It provides a practical, thorough, and completely objective method to analyze and select an investment manager. It takes the mystery (and the consultants) out of the equation. Without question, this book belongs on every Plan Sponsor's desk. —Dave Davenport, Assistant Treasurer, Lord Corporation, author of *The Equity Manager Search* An insightful compendium of the issues that challenge those responsible for hiring and firing investment managers. Frank Travers does a good job of taking complicated analytical tools and methodologies and explaining them in a simple, yet practical manner. Anyone responsible for conducting investment manager due diligence should have a copy on their bookshelf. —Leon G. Cooperman, Chairman and CEO, Omega Advisors, Inc. *Investment Manager Analysis* provides a good overview of the important areas that purchasers of institutional investment management services need to consider. It is a good instructional guide, from which search policies and procedures can be developed, as well as a handy reference guide. —David Spaulding, President, The Spaulding Group, Inc. This book is the definitive work on the investment manager selection process. It is comprehensive in scope and well organized for both the layman and the professional. It should be required reading for any organization or individual seeking talent to manage their assets. —Scott Johnston, Chairman and Chief Investment Officer, Sterling Johnston Capital Management, LP *Investment Manager Analysis* is a much-needed, comprehensive review of the manager selection process. While the industry is riddled with information about selecting individual stocks, comparatively little has been written on the important subject of manager selection for fund sponsors. This is a particularly useful guide for the less experienced practitioner and offers considerable value to the veteran decisionmaker as well. —Dennis J. Trittin, CFA, Portfolio Manager, Russell Investment Group

This is a very important decision and deserves to be taken seriously. The fact that you are taking the time to read this report says you are probably on the right track.Making money is an important part of any career. Even if money is not your primary motivation, it is important because it will allow you to do the things you want to do, whether it is something optional like take a nice vacation or something dutiful like pay the rent or send a child to college. Helping other people to make money is a great way to make your own. Investment fund managers create the

products that regular people invest their money in to make more money. Their work is central to the life-planning process of millions of people. Investment fund managers help people to save for retirement, to buy homes, send their kids to college and achieve financial freedom. Without them, most people would simply stash their money in a bank and earn a tiny rate of interest. Investment fund managers help people to put their money to work. Demand for investment fund managers is always healthy, although in recent years computers have started to do more of the work once assigned to humans. Most investors, however, want to know that a real person is at the helm of their investment vehicles, making trained professionals more important than ever. Investment fund managers are the brains behind a variety of investments, including mutual funds, exchange-traded funds, hedge funds and private equity funds. For the most part, investment fund managers work behind the scenes and rarely meet the people who buy their products. Portfolio managers do the same work, but usually for private clients. The best fund managers achieve actual star power in the investment world and their reputations help to sell their products.

Are Mutual Fund Managers better than us? Nicola Gundrum, 2012-10-31 Seminar paper from the year 2011 in the subject Business economics - Investment and Finance, grade: 1,7, Shanghai University, language: English, abstract: Many people want to invest their money with the aim to gain a profit. This question will be analyzed and answered in the following chapters.

Investing with Anthony Bolton Jonathan Davis, 2006 Who is the most successful investment manager in Britain? Arguments could rage forever, but no professional would dispute that Anthony Bolton of Fidelity is among the very best. £1,000 invested in his Special Situations fund at its launch in 1979 was worth more than £125,000 twenty seven years later. No other mainstream UK fund manager has put together such a consistently impressive performance over such a long period. The 125-fold increase represents an average compound growth rate of more than 20% per annum, or 7% per annum greater than the FTSE All-Share Index over the same period. This track record of sustained outperformance stands comparison with that of the greatest American investment superstars such as Warren Buffett and Peter Lynch. For many years, until the fund was voluntarily split in 2006, Fidelity Special Situations was easily the largest and most popular fund in the UK. What are the secrets of Anthony Bolton's success? This important book, now fully revised and updated, takes an in-depth look at the way that Bolton goes about his business and analyses in detail the fund's outstanding

performance. Anthony Bolton gives his own personal account of the history of the fund, explains why he believes his contrarian stockpicking methods have worked so well for so long and summarises the lessons he has learnt from his long and successful career. This book is required reading for anyone with a personal or professional interest in investment. - Fully revised and updated second edition with 25 pages of new material and graphics. - The only full-length book to analyse in detail the strategies and techniques used by the UK's number one professional investor. - Detailed analysis of the performance of his funds and the lessons that investors can draw from its exceptional track record. - Written jointly by Anthony Bolton and one of the UK's best known financial authors, a leading authority on the fund management business.

Fund Managers, Career Concerns, and Asset Price Volatility Veronica Guerrieri,Péter Kondor,2011 This is a print on demand edition of a hard to find publication. Proposes a general equilibrium model where investors hire fund managers (FM) to invest their capital either in a risky bond or in a riskless asset. There is a small fraction of informed FM with superior info. on the default probability. Looking at the past performance, investors update their beliefs on the info. of their FM and make hiring and firing decisions. This leads to career concerns which affect the investment decision of un-informed

FM, generating a reputational premium. When the default probability is high enough, un-informed FM prefer to invest in the riskless asset to reduce the probability of being fired. On the contrary, if the probability of default is low enough, investing in the risky bonds has a reputational advantage and the premium is negative.
