Foundation Flash MX Applications Steve Webster, Scott Mebberson, 2013-11-09 This book provides the richest and most solid introduction to the exciting world of Flash applications, which are becoming increasingly popular as ways of presenting visually rich interfaces to useful data and services. Foundation Flash MX Applications supplies you with the knowledge, techniques, and skills that you need to help you plan, develop, and build Flash-based applications that you can deploy on the Web. In true Foundation series style, this book uses step-by-step exercises and a running case study to build skills that you can then apply to any Flash application you create. The emphasis in this book is on the generic skills and approaches that are essential in this field, rather than on shallow walk-throughs of trivial projects. You'll come away from this book with a deeper understanding of the issues (architectural, technical, process-related, design-oriented) that are key to developing successful Flash applications for the Web. This is the only book on the market that focuses on generic, transferable skills that are taught using a case study that'll really drive the learning home. If you want to really understand this subject, then this is the book for you. To get the most out of this book, we recommend that you already have a grasp of the Flash MX interface, as well as some ActionScript experience. Topics include: A full-length case study, creating a dynamic Flash message board application. Designing usable, scalable, and interactive Flash-based applications. Deploying XML for client/server communication. Using PHP as an intermediary between XML and back-end data storage. The MySQL database.

XML in Flash Craig Swann, Gregg Caines, 2002 XML in Flash is an excellent introduction to creating state-of-the-art Flash applications with XML. XML is quickly becoming the most popular way to store and manage data. Flash's XML Socket makes it possible to network Flash front-ends to an application server. This allows developers to use a Flash interface for applications such as message boards, real-time chats, surveys, news feeds, and games. XML in Flash begins by illustrating the basics of XML and the Flash XML Object. In Part I, Flash is used as a teaching aid as you learn the basics of Flash/XML integration. Part II covers how Flash works with middleware languages, such as PHP and ASP, as well as performance and optimization. You will also create a Flash message board with a database. Part III delves into the advantages of XMLSocket. Hands-on projects include creating a stock market ticker to receive XML data from servers. Finally, the appendixes include invaluable reference information on XML, XMLNode objects, and XMLSocket objects, as well as Frequently Asked Questions. The example applications also illustrate the key concepts necessary for understanding the Flash/XML relationship. You will be able to use the applications on the accompanying Web site regardless of whether or not you spend the time to read and learn about their inner workings.

Byte-Size Flash MX Keith Peters, Cody Lindley, Kip Parker, Genevieve Garand, David Hirmes, Roy Tanck, Robert Reich, 2013-11-11 Have you ever poured all your creativity into a Flash movie, but found your friends grumbling at the download size? Have you tried to use just one tiny picture in your movie, and seen the file size go through the roof? Is it possible to do anything remotely effective in a small file? More than you could possibly imagine! This collection shows you just exactly what can be done with tiny Flash files, using some of the hottest Flash designers around. These authors pull designs out of the top drawer and show you exactly how you can go about creating great SWFs with the smallest amount of download pain. We will look at: creating incredible generative designs -- so small you can use them for wallpaper producing 3D animations that roll in at under 5k in size creating sound toys in the smallest possible file space de-mystifying the use of JPEGs and photographs while keeping your Flash movies small strategic use of back-end technology to keep your delivery times down to nanoseconds! changing the boundaries to look at new ways of delivering entire sites! From the Publisher Who is this book for You've worked with Flash, but are wondering why people are getting tetchy at the download time. You're willing to start learning some ActionScript tricks to fight the file flab, and you're not afraid to become addicted to optimization! About the Author Genevieve Garand Conceived 3weeks in April.com, an experimental web site that explores new ways of navigation and features an engaging narrative. David Hirmes is a Flash developer living in Brooklyn, New York. Kip Parker Works through his own company Hi-Rise Limited and in collaboration with Anthony Burrill as Friendchip, which was established in 1998. Keith Peters Found Flash to be the ideal medium for creating graphics with code. Robert Reich lives in Hamburg, Germany. Flash became his favourite besides normal HTML and serverside driven website creation. He is working as freelancer for several firms. Roy Tanck Currently employed in Hilversum, as part of a team that creates innovative e-learning solutions. Within this environment, Flash is a great tool.

