The External Dimension of EU Agencies and Bodies

Herwig C.H. Hofmann, Ellen Vos, Merjin Chamon, 2019

This timely book addresses urgent questions about the external actions of the EU's decentralized agencies and their effects, such as how they should be conceptualized and assessed, and how these agencies can and should be governed in the future. Bringing together pioneering interdisciplinary work from European legal and political scholars, the book combines theory with empirical case studies to explore an underdeveloped field and identify a future research agenda. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 10.0px Arial}

Regulation and Supervision of the OTC

Derivatives Market Ligia Catherine Arias-

Barrera, 2018-05-11 The over-the-counter (OTC)

derivatives market has captured the attention of regulators after the Global Financial Crisis due to the risk it poses to financial stability. Under the post-crisis regulatory reform the

concentration of business, and risks, among a few major players is changed by the concentration of a large portion of transactions in the new market infrastructures, the Central Counterparties

(CCPs). This book, for the first time, analyses the regulatory response of the United Kingdom and the United States, the two largest centres of OTC derivatives transactions, and highlights their shortcomings. The book uses a normative risk-based approach to regulation as a methodological lens to analyse the UK regime of CCPs in the OTC

derivatives market. It specifically focuses on prudential supervision and conduct of business rules governing OTC derivatives transactions and the move towards enhancing the use of central clearing. The resulting analysis, from a normative risk based approach, suggests that the UK regime for CCPs does not fulfil what would be expected if a coherent risk based approach was taken. Our comments on the Dodd-Frank Act highlight that the incoherent adoption of risk-based approach to regulation affects the effectiveness of the US regime for CCPs. Such a regime does not follow the pace of events of 'innovation risk'; in

particular, the foreseeable changes FinTech will bring to the OTCDM and central clearing services. The second inadequacy of the US regime concerns the dual regulatory structure of the CFTC and the SEC, and the inadequate adoption of different and not well-coordinated regulatory strategies. We also analyse the cross-border implications of the US regime for non-US CCPs that provide clearing services to US market participants. Finally, we study the negative effects of the absence of a clearly defined resolution regime for CCPs.
