The Web and Parents Judy Hauser,2009-09-23 This introduction of Web 2.0 tools is written for parents who want to understand how their children are using today's Internet, both in school and in their social lives. For parents who want to raise their comfort level with today's Web capabilities, for those who want to enhance their children's Internet usage in and out of school, and for those who want to be prepared for potential dark alleys in the online world, The Web and Parents: Are You Tech Savvy? is a welcome new resource. Don't know a blog from a Wiki? MySpace from Facebook? An RSS feed from an instant message? The Web and Parents provides a brief introduction to these and other aspects of Web 2.0, including podcasts, forums, graphic generators, photo storage and file-sharing sites, and more. Parents will get a sense of what each tool or resource does, how they themselves might use them—lots of grownups do, really—and the role each plays in current K-12 education and in the lives of school-age children. With this crash course on today's Internet, the Web becomes a place where families come together, not drift apart.

Stern's Guide to the Cruise Vacation 2007 Steven B. Stern,2006-09-01 Pelican's luxury-travel expert Steven B. Stern completely updates this guide each year to provide the most current and accurate descriptions of nearly 300 cruise ships. These listings include not only Alaskan, Mediterranean, and Caribbean cruises but also offbeat destinations like European barge trips and more. Every new edition also contains actual shipboard menus, activity schedules, price categories, and hints on how to best enjoy an eight-hour stay in port.

Mediating Sexual Citizenship Anita Brady,Kellie Burns,Cristyn Davies,2017-07-06 *Mediating Sexual Citizenship* considers how the neoliberal imperatives of adaptation, improvement and transformation that inform the shifting artistic and industrial landscape of television are increasingly indexed to performed disruptions in the norms of sexuality and gender. Drawing on examples from a range of television genres (quality drama, reality television, talk shows, sitcoms) and outlets (network, cable, subscription video on demand), the analysis in this book demonstrates how, as one of the most dominant cultural technologies, television plays a critical role in the production, maintenance and potential reconfiguring of the social organisation of embodiment, be it within gender identities, kinship structures or the categorisation of sexual desire. It suggests that, in order to understand television's role in producing gendered and sexual citizenship, we must pay critical attention to the significant shifts in how television is produced, broadcast and consumed.

The Maker Cookbook Cindy Wall,Lynn Pawloski,2014-08-28 The Maker Movement is hot, and librarians are eager to participate. Even if you feel restricted by budget, staff, or space, this step-by-step guide will help you turn your library into a creativity center. The Maker Movement is sweeping the nation because it is creative and educational—and a lot of fun. Nonetheless, some librarians have hesitated to incorporate the movement into their programming because their libraries do not have dedicated makerspaces. If that describes you, then take heart. Written by librarians for librarians, this cookbook proves that every library is already a MakerPlace and provides you with recipes to make your library come alive with creativity. Easy-to-use, step-by-step guidance helps you create engaging K-8 programs in science and technology, arts and crafts, and home skills that are perfect for the library setting. The menu of ideas is broken into four types of programming. Appetizers add a taste of the Maker movement to existing library programs. Entrees present full programs for a lengthy one-day event or a short series. Side Dishes are programs you can use if you have limited staff, budget, space, or any combination of those. Desserts are low-tech programs, suitable for young children. Each recipe includes extensions, variations, and curriculum tie-ins that give you even more ways to present the program ideas, whether to a different audience or as part of other related activities. Programs that involve creating a Balloon Zip Line, a Zen Garden, or a Maker Marketplace will delight library users and generate activity and excitement in your library.

The Hitchhiker's Guide to Going Mobile Arthur Goldstuck,2006 'The Hitchhiker's Guide to Going Wireless quickly established itself as the essential guide to mobile technology in South Africa. Going Mobile starts where Wireless left off and shows how the vision for the future is becoming a reality today. Wireless talked about the future high-speed wireless technology called WiMax, and already WiMax services are being offered commercially. The

future is rushing up on us so fast that the time for a new edition of the Hitchhiker's Guide is now. As in Wireless, we ask the critical questions: What does it all mean? Where is it all going? How do ordinary people tap into this communication revolution? Here is a guide that once again catches the wave of interest and activity, that taps into the buzz, and also sets the mobile agenda for ordinary people and businesses throughout South Africa.

Birth of an Industry Nicholas Sammond,2015-08-27 In Birth of an Industry, Nicholas Sammond describes how popular early American cartoon characters were derived from blackface minstrelsy. He charts the industrialization of animation in the early twentieth century, its representation in the cartoons themselves, and how important blackface minstrels were to that performance, standing in for the frustrations of animation workers. Cherished cartoon characters, such as Mickey Mouse and Felix the Cat, were conceived and developed using blackface minstrelsy's visual and performative conventions: these characters are not like minstrels; they are minstrels. They play out the social, cultural, political, and racial anxieties and desires that link race to the laboring body, just as live minstrel show performers did. Carefully examining how early animation helped to naturalize virulent racial formations, Sammond explores how cartoons used laughter and sentimentality to make those stereotypes seem not only less cruel, but actually pleasurable. Although the visible links between cartoon characters and the minstrel stage faded long ago, Sammond shows how important those links are to thinking about animation then and now, and about how cartoons continue to help to illuminate the central place of race in American cultural and social life.