Object-Oriented Macromedia Flash MX William Drol, 2008-01-01 Object-Oriented Flash MX teaches object-oriented programming skills using Flash MX ActionScript. It assumes no previous programming experience and encourages Flash users that normally avoid ActionScript.

Flash and XML Dov Jacobson, Jesse Jacobson, 2002 The complete tutorial on integrating Flash and XML to create powerful Web applications. Integrate Flash with dynamic content, backend databases, server apps--even other live users. Covers ActionScript, HTTP, SQL, PHP, and much more.

Advances in Web-Based Learning - ICWL 2005 Rynson W.H. Lau, Qing Li, Ronnie Cheung, Wenyin Liu, 2005-07-18 With the rapid development of Web-based learning, a new set of learning - vironments including virtual classrooms, virtual laboratories and virtual u- versities are being developed. These new learning environments, however, also introduce new problems that need to be addressed. On the technical side, there is a need for the deployment of e?ective technologies on Web-based education. On the learning side, the cyber mode of learning is very di?erent from tra- tional classroom-based learning. On the management side, the establishment of a cyber university imposes very di?erent requirements for the set up. ICWL 2005, the 4th International Conference on Web-Based Learning, was held in Hong Kong, China from July 31 to August 3, 2005, as a continued - tempt to address many of the above- mentioned issues. Following the great success of ICWL 2002 (Hong Kong, China), ICWL 2003 (Australia), and ICWL 2004 (China), ICWL 2005 aimed at presenting progress on the technical, pedagogical, as well as management issues of Web-based learning. The conference featured a comprehensive program, including a number of tutorials, two keynote talks, a main track containing regular as well as short paper presentations, and an application track. We received a total of 99 submissions from all over the world. The Program Committee selected 33 papers as regular papers for presentation in the main track, an acceptance rate of about 33%. Due to the high-quality submissions, the Committee decided to further accept 9 papers as short papers for presentation.

Joseph Lowery's Beyond Dreamweaver Joseph Lowery, 2002 There's no other book like this, as cookbook-type solutions and deconstructions of advanced techniques are presented by Web professionals. Lowery provides detailed solutions for advanced problems, and combines real-world deconstructions of techniques by acknowledged master

designers with step-by-step implementations.

The papers present the state of the science, addressing all relevant aspects of web information systems technologies and applications. They are grouped into four parts covering internet technology; web interfaces and applications; society, e-business, and e-government; and e-learning.

Foundation XML and E4X for Flash and Flex Sas Jacobs, 2009-02-21 XML is the lingua franca of the Web. All designers and developers working in a web environment need a sound understanding of XML and its role in application development. Many software packages and organizations allow for the exchange of data using an XML format. Web services and RSS feeds are now commonplace. For those working with Flash and Flex, a thorough understanding of XML is particularly important. XML documents are one option for the data provided to SWF

applications. Flash and Flex can load, display, and modify XML content. These applications can also send XML content to other applications for updating or for use in different situations. ActionScript 3.0 introduced some fundamental changes to the way in which Flash and Flex applications work with XML. One significant change is that XML is now a native data type. ActionScript 3.0 also introduced new classes and a different framework for working with external documents. These changes are based on the E4X ECMAScript standard, and they streamline and simplify the process for working with XML in Flash and Flex. In *Foundation XML and E4X for Flash and Flex*, Sas Jacobs gives you an introduction to XML and E4X. She explores the XML and XMLList classes and explains E4X expressions, providing examples for both Flash and Flex. In addition to explaining how to incorporate XML documents in Shockwave Flash applications, Sas shows you approaches specific to Flash and Flex and explores real-world usage. The book finishes with two case studies. In the first, you will learn how to consume and display information and images from Flickr using Flash. In the second, you will work with Adobe Kuler in Flex. Whether you are a designer or developer, this book will help you work with XML and make the transition from ActionScript 2.0 to ActionScript 3.0. It will also provide you with an excellent grounding if you are new to Flash and Flex.
