**Recovering from a First Episode of Psychosis** Chris Jackson, Eleanor Baggott, Mark Bernard, Ruth Clutterbuck, Diane Ryles, Erin Turner, 2019-05-07 Despite years of research, debate and changes in mental health policy, there is still a lack of consensus as to what recovery from psychosis actually means, how it should be measured and how it may ultimately be achieved. In

Recovering from a First Episode of Psychosis: An Integrated Approach to Early Intervention, it is argued that recovery from a first episode of psychosis (FEP) is comprised of three core elements: symptomatic, social and personal. Moreover, all three types of recovery need to be the target of early intervention for psychosis programmes (EIP) which provide evidence-based, integrated, bio-psychosocial interventions delivered in the context of a value base offering hope, empowerment and a youth-focused approach. Over the 12 chapters in the book, the authors, all experienced clinicians and researchers from multi-professional backgrounds, demonstrate that long-term recovery needs to replace short term remission as the key target of early psychosis services and that, to achieve this, we need a change in the way we deliver EIP: one that takes account of the different stages of psychosis and the 'bespoke' targeting of integrated medical, psychological and social treatments during the 'critical period'. Illustrated with a wealth of clinical examples, this book will be of great interest to clinical psychologists, psychiatrists, psychiatric nurses and other associated mental health professionals.

*India and the Global Game of Gas Pipelines* Gulshan Dietl, 2016-11-03 Gas pipelines constitute an important, yet unexplored, aspect of strategic geography. As one of the fastest growing economies in the world, India's need for energy is paramount. Though surrounded by gas-rich regions – Myanmar and Bangladesh to the east, the Gulf to the west and Central Asia to the north – India does not have a single gas pipeline coming in, going out or traversing through its territory to date. This book highlights the global competition over gas pipelines and its implications for India's energy security in a comprehensive manner. The author leads us through a labyrinthine world comprising numerous actors – the states, energy firms, scientists, engineers, investors and bankers – engaged in competition over these pipelines leading to a continuous game of checkmating rivals, instigating conflicts, causing damage and destruction and threatening military action to persuade or dissuade states from joining specific projects. Pulsating, rigorous, grounded in hard facts and solid research, this book will be indispensable for scholars and researchers of international relations, strategic affairs, defence studies and politics, as well as think tanks, government agencies and the informed general reader.
