Fresh Kills Martin V. Melosi, 2020-01-28 Fresh Kills—a monumental 2,200-acre site on Staten Island—was once the world's largest landfill. From 1948 to 2001, it was the main receptacle for New York City's refuse. After the 9/11 attacks, it reopened briefly to receive human remains and rubble from the destroyed Twin Towers, turning a notorious disposal site into a cemetery. Today, a mammoth reclamation project is transforming the landfill site, constructing an expansive park three times the size of Central Park. Martin V. Melosi provides a comprehensive chronicle of Fresh Kills that offers new insights into the growth and development of New York City and the relationship among consumption, waste, and disposal. He traces the metamorphoses of the landscape, following it from salt marsh to landfill to cemetery and looks ahead to the future park. By centering the problem of solid-waste disposal, Melosi highlights the unwanted consequences of mass consumption. He presents the Fresh Kills space as an embodiment of massive waste, linking consumption to the continuing presence of its discards. Melosi also uses the landfill as a lens for understanding Staten Island's history and its relationship with greater New York City. The first book on the history of the iconic landfill, *Fresh Kills* unites environmental, political, and cultural history to offer a reflection on material culture, consumer practices, and perceptions of value and worthlessness.

A Field Guide to Methodist Fresh Expressions  
Michael Adam Beck, 2020-03-23 According to Fresh

Expressions U.S., a Fresh Expression is a form of church for our changing culture, established primarily for the benefit of those who are not yet part of any church. Fresh Expressions are introducing people to Jesus, expanding the kingdom, and revitalizing churches. Congregations need a practical and theological resource that can help them cultivate Fresh Expressions. As consultants who work nationwide and as innovative pastors, authors Michael Beck and Jorge Acevedo awaken congregational leaders and ministry teams to a distinctive Wesleyan approach for the Fresh Expressions movement. In Wesleyan Fresh Expressions, they show congregations how to cultivate and customize fresh expressions that fit their local context. They motivate ministry teams to take risks, experiment, and when necessary, fail well. On April 2, 1739, John Wesley went to a field just outside what was then the city limits of Bristol, England. There he tried a missional innovation called field preaching. Thousands of people showed up, many of whom who had no connection with a church. Today, most Methodists and other Wesleyans don't know their own story. Lost in the milieu of divisive issues that threaten to tear the church apart, Wesleyans have forgotten their DNA as a renewal movement, born not from doctrinal disputes but from a missional imperative. In this sense, the Fresh Expressions movement is the most "Methodist" thing in the denomination today. This iteration of the Spirit is taking it to the fields again. Wesleyan Fresh Expressions will help guide the way.

**Farm Fresh Broadband** Christopher Ali, 2021-09-21

An analysis of the failure of U.S. broadband policy to solve the rural-urban digital divide, with a proposal for a new national rural broadband plan. As much of daily life migrates online, broadband-high-speed internet connectivity-has become a necessity. The widespread lack of broadband in rural America has created a stark urban-rural digital divide. In Farm Fresh Broadband, Christopher Ali analyzes the promise and the failure of national rural broadband policy in the United States and proposes a new national broadband plan. He examines how broadband policies are enacted and implemented, explores business models for broadband providers, surveys the technologies of rural broadband, and offers case studies of broadband use in the rural Midwest. Ali argues that rural broadband policy is both broken and incomplete: broken because it lacks coordinated federal leadership and incomplete

because it fails to recognize the important roles of communities, cooperatives, and local providers in broadband access. For example, existing policies favor large telecommunication companies, crowding out smaller, nimbler providers. Lack of competition drives prices up—rural broadband can cost 37 percent more than urban broadband. The federal government subsidizes rural broadband by approximately \$6 billion. Where does the money go? Ali proposes democratizing policy architecture for rural broadband, modeling it after the wiring of rural America for electricity and telephony. Subsidies should be equalized, not just going to big companies. The result would be a multistakeholder system, guided by thoughtful public policy and funded by public and private support.

#### Fresh Start: The Rosewoods Series Prequel

Katrina Abbott, 2016-05-19 This book is FREE for download. Brooklyn Prescott (at least that's what it says on her passport) was living the life of a boring, unnoticeable girl. She was almost invisible at the school in London that she'd been attending for the past two years since her family moved from the States for her father's job. Nearly friendless and definitely boyfriendless, Brooklyn is gearing up to start her junior year when her father drops a huge bomb: she's returning to the States on her own to attend an exclusive boarding school. Because high school isn't hard enough, she's about to become the new girl at The Rosewood Academy for Academic Excellence, a school for the kids of the rich and famous. Terrified of what that's going to mean for her social life (though

really, it couldn't be much worse) Brooklyn knows she has no choice and prepares herself for whatever is to come. But the trip back to America--what promised to be a long and boring overseas flight--is anything but boring and instead turns into the kind of pivotal experience a girl will remember forever. For new readers, enjoy this introduction to The Rosewoods, an exciting romantic Young Adult series for readers who love fun, flirty love stories. ### **Advanced Planning in Fresh Food Industries**

