Dangerous Secrets Abbie Zanders,2014-11-19 Taryn Malone is stranded, broke, and desperate for help. But even if the sexy bartender she's been eying offers her a job for the evening ... even if he seduces her with his impossibly intense blue eyes ... even if every fiber of her heart tells her to stay with him ... she can't. Because Taryn Malone doesn't exist.

MontiArc - Architectural Modeling and Simulation of Interactive Distributed Systems Arne Haber,2016-09-02 Formal ADLs offer great potential to analyse the architecture of a system, predict the overall performance by using simulations, and allow to automatically generate parts of the implementation. Nevertheless, ADLs are rather not used in industrial practice since several problems hinder to exploit their potential to the full extend. This thesis elaborates the design of an ADL that copes with these impediments of ADLs in practice. Therefore, the design of a lightweight ADL is derived which also provides well defined extension points to be adapted to a certain domain or development process. Furthermore, it is investigated how architectural modeling can be enriched with agile development methods to support incremental modeling and the validation of system architectures. Therefore, a set detailed of requirements for architectural modeling and the simulation of system architectures is defined and MontiArc, a concrete ADL to model logical architectures of distributed, interactive systems, is derived. The language is based on the mathematical FOCUS [BS01] framework, which allows to simulate modeled systems in an event-based style. Code generators and a simulation framework provide means to continuously refine and test architectural models. To add new features or adapt the language to a new domain, a corresponding language extension method is presented to extend the syntax, language processing tools, and code generators of the ADL. A lightweight model library concept is presented which allows to develop and reuse component models and their implementation in a controlled and transparent way. The developed language, the simulator, and the language extension techniques have been examined in several case studies which either used or extended MontiArc.

**Concussion Inc.** Irvin Muchnick,2015-02-01 Inside the most controversial issue in sports Traumatic brain injury in football is not incidental, but an inevitable and central aspect of the sport. Starting in high school, through college, and into the NFL, young players face repeated head trauma, and those sustained injuries create lifelong cognitive and functional difficulties. Muchnick's Concussion Inc. blog exposed the decades-long cover-up of scientific research into sports concussions and the ongoing denial to radically reform football in North America. This compilation from Muchnick's no-holds-barred investigative website reveals the complete head injury story as it developed, from the doctor who played fast and loose with the facts about the efficacy of the state-mandated concussion management system for high school football players, to highly touted solutions that are more self-serving cottage industry than of any genuine benefit. Known for extensive reporting on the tragic story of the Chris Benoit murder-suicide, Muchnick turns his investigative analysis to traumatic brain injury and probes deep into the corporate, government, and media corruption that has enabled the \$10-billion-a-year National Football League to trigger a public health crisis.

Reagents in Mineral Technology P. Somasundaran,2018-04-27 Reagents in Mineral Technology provides comprehensive coverage of both basic as well as applied aspects of reagents utilized in the minerals industry. This outstanding, single-source reference opens with an explicit account of flotation fundamentals, including coverage of wetting phenomena, mineral/water interfacial phenomena, flotation chemistry, and flocculation and dispersion of mineral suspensions. It then discusses flotation of sulfide and nonsulfide minerals, with attention to formation of clathrates, formation of metal thiol compounds, application of fatty acids, sulfosuccinic acids, amines, and other collectors. Reagents in Mineral Technology also reviews adsorption of surfactants on minerals ... details adsorption of polymers ... and considers the chemistry and application of chelation agents in mineral separations. Additional chapters consider grinding aids, frothers, inorganic and polymeric depressants, dewatering and filtering aids, analytical techniques, and much more. Unique in its depth of coverage, Reagents in Mineral Technology will prove an invaluable reference for mineral engineers and processors; analytical, surface, colloid, and physical chemists; petroleum, petrochemical, metallurgical, and mining engineers; and for use in advanced undergraduate- and graduate-level courses in these and related fields.

**The Mommy Shorts Guide to Remarkably Average Parenting** Ilana Wiles,2016-09-27 From the creator of the popular blog Mommy Shorts comes a "hilarious and comforting" look at real-world motherhood (New York Times bestselling author, Jill Smokler). Ilana Wiles is not a particularly good mother. She's not a particularly bad mother either. Like most of us, she's somewhere in between. And she has some surprisingly good advice about navigating life as an imperfect parent. In this witty and loving homage to the every-parent, Wiles suggests that they having the best child-rearing experience of all. Using Wiles's signature infographics and photographs to illustrate her personal and hilarious essays on motherhood, The Mommy Shorts Guide to Remarkably Average Parenting is an honest book that celebrates the fun of being a mom.

