisted external control, the pass frequently had been blocked by the Afridis or by fighting among the hill tribes. Warburton is credited with keeping the frontier peaceful and the pass open, mainly through diplomacy rather than force. He drew upon his Afghan background and his fluent Persian and Pushto to gradually win the trust of tribesmen whose traditions made them deeply suspicious of outsiders. In August 1897, one month after Warburton's retirement, unrest broke out among the Afridis, who seized the pass and held it for several months. Warburton was called back into service and participated in the Tirah expedition of 1897-98, in which Anglo-Indian forces reopened the pass. Warburton was especially proud of the role played in the expedition by the Khyber Rifles, a paramilitary force recruited from Afridi tribesmen that he had raised and commanded. *Eighteen Years in the Khyber, 1879-1898* is Warburton's account of his education and career. It touches upon virtually every individual and event that played a role in relations between Afghanistan and British India during the last quarter of the 19th century. Long in poor health, Warburton returned to England and died before the book was completed. Posthumously published, it is illustrated with a number of striking photographs and includes a detailed fold-out map of the Khyber.

Does the Name Pavlov Ring a Bell? Gary Blake, 2018-01-02 Everyone loves wordplay! This collection of more than eight hundred quips and pun-filled anecdotes will have your friends in stitches! Classics and new inventions fill these pages with humor and wit. Divided into chapters according to theme—animals, celebrities, careers, food, and so on—there's a pun for every occasion! Author Gary Blake dares you not to snicker at his contrivances: Two silk worms had a race. They ended up in a tie. Davy Crockett had three ears. A left ear, a right ear, and a wild frontier. A backwards poet writes inverse. Santa's helpers are subordinate Clauses. Like tavern owners, ballet dancers make most of their money at the barre. Horses in the movies only have bit parts. Why does the Pope travel so much? Because he's a roamin' Catholic. Absinthe makes the heart grow fonder. A Freudian slip is when you say one thing and mean your mother. Eve was the first person to eat herself out of house and home. I used to work in a blanket factory, but the company folded. The calendar thief only got twelve months. A great gift or coffee table book, there's no time like the present to order a copy of *Does the Name Pavlov Ring a Bell?* for the word-twisting, pun-loving humorist in your life.

Estates and Constitution István M. Szijártó, 2020-09-20 Across eighteenth-century Europe, political power resided overwhelmingly with absolute monarchs, with notable exceptions including the much-studied British Parliament as well as the frequently overlooked Hungarian Diet, which placed serious constraints on royal power and broadened opportunities for political participation. *Estates and Constitution* provides a rich account of Hungarian politics during this period, restoring the Diet to its rightful place as one of the era's major innovations in government. István M. Szijártó traces the religious, economic, and partisan forces that shaped the Diet, putting its historical significance in international perspective.

A Story Waiting to Pierce You Peter Kingsley, 2010 Revealing a forgotten truth in the present day, this account illuminates the crumbling political and economic structures of the West, shedding light on an ongoing and arduous search for a sense of purpose. Recounting a true story, this exploration tells of a wandering Mongol shaman who made a dramatic appearance around the Mediterranean centuries before the time of Christ. Highlighting how this nomad came as an envoy on a mission of purification, this study records how he met with a man who became tremendously influential in Western science, philosophy, culture, and religion: Pythagoras. The essence of Western civilization is said to have originated from this meeting and this examination argues that today's conflicts and tensions have stemmed from taking this monumental occasion for granted, forgetting that there must be a greater meaning to life than everyday efforts and struggles. Reflecting on a time when Eastern and Western cultures were one, this evocation contends that there is still a common spiritual heritage to all civilizations. A unique collaboration between the author and archaeologists, historians, and shamans from around the world, this document has the potential to change the future for all.

Springer Handbook of Odor Andrea Büttner, 2017-02-28 The Springer Handbook of Odor is the definitive guide to all aspects related to the study of smell and their impact on human life. For the first time, this handbook aligns the senso-chemo-analytical characterization of everyday smells encountered by mankind, with the elucidation of perceptual, hedonic, behavioral and physiological responses of humans to such odors. From birth onwards we learn to interact with our environment

using our sense of smell. Moreover, evolutionary processes have engendered a multi-faceted communication that is supported – even dominated – by olfaction. This compilation examines the responses of humans to odors at different stages of life, thereby building a foundation for a widely overseen area of research with broader ramifications for human life. The expert international authors and editor align aspects, concepts, methodologies and perspectives from a broad range of different disciplines related to the science of smell. These include chemistry, physiology, psychology, material sciences, technology but also disciplines related to linguistics, culture, art and design. This handbook, edited by an internationally renowned aroma scientist with the support of an outstanding team of over 60 authors, is an authoritative reference for researchers in the field of odors both in academia and in industry and is also a useful reference for newcomers to the area.

Metabolism in Cancer Thorsten Cramer, Clemens A. Schmitt, 2016-08-24 This textbook presents concise chapters written by internationally respected experts on various important aspects of cancer-associated metabolism, offering a comprehensive overview of the central features of this exciting research field. The discovery that tumor cells display characteristic alterations of metabolic pathways has significantly changed our understanding of cancer: while the first description of tumor-specific changes in cellular energetics was published more than 90 years ago, the causal significance of this observation for the pathogenesis of cancer was only discovered in the post-genome era. The first 10 years of the twenty-first century were characterized by rapid advances in our grasp of the functional role of cancer-specific metabolism as well as the underlying molecular pathways. Various unanticipated interrelations between metabolic alterations and cancer-driving pathways were identified and currently await translation into diagnostic and therapeutic applications. Yet the speed, quantity, and complexity of these new discoveries make it difficult for researchers to keep up to date with the latest developments, an issue this book helps to remedy.

Strengthening Forensic Science in the United States National Research Council, Division on

Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Born a Crime Trevor Noah, 2016-11-15 #1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A "brilliant" (Lupita Nyong'o, *Time*), "poignant" (*Entertainment Weekly*), "soul-nourishing" (*USA Today*) memoir about coming of age during the twilight of apartheid "Noah's childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa's history that must never be forgotten."—*Esquire* Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by *The New York Times*, *USA Today*, *San Francisco Chronicle*, *NPR*, *Esquire*, *Newsday*, and *Booklist* Trevor Noah's unlikely path from apartheid South Africa to the desk of *The Daily Show* began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents' indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa's tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. *Born a Crime* is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man's relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an

incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's unconventional, unconditional love.