Matthias Lütke Entrup, 2006-03-30 Production planning in fresh food industries is a challenging task. Although modern Advanced Planning and Scheduling (APS) systems could provide significant support, APS implementation numbers in these industries remain low. Therefore, based on an in-depth analysis of three sample fresh food industries (dairy, fresh and processed meat), the author evaluates what APS systems should offer in order to effectively support production planning and how the leading systems currently handle the most distinguishing characteristic of fresh food industries, the short product shelf life. Starting from the identified weaknesses, customized software solutions for each of the sample industries are proposed that allow to optimize the production of fresh foods with respect to shelf life. The book thereby offers valuable insights not only to researchers but also to software providers of APS systems and professionals from fresh food industries.

Chosen Michelle McClain-Walters, 2019-09-03 MANY ARE CALLED, BUT YOU ARE CHOSEN. This book will equip you with prophetic insight and divine strategies that will jump-start you on the path toward destiny. There is a distinction between the called and the chosen, the many and the few. Who

are these people? How did they get exclusive access to the favor of God? They are confident and prosperous, generous and joyful. They live in the realm of miracles and the supernatural, as if the very breath of God is on every decision they make in life. One season after the next they are catapulted to new levels in life. All they do is win and trample over challenges, disappointments, and attacks from the enemy, while others still remain at the starting line, awaiting breakthrough. In her book Michelle McClain-Walters shows readers just what this distinction is and how they can live in the fullness of their identity as God's chosen ones. Built on the words of Christ in John 15:16—"You did not choose me, but I chose you and appointed you so that you might go and bear fruit—fruit that will last—and so that whatever you ask in my name the Father will give you"—and Matthew 22:14—"Many are called but few are chosen"—Chosen is a revelation of the spiritual force behind the life of the next-level believer. Choose now and declare, "I am chosen!" and watch as the mysteries of heaven are opened to you. **HashiCorp Packer in Production** John Boero, Armon Dadgar, 2023-07-14 Set up automated workflows to keep systems and applications consistent globally, regardless of architecture, cloud, or container runtime Purchase of the print or Kindle book includes a free PDF eBook Key Features Automate building and modifying complex software images across multiple OSs and container engines Minimize cost by keeping your systems ready across multiple architectures, including ARM and future RISC-V processors Speed up your time to market by building and testing apps using upstream and future releases Book Description Creating machine images can be time-consuming and error-prone when done manually. HashiCorp Packer enables you to automate this process by defining the configuration in a simple, declarative syntax. This configuration is then used to create machine images for multiple environments and cloud providers. The book begins by showing you how to create your first manifest while helping you understand the available components. You'll then configure the most common built-in builder options for Packer and use runtime provisioners to reconfigure a source image for desired tasks. You'll also learn how to control logging for troubleshooting errors in complex builds and explore monitoring options for multiple logs at once. As you advance, you'll build on your initial manifest for a local application that'll easily migrate to another builder or cloud. The chapters also help you get to grips with basic container image options in different formats while scaling large builds in production. Finally, you'll

develop a life cycle and retention policy for images, automate packer builds, and protect your production environment from nefarious plugins. By the end of this book, you'll be equipped to smoothen collaboration and reduce the risk of errors by creating machine images consistently and automatically based on your defined configuration. What you will learn Build and maintain consistent system images across multiple platforms Create machine images that can be used in multiple environments Write a spec for a local Packer virtual machine in JSON and HCL Build a container image with Packer in different formats Automate Packer with continuous delivery pipelines Discover how to customize Packer by writing plugins Who this book is for This book is for DevOps engineers, Cloud engineers, and teams responsible for maintaining platform and application images for enterprise private, hybrid, or multi-cloud environments. Familiarity with operating systems and virtualization concepts, with or without using a cloud provider, is a prerequisite.

Deliverance from Witchcraft The Woman called Moses, 2018-06-09 This book is an exposé from God's record in the Bible of what is happening in the spiritual realm that is causing families and nations to be torn apart. God states that he is against manipulation and oppression and calls it witchcraft. The book awakens one's awareness of the contrasts of darkness versus light. It addresses modern-day family dynamics and outlines my personal journey as a victim of manipulation and how I was able to overcome it when I accepted Jesus Christ, the light of the world, as my personal Savior. My Heavenly Father warned me through a series of dreams and visions about the devil's plans to destroy my life and taught me through his precious Holy Spirit how to overcome it. This is my opportunity to expose the plans that the devil has for families nationwide and worldwide, thereby giving those who have lost their way an opportunity to receive healing, deliverance, and restoration.
