The Key Codes of Fu Hsi & King Wen John C. Compton,2022-08-19 This book contains a series of research notes and graphical illustrations selected from the author's amazing research work. It shows how: · The Sixty-Four hexagrams were derived by using combinatory trigrams selected from the Earlier Heaven and Later Heaven trigram cyclic sequences. · The legendary authors of the I Ching, known as Fu Hsi and King Wen, used Key Coded Matrices which enabled them to change the hexagrams of the ancient Ma-wang-tui into the Standard Modern edition. · The formulation of the Trigram Order of Completion was derived by using Knight's Chess /binary codes and the manipulation of hexagram identification numbers. · The cyclic sequences and trigram line to line transitions were utilized to formulate the King Wen's hexagram arrangement. · The natural numerical notation for each individual trigram was mathematically derived. · The author's inter-face code was derived and used to determine the mathematical methodology of the Genetic Code. · Trigram lines are manipulated to form the Inner and Outer Nuclear trigrams/ hexagrams. · The Genetic Code was determined from Fu Hsi's diagram of the derivation of the Sixty-Four hexagrams. It also includes the constructional details of an analytical model calculator which can be created from the actual design details shown within this book. This document provides the conclusive evidence that the originator(s) of the I Ching used a mathematical system which encompassed a formalistic natural philosophy that sought to embrace the entire world in a system of number symbolism. It shows the links to the ancient Indian Vedic mathematical system which reveals the relationship between the I Ching and the Binary / Genetic Codes.

The Key Code and Advanced Handbook for the Governance and Supervision of Banks in Australia Francesco de Zwart,2021-10-12 This Key Code and Handbook examines the corporate governance and accountability of Major Banks, their directors and executives which were the central focus of bank, Supervisor, Regulator and governmental activity and public scrutiny in 2018 and 2019. This book explores this responsibility focus by providing evidence from the Global Financial Crisis and beyond with both APRA and ASIC investigating illegal conduct, misconduct and conduct which was below the level of community expectations. This book discusses how the Royal Commission into misconduct in the banking and financial services industry has already given rise to a detailed Final Report whose recommendations are still being put into effect. Further, this book uses evidence provided by the large number of Prudential Standards issued by APRA and investigations into the conduct of Major Banks by Regulators. This book explores governance variables – over 1,700 in number and grouped into 159 'key groupings' or separate categories – which are all indexed to 28 governmental, regulatory and supervisory reports and documents to create a governance code and commentary specifically tailored to Australian banks. Each governance variable is modelled on the Stage 1 Relational Approach contained in Enhancing Firm Sustainability Through Governance. Given the huge interest in the governance of banks, Parts 1 and 2 – explaining the Relational Approach - of Stage 1 were recently published in November 2018 and June 2019 in the Australian Journal of Corporate Law. This book is the largest reference book and handbook in publication worldwide containing the structures, mechanisms, processes and protocols – the checks and balances we call 'governance variables' – that deeply addresses and explains banking accountability and regulation in Australia.
