Reconstructing Violence Deborah E. Barker,2015-11-11 In this bold study of cinematic depictions of violence in the south, Deborah E. Barker explores the ongoing legacy of the “southern rape complex” in American film. Taking as her starting point D. W. Griffith’s infamous Birth of a Nation, Barker demonstrates how the tropes and imagery of the southern rape complex continue to assert themselves across a multitude of genres, time periods, and stylistic modes. Drawing from Gilles Deleuze’s work on cinema, Barker examines plot, dialogue, and camera technique as she considers several films: The Story of Temple Drake (1933), Sanctuary (1958), Touch of Evil (1958), To Kill a Mockingbird (1962), and Cape Fear (1962). Placing this body of analysis in the context of the historical periods when these films appeared and the literary sources on which they are based, Barker reveals the protean power of cinematic racialized violence amid the shifting cultural and political landscapes of the South and the nation as a whole. By focusing on familiar literary and cinematic texts—each produced or set during moments of national crisis such as the Great Depression or the civil rights movement—Barker’s Reconstructing Violence offers fresh insights into the anxiety that has underpinned sexual and racial violence in cinematic representations of the South.

Silk Reeling and Testing Manual Yong-Woo Lee,Food and Agriculture Organization of the United Nations,1999 The continuous improvement and effective dissemination of the technology for silk reeling and testing are vital in meeting the ever increasing demand for quality raw silk throughout the world. This bulletin covers a wide range of techniques in the silk reeling industry. Details are given in each chapter on the handling of fresh cocoons, drying and storage of cocoons, cocoon boiling and reeling, raw silk-reeling and finishing, water quantity and quality, utilization of by-products and maintenance of the machinery used. An appendix illustrates the silkworm processes from larva to final production of silk.

Digital Audio Broadcasting Wolfgang Hoeg,Thomas Lauterbach,2004-01-09 Now the standardisation work of DAB (Digital Audio Broadcasting)system is finished many broadcast organisations, network providersand receiver manufacturers in European countries and outside ofEurope (for example Canada and the Far East) will be installing DABbroadcast services as pilot projects or public services. Inaddition some value added services (data and video services) areunder development or have already started as pilot projects. The new digital broadcast system DAB distinguishes itself fromexisting conventional broadcast systems, and the various newinternational standards and related documents (from ITU-R, ISO/IEC,ETSI, EBU, EUREKA147, and others) are not readily available and aredifficult to read for users. Therefore it is essential that a wellstructured technical handbook should be available. The Second Edition of Digital Audio Broadcasting has beenfully updated with new sections and chapters added to reflect allthe latest developments and advances. Digital Audio Broadcasting: Provides a fully updated comprehensive overview of DAB Covers international standards, applications and othertechnical issues Combines the expertise of leading researchers in the field ofDAB Now covers such new areas as: IP-Tunneling via DAB; ElectronicProgramme Guide for DAB; and Metadata A comprehensive overview of DAB specifically written forplanning and system engineers, developers for professional anddomestic equipment manufacturers, service providers, as well aspostgraduate students and lecturers in communicationstechnology.

Sorghum and Millets in Human Nutrition Food and Agriculture Organization of the United Nations,1995 The publication is broad in scope and coverage, starting with the history and nature of sorghum and millets and dealing with production, utilization and consumption. It provides extensive information on the nutritional value, chemical composition, storage and processing of these foods. In addition, the anti-nutritional factors present in these foods and ways of reducing their health hazards are discussed. The authors have described formulations of various popular foods prepared from sorghum and millets and their nutritional composition and quality, and they have compiled many recipes for the preparation of foods from regions where sorghum and millets are important dietary staples.

Storage Networks Explained Ulf Troppens,Rainer Erkens,Wolfgang Müller,2005-08-05 Storage Networks Explained has much to recommend it.... ararity in the literature of digital data storage - a completeexposition

of both the base subject matter and its applications, which at the same time offers a level of readability making it suitable as an introduction to the subject. *Storage Networks Explained* is also flexible. It can be read cover-to-cover, browsed, or used as a reference. I recommend *Storage Networks Explained* as an essential component of any active information technology library. —Paul Massiglia, Technical Director, VERITAS Software Corporation

Storage networks will become a basic technology like databases or local area networks. According to market research, 70% of external storage devices will be connected via storage networks in 2003. The authors have hands-on experience of network storage hardware and software, they teach customers about concrete network storage products, they understand the concepts behind storage networks, and show customers how storage networks address their business needs. Storage networks provide shared access to stored data from multiple computers and servers, thus increasing storage efficiency and availability. They permit information management functions such as backup and recovery, data mirroring, disaster recovery, and data migration to be performed quickly and efficiently, with a minimum of system overhead. This book explains how to use storage networks to fix malfunctioning business processes, covering the technologies as well as applications. A hot topic that will become increasingly important in the coming years. One of the first books to focus on using rather than building storage networks, and how to solve problems. Looking beyond technology and showing the true benefits of storage networks. Covers fibre channel SAN, Network Attached Storage, iSCSI and InfiniBand technologies. Contains several case studies (e.g. the example of a travel portal, protecting a critical database) Endorsed by the Storage Networking Industry Association. Written by very experienced professionals who tailored the book specifically to meet customer needs including support with supplementary material on Troppens website and Preface written by Tony Clark. Provides basic application information key for systems administrators, database administrators and managers who need to know about the networking aspects of their systems. As well as systems architects, network managers, information management directors and decision makers. This book also supports applications for graduate students and other relevant courses in the field. Awarded Best System Administration Book 2005 by the Linux Journal

Python for Unix and Linux System Administration Noah Gift, Jeremy M. Jones, 2008-08-22 Python is an ideal language for solving problems, especially in Linux and Unix networks. With this pragmatic book, administrators can review various tasks that often occur in the management of these systems, and learn how Python can provide a more efficient and less painful way to handle them. Each chapter in *Python for Unix and Linux System Administration* presents a particular administrative issue, such as concurrency or data backup, and presents Python solutions through hands-on examples. Once you finish this book, you'll be able to develop your own set of command-line utilities with Python to tackle a wide range of problems. Discover how this language can help you: Read text files and extract information Run tasks concurrently using the threading and forking options Get information from one process to another using network facilities Create clickable GUIs to handle large and complex utilities Monitor large clusters of machines by interacting with SNMP programmatically Master the IPython Interactive Python shell to replace or augment Bash, Korn, or Z-Shell Integrate Cloud Computing into your infrastructure, and learn to write a Google App Engine Application Solve unique data backup challenges with customized scripts Interact with MySQL, SQLite, Oracle, Postgres, Django ORM, and SQLAlchemy With this book, you'll learn how to package and deploy your Python applications and libraries, and write code that runs equally well on multiple Unix platforms. You'll also learn about several Python-related technologies that will make your life much easier.