**Innovations in Flotation Technology** P. Mavros,Kostas A. Matis,2013-03-14 The present book is the outcome of an Advanced Study Institute meeting, which was held in Kallithea, Chalkidiki, in Northern Greece, from 12-25 May 1991 and attended by 69 delegates from 18 countries. The Institute brought together scientists, engineers and technologists currently involved in basic and applied research on the different aspects of flotation. The Institute covered subjects in four major areas of flotation: a) fundamentals; b) chemical technology aspects; c) mineral processing; and d) water and wastewater treatment. Apart from the papers reproduced in this volume, several short oral communications were also presented. Participants also had the opportunity to visit the Hellenic Chemical Products & Fertilizers Co. Ltd. mixed sulphides plant, in Chalkidiki. Conference participants, whose interest and research projects are in this broad field of science and engineering, provided a well-informed discussion of the problems encountered, as well as possible directions of future technological developments. It is hoped that this book is not only a good record of the presentations made (formal and informal), analyzing the state-of-the-art in flotation, but will also be helpful for students, scientists and technologists working in the fields of separation processes and in particular mineral processing and wastewater engineering. All the invited speakers and the participants made this summer school possible, worthwhile and enjoyable. The sponsorship by the NATO Scientific Affairs Division is gratefully acknowledged. The Editors would like to thank the members of the Organizing Committee, Dr. B.A.

**Herbivorous** Michael Natkin,2012-05-08 Vegetarian recipes from a food blogger with “a talent for enticing and boldly flavored creations, in recipes that are colorful, thoughtful, and fresh” (Heidi Swanson, New York Times–bestselling author of Super Natural Cooking). In Herbivorous: A Vegetarian Cookbook for People Who Love to Eat, food blogger Michael Natkin offers up 150 exciting recipes (most of which have not appeared on his blog) notable both for their big, bold, bright flavors and for their beautiful looks on the plate, the latter apparent in more than 80 four-color photos that grace the book. An indefatigable explorer of global cuisines, with particular interests in the Mediterranean and the Middle East and in East and Southeast Asia, Natkin has crafted, through years of experimenting in his kitchen and in loads of intensive give-and-take with his blog readers, dishes that truly are revelations in taste, texture, aroma, and presentation. You’ll find hearty main courses, ranging from a robust Caribbean Lentil-Stuffed Flatbread across the Atlantic to a comforting Sicilian Spaghetti with Pan-Roasted Cauliflower and around the Cape of Good Hope to a delectable Sichuan Dry-Fried Green Beans and Tofu. An abundance of soups, salads, sauces and condiments, sides, appetizers and small plates, desserts, and breakfasts round out the recipes. Natkin, a vegetarian himself, provides advice on how to craft vegetarian meals that amply deliver protein and other nutrients, and the imaginative menus he presents deliver balanced and complementary flavors, in surprising and utterly pleasing ways. The many dozens of vegan and gluten-free recipes are clearly noted, too, and an introductory chapter lays out the simple steps readers can take to outfit a globally inspired pantry of seasonings and sauces that make meatless food come alive.

Statistical Methods for Mineral Engineers - Tim Napier-Munn,Julius Kruttschnitt Mineral Research Centre,2014-10-01 Written by a mineral engineer for mineral engineers, and packed with real world examples, this book de-mystifies the statistics that most of us learned at university and then forgot. It shows how simple statistical methods, most of them available in Excel, can be used to make good decisions in the face of experimental uncertainty. Written in accessible language, it explains how experimental uncertainty arises from the normal measurement errors and how statistics provides a powerful methodology to manage that uncertainty. It assumes only that the readers are numerate, can use Excel, and want to do a better professional job. It is aimed squarely at mineral engineers and allied professionals (such as chemists) on the mine site, in head office, in engineering and supply companies and in universities. Most of the examples are illustrated in Excel but Minitab is also used for advanced techniques. The book includes over 100 Excel and Minitab hints. Example spreadsheets can be downloaded from the JKMRRC and JKTech websites.

**Craft Coffee** Jessica Easto,Andreas Willhoff,2017-11-14 “Build a better brew by mastering 10 manual methods, from French Press to Chemex, with this comprehensive guide.” —Imbibe Magazine Named a top food & drink book of 2017 by Food Network, Wired, Sprudge, and Booklist This comprehensive but accessible handbook is for the average coffee lover who wants to make better coffee at home. Unlike other coffee books, this one focuses exclusively on coffee—not espresso—and explores multiple pour-over, immersion, and cold-brew techniques on 10 different devices. Thanks to a small but growing number of dedicated farmers, importers, roasters, and baristas, coffee quality is at an all-time high. But for nonprofessionals, achieving café quality at home can seem out of reach. With dozens of equipment options, conflicting information on how to use that equipment, and an industry language that, at times, doesn’t seem made for the rest of us, it can be difficult to know where to begin. Craft Coffee: A Manual, written by a coffee enthusiast for coffee enthusiasts, provides all the information readers need to discover what they like in a cup of specialty coffee—and how to replicate the perfect cup day after day. From the science of extraction and brewing techniques to choosing equipment and deciphering coffee bags, Craft Coffee focuses on the issues—cost, time, taste, and accessibility—that home coffee brewers negotiate and shows that no matter where you are in your coffee journey, you can make a great cup at home. “Engaging and fun . . . I really can’t recommend Craft Coffee: A Manual enough. If you’re even mildly curious about brewing coffee at home, it’s absolutely worth a read.” —BuzzFeed
