*Pre-Incident Indicators of Terrorist Incidents* Brent L. Smith,2011 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Painstakingly researched, the story behind the decision to send the Enola Gay to bomb Hiroshima is told through firsthand sources. From diplomatic moves behind the scenes to Japanese actions and the US Army Air Force's call to action, no detail is left untold. Touching on the early days of the Manhattan Project and the first inkling of an atomic bomb, investigative journalist Gordon Thomas and his writing partner Max Morgan-Witts, take WWII enthusiasts through the training of the crew of the Enola Gay and the challenges faced by pilot Paul Tibbets. A page-turner that offers "minute-by-minute coverage of the critical periods" surrounding the mission, Enola Gay finally separates myth and reality from the planning of the flight to the moment over Hiroshima when the atomic age was born (Library Journal).

**A Civilian Occupation** Rafi Segal,David Tartakover,Eyal Weizman,2003-11-17 Bringing together essays and photographs by leading Israeli practitioners, and complemented by maps, plans and statistical data, A Civilian Occupation explores the processes and repercussions of Israeli planning and its underlying ideology. It demonstrates how, over the last century, planning and architecture have been transformed from everyday professional practices into strategic weapons in the service of the state, which has sought to secure national and geopolitical objectives through the organization of space and in the redistribution of its population. In fact, as the book shows, Israeli architecture has consistently provided the concrete means for the pursuit of the Zionist project of building a national home for the Jewish people in the Land of Israel. As such, it is the first study to supplement the more familiar political, military and historical analysis of the Israel-Palestine conflict with a detailed description of the physical environments in which it is played out. The banning of the first edition of this book by its original publisher was proof, if any were needed, that architecture in Israel, indeed architecture anywhere, can no longer be considered a politically naive activity: the politics of Israeli architecture is the politics of any architecture.
